The Pandora Sequence Frank Herbert, Bill Ransom, 2013-03-06 All three novels in the New York Times-bestselling science fiction fantasy series about the survival of a human colony in the wake of AI. From Frank Herbert, the Hugo and Nebula Award-winning author of *Dune*, in collaboration with Bill Ransom, the bestselling series that began with *Destination Void*. *The Jesus Incident* opens as Ship, an artificial intelligence with godlike powers delivers the last survivors of humanity to a horrific, poisonous planet, Pandora—rife with deadly Nerve-Runners, Hooded Dashers, airborne jellyfish, and intelligent kelp. Chaplain and psychiatrist Raja Lon Flattery is brought back out of hibernation to witness Ship's machinations as well as the schemes of human scientists manipulating the genetic structure of humanity. *The Lazarus Effect* takes place centuries later. The descendants of humanity, split into Mermen and Islanders, must reunite . . . because Pandora's original owner is returning to life . . . The series concludes with *The Ascension Factor*. Pandora is now in the grip of the clone known as Director. The resistance's main hope is Crista Galli, believed by some to be the child of God, and the fight for Pandora spreads ever wider.

Herbert & Bill Ransom, sequels to Frank Herbert's *Destination: Void*. The Jesus Incident—A sentient Ship with godlike powers (and aspirations) delivers the last survivors of humanity to a horrific, poisonous planet, Pandora—rife with deadly Nerve-Runners, Hooded Dashers, airborne jellyfish, and intelligent kelp. Chaplain/Psychiatrist Raja Lon Flattery is brought back out of hybernation to witness Ship's machinations as well as the schemes of human scientists manipulating the genetic structure of humanity. Book 1 in Herbert & Ransom's Pandora Sequence. The Lazarus Effect—In The Jesus Incident Herbert and Ransom introduced Ship, an artificial intelligence that believed it was God, abandoning its unworthy human cargo on the all-sea world of Pandora. Now centuries have passed. The descendants of humanity, split into Mermen and Islanders, must reunite ... because Pandora's original owner is returning to life! Book 2 in Herbert & Ransom's Pandora Sequence. The Ascension Factor—Pandora's humans have been recovering land from its raging seas at an accelerated pace since The Lazarus Effect. The great kelp of the seas, sentient but electronically manipulated by humans, buffers Pandora's wild currents to restore land and facilitate the booming sea trade. New settlements rise overnight, but children starve in their shadows. An orbiting assembly station is near completion of Project Voidship, which is the hope of many for finding a better world. Pandora is under the fist of an ambitious clone from hibernation called The Director, who rules with a sadistic security force led by the assassin Spider Nevi. Small resistance groups, like the one led by Twisp Queets and Ben Ozette, have had little effect on his absolute power. The Director controls the transportation of foodstuffs; uprisings are punished with starvation. The resistance fighters' main hope is Crista Galli, a woman believed by some to be the child of God. Crista pools her talents with Dwarf MacIntosh, Beatriz Tatoosh, and Rico LaPush to transcend the barriers between the different species and overthrow The Director and the sinister cabal with which he rules. Book 3 in Herbert & Ransom's Pandora Sequence.

The Cambridge Companion to World Crime Fiction Jesper Gulddal, Stewart King, Alistair Rolls, 2022-04-21 Accessible yet comprehensive, this first systematic account of crime fiction across the globe offers a deep and thoroughly nuanced understanding of the genre's transnational history. Offering a lucid account of the major theoretical issues and comparative perspectives that constitute world crime fiction, this book introduces readers to the international crime fiction publishing industry, the translation and circulation of crime fiction, international crime fiction collections, the role of women in world crime fiction, and regional forms of crime fiction. It also illuminates the past and present of crime fiction in various supranational regions across the world, including East and South Asia, the Arab World, Sub-Saharan Africa, Europe and Scandinavia, as well as three spheres defined by a shared language, namely the Francophone, Lusophone, and Hispanic worlds. Thoroughly-researched and broad in scope, this book is as valuable for general readers as for undergraduate and postgraduate students of popular fiction and world literature.

The Lazarus Effect Ben Witherington III, Ann Witherington, 2008-09-15 Archaeologist Art West makes the discovery of a lifetime in Jerusalem finding the tombstone of Lazarus, which indicates that Jesus raised him from the dead. But before he

can make public his amazing discovery, the stone is stolen, sold to the British Library, and West is implicated in an antiquities fraud that will lead to a trial. West's Jewish and Muslim friends in Jerusalem rally to support West's innocence and to help find the thief who stole the stone, but then West is shot and in critical condition in a Jerusalem hospital. Can the truth be discovered in time, and West's life be saved? And what was on that Aramaic scroll that was found in Lazarus's coffin? In this fast-paced thriller, Ben Witherington, himself a NT scholar with a degree in English literature, together with his wife, Ann, introduces us to the life of an archaeologist and NT scholar and his trials and tribulations when a big find comes to light. Set in the always volatile city of Jerusalem, the Witheringtons reveal the fascinating hidden dimensions of multi-religious life in that Holy Place, and show how even today Christians, Jews, and Muslims can work together so the truth may come to light, and all may experience the Lazarus Effect--new life from the dead.

The History of Science Fiction Adam Roberts, 2016-08-04 This book is the definitive critical history of science fiction. The 2006 first edition of this work traced the development of the genre from Ancient Greece and the European Reformation through to the end of the 20th century. This new 2nd edition has been revised thoroughly and very significantly expanded. An all-new final chapter discusses 21st-century science fiction, and there is new material in every chapter: a wealth of new readings and original research. The author's groundbreaking thesis that science fiction is born out of the 17th-century Reformation is here bolstered with a wide range of new supporting material and many hundreds of 17th- and 18th-century science fiction texts, some of which have never been discussed before. The account of 19th-century science fiction has been expanded, and the various chapters tracing the twentieth-century bring in more writing by women, and science fiction in other media including cinema, TV, comics, fan-culture and other modes.

Women and Crime in Post-Transitional South African Crime Fiction Sabine Binder, 2020-11-16 In this ground-breaking study, Sabine Binder analyses the complex ways in which female crime fictional victims, detectives and perpetrators in South African crime fiction resonate with widespread and persistent real crimes against women in post-apartheid South Africa. Drawing on a wide range of crime novels written over the last decade, Binder emphasises the genre's feminist potential and critically maps its political work at the intersection of gender and race. Her study challenges the perception of crime fiction as a trivial genre and shows how, in South Africa at least, it provides a vibrant platform for social, cultural and ethical debates, exposing violence, misogyny and racism and shedding light on the problematics of law and justice for women faced with crime.

The Science Fiction Film in Contemporary Hollywood Evdokia Stefanopoulou, 2023-07-27 The Science Fiction Film in Contemporary Hollywood focuses on the American science fiction (SF) film during the period 2001-2020, in order to provide a theoretical mapping of the genre in the context of Conglomerate Hollywood. Using a social semiotics approach in a systematic corpus of films, the book argues that the SF film can be delineated by two semiotic squares -the first one

centering on the genre's more-than-human ontologies (SF bodies), and the second one focusing on its imaginative worlds (SF worlds). Based on this theoretical framework, the book examines the genre in six cycles, which are placed in their historical context, and are analyzed in relation to cultural discourses, such as technological embodiment, race, animal-human relations, environmentalism, global capitalism, and the techno-scientific Empire. By considering these cycles -which include superhero films, creature films, space operas, among others-as expressions of the genre's basic oppositions, the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem, offering a new perspective on the multiple articulations of the SF film in the new millennium.
