Teachers' Research in Language Education Verónica Sánchez Hernández, Fatima Encinas, José Luis Ortega-Martin, Yonatan Puon, 2021-07-23 Over the past decade, interest in language teacher education and professionalization programs has increased significantly mainly due to global educational reforms, which have been driven by internationalization, multilingualism, the rise of new literacy and the incorporation of technologies. These reforms, based on the challenges of knowledge societies and networks, have created the need to re-evaluate and reconceptualize teacher training and teacher professional development as a fundamental connection to teaching (Bryant et al., 2008; Vélaz de Medrano & Vaillant, 2009; Espinosa, 2012; Johnson and Golombeck, 2018). The main objective is, then, to “prepare the new generations within an increasingly uncertain and demanding global scenario” (Pérez Ruíz, 2014, p 114). This publication addresses work on the education of language teachers in a variety of sociocultural, educational and institutional contexts carried out in Mexico and Latin America with various methodological designs and approaches from different theoretical perspectives. Therefore, in the context of current challenges, we seek to promote the exchange, discussions of experience and results of research and reflection that can influence the direction and implementation of language policies regarding teacher education and teacher professionalization for language teaching.

Por otra parte se presentan los resultados y conclusiones a las que se llega con la investigación desarrollada.

Alternativas sostenibles para una educación de calidad: educación multimodal , A lo largo de sus diferentes capítulos, la obra aborda el impacto de la tecnología en la formación del profesorado, la creación de contenidos educativos innovadores y la adaptación de los espacios de enseñanza a las nuevas necesidades del alumnado. La implementación de herramientas como Blogger, H5P o Nearpod, el uso de podcasts en la enseñanza de la psicología, la inclusión de realidades virtuales y aumentadas, o la gamificación a través de hackathons educativos, son solo algunas de las estrategias analizadas en profundidad en este volumen.El valor de esta obra radica no solo en la riqueza de sus contribuciones, sino en su capacidad para conectar la investigación con la práctica docente. Cada capítulo refleja la preocupación de los autores por una educación más inclusiva, interactiva y centrada en las necesidades del estudiante. La formación del profesorado, la adaptación curricular y la evaluación de los procesos de enseñanza-aprendizaje son aspectos clave que se abordan desde perspectivas diversas, permitiendo a los lectores encontrar propuestas viables y adaptables a sus propios contextos educativos.
