Head, Neck, and Dental Emergencies Michael Perry (FRCS.), 2005 The first book in an exciting new series, Head, Neck and Dental Emergencies provides the reader with a working approach to the diagnosis and management of these patients in casualty. It has been laid out in a similar way to the Oxford Handbooks series - a small format, plastic-covered, note-based, practical volume for looking up information quickly. The book covers how to diagnose and manage all urgent or emergent problems that occur above the collar bones. Emergency care must be simple and quick so this book comprises short notes, illustrations and photographs, with an emphasis on establishing the diagnosis while maintaining a high index of suspicion. Where possible, the book covers one topic per on one to three pages and uses a series of four icons to allow rapid identification of the degree of urgency. This system will help the reader to get an idea of how soon each problem should be seen. Aimed primarily at undergraduate dentistry students, this book will also have a wide postgraduate market amongst dentists and junior doctors and nurses in accident and emergency medicine, maxillofacial surgery, ENT, ophthalmology,

anesthetics and plastic surgery.

**General and Oral Pathology for the Dental Hygienist** Leslie DeLong, Nancy Burkhart, 2013-02-25 General and Oral Pathology for the Dental Hygienist, 2nd Edition, is a comprehensive study of the general concepts of pathophysiology as they relate to systemic and oral conditions. The only dental hygiene book on the market to address both oral and general pathology, General and Oral Pathology for the Dental Hygienist is the ideal solution for programs that cover oral and general pathology in one course, and provides an easily accessible review of general pathology for programs that cover oral pathology separately. The Oral Pathology section is uniquely organized by distinct recognizable characteristics of lesions (for example, “white” lesions or “radiolucent” lesions), a uniquely practical and highly effective way of presenting this information since dental hygienists have to evaluate pathology based on what they see. This allows the student to easily identify what he or she might be looking at and to differentiate between lesions with similar appearances.
