Don't Believe the Hype!! (First Revision) C. Brian Madden, 2017-05-11 Ever ask the question, Why today's Millennials in America's Black Community seem so mad at the world and don't care whether they live or die these days? There is a reason for it; and it is being done on purpose, to destroy this country! It's called Communism! And it is Real! Don't Believe the Hype!! (First Revision) is an explosive book which investigates how and why Communist Subversion (Perversion) has taken over the African-American Community; with the sole intent to use and destroy them, while simultaneously destroying the rest of United States of America from within! Using Historical Facts from the Mid-19th Century to the present era, Don't Believe the Hype!! will surely spark Geo-political conversations between people of all races, genders, and back grounds!

Animals and the Environment Lisa Kemmerer, 2015-05-01 Contemporary Earth and animal activists rarely collaborate,

perhaps because environmentalists focus on species and ecosystems, while animal advocates look to the individual, and neither seems to have much respect for the other. This diverse collection of essays highlights common ground between earth and animal advocates, most notably the protection of wildlife and personal dietary choice. If earth and animal advocates move beyond philosophical differences and resultant divergent priorities, turning attention to shared goals, both will be more effective – and both animals and the environment will benefit. Given the undeniable seriousness of the environmental problems that we face, including climate change and species extinction, it is essential that activists join forces. Drawing on a wide range of issues and disciplines, ranging from wildlife management, hunting, and the work of NGOs to ethics, ecofeminism, religion and animal welfare, this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals.

International Heritage and Historic Building Conservation Zeynep Aygen, 2013-03-05 The majority of books in English on historic building conservation and heritage preservation training are often restricted to Western architecture and its origins. Consequently, the history of building conservation, the study of contemporary paradigms and case studies in most universities and within wider interest circles, predominantly in the UK, Europe, and USA focus mainly on Europe and sometimes the USA, although the latter is often excluded from European publications. With an increasingly multicultural student body in Euro-American universities and with a rising global interest in heritage preservation, there is an urgent need for publications to cover a larger geographical and social area including not only Asia, Australia, Africa and South America but also previously neglected countries in Europe like the new members of the European Community and the northern neighbour of the USA, Canada. The inclusion of the 'other' in built environment education in general and in building conservation in particular is a pre-requisite of cultural interaction and widening participation. *International Heritage and Historic Building Conservation* assesses successful contemporary conservation paradigms from around the world. The book evaluates conservation case studies from previously excluded areas of the world to create an integrated account of Historic Building Conservation that crosses the boundaries of language and culture and sets an example for further inclusive research. Analyzing the influence of financial constraints, regional conflicts, and cultural differences on the heritage of disadvantaged countries, this leading-edge volume is essential for researchers and students of heritage studies interested in

understanding their topics in a wider framework.

Electronic Signatures for B2B Contracts Aashish Srivastava,2012-08-31 The last few centuries have seen paper-based documents and manuscript signatures dominate the way businesses enter into a contractual relationship with each other. With the advent of Internet, replacing paper-based contracts with B2B electronic contracts is a possibility. However, an appropriate technology and an enabling legislation are crucial for this change to happen. On the technology front this feature has the potential to enable business executives to sit in front of their computer and sign multi-million dollar deals by using their electronic signatures. On the legal front various pieces of legislation have been enacted and policies developed at both national and international levels to give legal recognition to such type of contracts. This book presents the findings of an empirical study on large public listed Australian companies that examined businesses' perception towards the use of electronic signatures in B2B contracts. Essentially, it identifies six key factors that create a disincentive to businesses to move from the practice of paper- based signatures to the new technology of electronic signatures. This book offers legal practitioners, academics and businesses insights into issues associated with the use of electronic signatures and suggests a number of measures to promote its usage in B2B contracts.
