

Man Plus By Frederik Pohl

Yi-Tong Ma

Man Plus Frederik Pohl, 2000 The award-winning account of a man changed beyond all recognition so that he can be part of a bold experiment to live on Mars. Ill luck made Roger Torraway the subject of the Man Plus Programme, but it was deliberate biological engineering which turned him into a monster - a machine perfectly adapted to survive on Mars. For according to computer predictions, Mars is humankind's only alternative to extinction. But beneath his monstrous exterior, Torraway still carries a man's capacity for suffering.

Imagining Mars Robert Crossley,2011-01-03 Mars in the human imagination from the invention of the telescope to the present For centuries, the planet Mars has captivated astronomers and inspired writers of all genres. Whether imagined as the symbol of the bloody god of war, the cradle of an alien species, or a possible new home for human civilization, our closest planetary neighbor has played a central role in how we think about ourselves in the universe. From Galileo to Kim Stanley Robinson, Robert Crossley traces the history of our fascination with the red planet as it has evolved in literature both fictional and scientific. Crossley focuses specifically on the interplay between scientific discovery and literary invention, exploring how writers throughout the ages have tried to assimilate or resist new planetary knowledge. Covering texts from the 1600s to the present, from the obscure to the classic, Crossley shows how writing about Mars has reflected the desires and social controversies of each era. This astute and elegant study is perfect for science fiction fans and readers of popular science.
