Wellbeing: A Complete Reference Guide, Wellbeing and the Environment Rachel Cooper, Elizabeth Burton, Cary Cooper, 2014-02-11 Part of the six-volume *Wellbeing: A Complete Reference Guide*, this volume examines the ways in which the built environment can affect and enhance the wellbeing of society. Explores the effects of environment on wellbeing and provides insight and guidance for designing, creating, or providing environments that improve wellbeing Looks at the social and health issues surrounding sustainable energy and sustainable communities, and how those connect to concepts of wellbeing Brings the evidence base for environmental wellbeing into one volume from across disciplines including urban planning, psychology, sociology, healthcare, architecture, and more Part of the six-volume set *Wellbeing: A Complete Reference Guide*, which brings together leading research on wellbeing from across the social sciences

From the City as a Project to the City Project Fernando Carrión Mena, Sebastián Rodríguez Álvarez, 2025-09-26 The city has historically been conceived as a project, with a sense of duty to be: it is the prefiguration of a reality that emerges from the negation of the pre-existing city. The city anticipates a desired future from an ideal perspective that tends to overcome the existing structural or particular challenges of the present. It can be argued that this proposition represents the historical trajectory of urban thought on a planetary scale. Therefore, the prospective dimension of the city constituted a central dynamic in urban theory throughout history, leading to the emergence of planning as a key approach. The history of the city as a project is the core of the first volume in this two-part contribution. It presents an overview of diverse city projects that have been pursued throughout history, providing a framework for exploring new perspectives of urban development. The cities profiled and analyzed here reflect a living catalog of initiatives that can inform promising directions. More than a compilation, this volume compares and critically assesses these historical projects to provide a grounding for the contemporary advances presented in the second volume.

Terms of Appropriation Amanda Reeser Lawrence, Ana Miljački, 2017-12-06 This collection focuses on how architectural material is transformed, revised, swallowed whole, plagiarized, or in any other way appropriated. It charts new territory within this still unexplored yet highly topical area of study by establishing a shared vocabulary with which to discuss, or contest, the workings of appropriation as a vital and progressive aspect of architectural discourse. Written by a group of rising scholars in the field of architectural history and criticism, the chapters cover a range of architectural subjects

that are linked in their investigations of how architects engage with their predecessors.

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang, 2020-11-09 The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city—its built environment—evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic, piecemeal manner to meet their own ends. Philosophers, novelists, architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

La Ville radieuse de Le Corbusier ,1936

Le Corbusier, History and Tradition Armando Rabaça, 2017-05-01 The view of modernism as representing an epistemological break between technology and history and tradition has long been challenged. Le Corbusier's work has proved to be an inexhaustible reference point in this debate. This is due, on the one hand, to the legacy of nineteenth-century historicism, and on the other to his creative process of creation through destruction which, as John Summerson has noted, is comparable to the processes of avant-garde poets and painters. The contributions to this book explore particular episodes which bring to light both the operative role of the past in the creation of a new abstract synthesis, and Le Corbusier's modernist historical consciousness. They illustrate how the past participated in the modernist creative process of abstract art, from the 1920s machine aesthetics to the late infatuation with myth. They also shed light on the extent to which the operative quality of the history was framed by a comprehensive historical vision that took the form of metanarrative, which neither the analytical studies on his architecture nor the synthetic approaches to his philosophical thinking should dismiss.

L'art du chantier Valérie Nègre, 2018 Le chantier est une ambition, un processus et un théâtre où se jouent la transformation physique du monde et l'imaginaire de nos sociétés. C'est un lieu éminemment technique, mais c'est aussi un puissant instrument de pouvoir, un théâtre de la société où les grands aiment se faire représenter et où les artisans apparaissent tantôt comme des héros de la modernisation des villes, tantôt comme des exploités. À partir du XXe siècle, il inspire les architectes et les artistes par son processus et son caractère provisoire et contribue à transformer l'art et l'architecture. Ce sont ces différentes facettes que l'exposition a l'ambition de dévoiler à travers un très grand nombre d'oeuvres, de maquettes et d'objets. L'objectif est de faire découvrir des installations et des pratiques techniques par nature temporaires : gestes, machines, procédés disparus, mais aussi des pratiques sociales, politiques et artistiques moins connues. Exhibition: Cité de l'architecture & du patrimoine, Paris, France (09.11.2018 - 24.03.2019).

La ville radieuse Le Corbusier, 1933 Le Corbusier offers a solution for the enhancement of living and dwelling conditions in the city of the new technological age, and he does so through the proposal of a settlement model that summarises all his research on the subject carried out up to that moment. The blueprint for the Ville Radieuse is presented in fact as the natural outcome of a process that, beginning in the Twenties, would develop during the following decade, ultimately crystallising in concrete plans designed for several cities around the world.
