The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Our Calendar George Nichols Packer, 1893

Days and Dates Samuel Newton Norton, 1898

Julian and the Gregorian Calendars, Presents information on the Julian and the Gregorian calendars, provided by Peter Meyer. Discusses the history of the two calendars. The Julian calendar was adopted in 46 B.C. by Julius Caesar and consisted of a solar year of 12 months and 365 days with an extra day every fourth year. Notes that the Gregorian calendar was adopted upon the promulgation of Pope Gregory's decree in the Catholic countries of Italy, Spain, Portugal, and Poland. Discusses the accuracy of the Gregorian and Orthodox calendars.

Our Calendar George Nichols Packer, 1892

The Julian and Gregorian year: or, The difference betwixt the old and new-stile John Willes, 1700

The History and Practice of Ancient Astronomy James Evans, 1998-10 Birth of astronomy -- Celestial sphere -- Some applications of spherics -- Calendars and time reckoning -- Solar theory -- Fixed stars -- Planetary theory -- Frequently used tables -- Appendix : patterns for models.

Ancestry magazine, 2007-03 Ancestry magazine focuses on genealogy for today's family historian, with tips for using Ancestry.com, advice from family history experts, and success stories from genealogists across the globe. Regular features include "Found!" by Megan Smolenyak, reader-submitted heritage recipes, Howard Wolinsky's tech-driven "NextGen," feature articles, a timeline, how-to tips for Family Tree Maker, and insider insight to new tools and records at Ancestry.com. Ancestry magazine is published 6 times yearly by Ancestry Inc., parent company of Ancestry.com.

Investigating Art, History, and Literature with Astronomy Donald W. Olson, 2022-03-17 How can shadows determine the date and time of a painting by Johannes Vermeer? How did the Moon and tides cause the loss of King John's crown jewels? In his newest book, Professor Olson, author of *Celestial Sleuth* and *Further Adventures of the Celestial Sleuth*,

explores how astronomical clues can uncover fascinating new details about art, history, and literature. He begins with an accessible introduction to amateur “celestial sleuthing,” showing how to use your astronomical knowledge, software, archives, vintage maps, historical letters and diaries, military records, and other resources to investigate the past. Follow along as Professor Olson then explores twenty real-world cases where astronomy has helped answer unresolved questions or correct longstanding interpretations about an event. Examples involve artists such as Vermeer, Monet, and O’Keeffe; the historical exploits of Alexander the Great, the desert travels of the Death Valley ’49ers, and a meeting between Franklin D. Roosevelt and Winston Churchill in Marrakech; and literary works by Chaucer, Shakespeare, and Longfellow. Packed with dozens of full-color illustrations, this book will enrich your knowledge of the past and equip you with all the tools you’ll need to become a celestial sleuth yourself. “Many people have a passion for art, or world history, or great literature, or even astronomy — but seldom in all these things at once. This remarkable book by Donald Olson of Texas State University will put you in touch with such seemingly unrelated endeavors. It will open your eyes and broaden your mind as little else could.”
