**Grandmothers Are Like Snowflakes...No Two Are Alike** Janet Lanese,1996-04-01 When a child is born, a miracle happens—someone becomes a grandmother! For first-time grandmas, beloved veterans, or grandmas-in-waiting, this warm, wonderful book captures all the joy and humor of one of a woman's most life-altering experiences. Heartwarming observations from such famous names as Margaret Mead, Jane Russell, and Margaret Thatcher; poems to copy and stick on the refrigerator; words of advice to accidentally leave on a daughter-in-law's kitchen table, suggestions to smooth the rough times or increase the joy, it's all here to read and treasure. Don't miss . . . • Special things only a grandmother can do • Family history a grandmother can pass on • A precious gift every child needs from a grandmother • Secret satisfactions a grandmother feels • How a grandmother can act even wiser than she is And more!

**STEM for humanities scholars** Walter Hehl,2025-08-25 The beginnings of natural sciences and humanities in antiquity were shared, but by the end of the 19th century, the natural sciences had developed dominantly through their successes. In response to this dominance, the philosopher Wilhelm Dilthey coined the term *Geisteswissenschaften* (humanities) in 1883. On the other hand, it was clear in the natural sciences that entire areas of the mind were inaccessible to them, such as sensory experiences and consciousness. This book attempts to show that this sharp divide has softened. Physics has become more intellectual, and the technology of the mind has developed: fundamentally, this is information technology. Physics for the inanimate and computer science (with a physical basis) for all living things and for the computer together explain the world. With mathematics as its foundation and tool, this results in STEM (MINT in German: Mathematik, Informatik, Naturwissenschaft, Technik). An intellectual worldview without STEM is not possible with dignity. There are several STEM

fields that are directly useful to the humanities. Examples include the principle of the laser and the concept of entropy. A third intellectual domain remains outside: art. But art and STEM are not opposites.

This comprehensive critique documents the falsehood of these neo-atheist claims, correcting their historical and philosophical mistakes to show how we can get at the truth about the historical Jesus.
