Inspirational Guide for the Implementation of PRME Principles for Responsible Management Education, 2017-09-08

Since the inception of the United Nations Global Compact-sponsored initiative Principles for Responsible Management Education (PRME) in 2007, there has been increased debate over how to adapt management education to best meet the demands of the 21st-century business environment. While consensus has been reached by the majority of globally focused management education institutions that sustainability must be incorporated into management education curricula, the relevant question is no longer *_why_* management education should change, but *_how_*. Although the PRME initiative is set to increase to 1,000 signatories by 2015, it is equally important for PRME to cultivate actively engaged participants. Therefore, the next step is for current participants to transition from a global learning community to an action community. For this purpose, the PRME Secretariat invited a small group of experts to coordinate an Inspirational Guide for the Implementation of PRME which was presented at the 3rd Global Forum for Responsible Management Education, the official platform for management-related Higher Education Institutions (HEIs) at both the Global Compact Rio+20 Corporate Sustainability Forum and the UN Conference on Sustainable Development - Rio+20 - in June 2012 in Rio de Janeiro. The Guide answers the most frequently asked questions concerning the implementation of PRME by highlighting real-world examples from the most engaged signatories. The exercise has proven successful, and this publication features 63 case stories from 47 institutions, representing 25 countries across Asia, Oceania, the Americas, Europe, the Middle East and Africa. They are the real actors in this effort, and their stories are truly inspirational. Their experiences are classified into six sections, which address the Six Principles of PRME (Purpose, Values, Method, Research, Partnership, and Dialogue) as well as important related aspects, such as how to get started, how to successfully report on PRME adoption, and so on. The full richness of experiences set forth in this Guide is captured only by reading the wealth of innovative practices found in each case.

Fencing for Conservation Michael J. Somers, Matthew Hayward, 2011-11-23 The conflict between increasing human population and biodiversity conservation is one of the IUCN's key threatening processes. Conservation planning has received a great deal of coverage and research as a way of conserving biodiversity yet, while theoretically successful, it has never been tested. Simple lines on maps to illustrate conservation areas are unlikely to be successful in the light of human encroachment. It may be that some form of overt display is necessary to ensure the protection of reserves. This may be

signage, presence of guards/rangers or physical fencing structures. The need for some form of barrier goes beyond restricting human access. The megafauna of Africa pose a genuine threat to human survival. In southern Africa, fences keep animals in and protect the abutting human population. Elsewhere, fencing is not considered important or viable. Where poverty is rife, it won't take much to tip the balance from beneficial conservation areas to troublesome repositories of crop-raiders, diseases and killers. Conversely, in New Zealand fences are used to keep animals out. Introduced species have decimated New Zealand's endemic birds, reptiles and invertebrates, and several sites have been entirely encapsulated in mouse-proof fencing to ensure their protection. Australia faces the same problems as New Zealand, however surrounds its national parks with cattle fences. Foxes and cats are free to enter and leave at will, resulting in rapid recolonisation following poisoning campaigns. How long will these poison campaigns work before tolerance, aversion or resistance evolves in the introduced predator populations?

People and Nature Conservation Andrew F. Bennett, Gary N. Backhouse, 1995 This volume is based on material presented at two symposia held by the Australasian Wildlife Management Society in December 1993. It addresses the conservation and management of wildlife at several levels. Includes discussions of the conservation of wildlife on privately-owned land and a critical appraisal of the management, successes and challenges of implementing species recovery programs for threatened species in Australia. Contributors include scientists from government conservation departments and universities, wildlife planners, land holders, post-graduate students and special interest groups.

Melbourne Langenscheidt Publishers, Tim Harrison, 2000-09 Some travelers love nothing better than to bathe in the sun. Others revel in immersing themselves in history and culture. Then there are those who are born to shop. We all know the type. In fact, we might ourselves be the type. There are some people for whom shopping is not a necessity but a sport. Insight Shopping Guides are a play book for the avid shopper who wants to level the playing field when he or she competes against natives for the best goods and deals the city has to offer. This series is for the discerning consumer who needs a little help navigating around an unfamiliar city. They are ideal shopping companions for travelers wanting lively, informative background material on the best shopping areas and reliable advice on finding the most reliable service.

Port Essington Jim Allen, 2008 Some 40 years on, ASHA's decision to launch its new monograph series by publishing this work has several purposes. At one level this monograph is of historical importance in establishing where the discipline began in this country. It explains both the theoretical and methodological problems Allen faced and how he sought to overcome them. At another level it provides the data from an important excavation that has not been previously published. On a third level it provides a particular sort of historical account of a small but important chapter of Australia's European beginnings that could not have been written without the dual sources of written documents and archaeology. Together they reflect a poignant episode in our past. In the decade following this work Port Essington became the subject of a four part ABC-TV drama, a musical composition by Peter Sculthorpe and paintings by Russell Drysdale. Port Essington will appeal as a reference book to both students and practitioners of historical archaeology and to people interested in Australian colonial history. After Port Essington, Jim Allen established an academic career in prehistoric archaeology in Australia and the Pacific. He is currently Emeritus Professor in the School of Historical and European Studies in La Trobe University. --
