*Globalization, Wages, and the Quality of Jobs* Raymond Robertson, Drusilla Brown, Galle Le Borgne Pierre, Maria Laura Sanchez-Puerta, 2009-07-17 Since the early 1990s, most developing economies have become more integrated with the world's economy. Trade and foreign investment barriers have been progressively lifted and international trade agreements signed. These reforms have led to important changes in the structures of these economies. The labor markets have adjusted to these major changes, and workers were required to adapt to them in one way or another. In 2006, the Social Protection Unit of the World Bank launched an important research program to understand the impact that these profound structural changes have had on workers in developing countries. 'Globalization, Wages, and the Quality of Jobs: Five Country Studies' presents the findings and insights of this important research program. In particular, the authors present the similar experiences of low-income countries with globalization and suggest that low-income countries working conditions have improved in the sectors exposed to globalization. However, 'Globalization, Wages, and the Quality of Jobs' also highlights concerns about the sustainability of these improvements and that the positive demonstration effects on the rest of the economy are unclear. The empirical literature that exists, although vast, does not lead to a consensus view on globalization's eventual impact on labor markets. Understanding the effects of globalization is crucial for governments concerned about employment, working conditions, and ultimately, poverty reduction. Beyond job creation, improving the quality of those jobs is an essential condition for achieving poverty reduction. 'Globalization, Wages, and the Quality of Jobs' adds to the existing literature in two ways. First, the authors provide a comprehensive literature review on the current wisdom on globalization and present a micro-based framework for analyzing globalization and working conditions in developing countries. Second, the authors apply this framework to five developing countries: Cambodia, El Salvador, Honduras, Indonesia, and Madagascar. This volume will be of interest to government policy makers, trade officials, and others working to expand the benefits of globalization to developing countries.

**Transnational Organized Crime in East Asia and the Pacific** ,2013 Human trafficking and smuggling of migrants: Four of the 12 illicit flows reviewed in this report involve human beings. The first two concern movement between the countries of the region, one for general labour and one for sexual exploitation. The third concerns the smuggling of migrants

from the region to the rich countries of the West, and the last focuses on migrants smuggled through the region from the poor and conflicted countries of South and Southwest Asia. Drug trafficking: The production and use of opiates has a long history in the region, but the main opiate problem in the 21st century involves the more refined form of the drug: heroin. In addition, methamphetamine has been a threat in parts of East Asia for decades (in the form of yaba tablets), but crystal methamphetamine has recently grown greatly in popularity. Virtually every country in the region has some crystal methamphetamine users, and some populations consume at very high levels. Resources: Resource-related crimes include those related to both extractive industries, such as the illegal harvesting of wildlife and timber, and other crimes that have a negative impact on the environment, such as the dumping of e-waste and the trade in ozone-depleting substances. In all cases, the threat goes beyond borders, jeopardizing the global environmental heritage. These are therefore crimes of inherent international significance, though they are frequently dealt with lightly under local legislation. Counterfeit goods: The trade in counterfeit goods is often perceived as a soft form of crime, but can have dangerous consequences for public health and safety. Fraudulent medicines in particular pose a threat to public health, and their use can foster the growth of treatment resistant pathogens.

**Competition Policy in the ASEAN Countries** G. Sivalingam,2005 This book is important from the public policy and foreign investment points of view and should be read by all who need to understand the competitive policies in the ASEAN Countries. As the author has rightly pointed out, the narrow capitalistic model to maximize profits even at the expense of income distribution, has been modified in ASEAN countries, to take into account the need for equity and distributive justice. The socio economic strategy has been essential, to promote political stability, without which there cannot be economic growth and development. The book argues impressively that competition policy cannot be unfettered, but has to be efficiently and compassionately managed, to ensure balanced business and steady socioeconomic development. Competitive policies have to follow the best interests of developing economies and not just the pressures and preferences of the capitalistic competitive policies of the highly developed industrial countries, that often ignore the different priorities of developing countries.

**Monitoring International Labor Standards** National Research Council,Policy and Global Affairs,Division of Behavioral and Social Sciences and Education,Center for Education,Committee on Monitoring International Labor Standards,2004-06-11 This new report provides a framework within which to assess compliance with core international labor standards and succeeds in taking an enormous step toward interpreting all relevant information into one central database. At the request of

the Bureau of International Labor Affairs at the U.S. Department of Labor, the National Research Council's Committee on Monitoring International Labor Standards was charged with identifying relevant and useful sources of country-level data, assessing the quality of such data, identifying innovative measures to monitor compliance, exploring the relationship between labor standards and human capital, and making recommendations on reporting procedures to monitor compliance. The result of the committee's work is in two parts—this report and a database structure. Together, they offer a first step toward the goal of providing an empirical foundation to monitor compliance with core labor standards. The report provides a comprehensive review of extant data sources, with emphasis on their relevance to defined labor standards, their utility to decision makers in charge of assessing or monitoring compliance, and the cautions necessary to understand and use the quantitative information.
