Nepal Energy Sector Assessment, Strategy, and Road Map Asian Development Bank,2017-08-01 Nepal is facing an unprecedented energy crisis caused by an acute shortage of power and fuel supply. To improve energy security and stimulate economic growth, the government is accelerating the sustainable development of Nepal's hydropower potential. This publication highlights Nepal's energy sector performance, major development constraints, and government development plans and strategy. It outlines the future support strategy of the Asian Development Bank (ADB) whose main focus is to make the country's energy sector a key driver of inclusive economic growth. Linked to ADB's country partnership strategy for Nepal 2013-2017, this publication provides guidance for future investment and technical assistance operations.

Nepal's Enduring Poverty Sukhdev Shah,2015-08-18 Theory of economic growth has made remarkable progress over the past three decades that has helped give us a better understanding of factors that induce or inhibit growth. In practice, though, a majority of countries have failed to increase growth and improve living conditions. The elixir that has been absent from traditional growth theories is the role of an enabling environment that is needed to induce and support growth. This book--a case study of Nepal's poverty--presents the view that non-economic factors play an outsized role in determining the productive use of economic resources which is critical to spur growth, to a much greater extent than the level of resources a

country commands. The theme developed in this book is that a country's institutional weaknesses create a hostile environment for economic growth to occur and be sustained. Institutional handicaps exercise powerful constraints on the efficiency of use of resources and creation of wealth. This happens because institutions are rooted in a country's history, its culture, emotions, and even in national psychology.
