Behaviour for Learning Simon Ellis, Janet Tod, 2018-07-04 Behaviour for Learning offers teachers a clear conceptual framework for making sense of the many behaviour management strategies on offer, allowing them to make a critical assessment of their appropriateness and effectiveness in the classroom, and assisting them to promote closer links between 'behaviour' and 'learning'. Now in a fully updated second edition, the book focuses on how teachers can provide a safe and secure setting where positive relationships are fostered, placing increased emphasis on learning behaviours that contribute to pupils' cognitive, social and emotional development. The book is full of practical approaches that can help teachers support pupils to achieve, relate to others and develop behaviours that characterise self-esteem, confidence and resilience. It includes chapters covering: • relationship with the curriculum, relationship with self and relationship with others; • whole-school approaches and the school behaviour policy; • reframing special educational needs; • dealing with more challenging behaviour; • transitions. This second edition also includes an updated emphasis on the links between mental health, behaviour and relationships in schools, and reflects Department for Education advice for school staff, changes to the National Curriculum and the new SEND Code of Practice. Through the application of the Behaviour for Learning framework, the book encourages teachers to address the needs of pupils who exhibit behavioural difficulties, whilst still pursuing excellence in teaching and learning for all pupils. Our Social World Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2016-11-30 Inspire your students to develop their sociological imaginations in *Our Social World*. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate, and apply information about the social world; to see the connection between the world and personal events from a new perspective; and to confront sociological issues on a day-to-day basis. Organized around the Social World Model", a conceptual framework used across chapters to see the complex links between various micro- to macro-levels of the social system, students will develop the practice of using three levels of analysis, and to view sociology as an integrated whole, rather than a set of discrete subjects.

Our Social World: Condensed Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2017-06-26 *Our Social World: Introduction to Sociology, Condensed*, inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. The award-winning author team of Jeanne H. Ballantine, Keith A. Roberts, and Kathleen Odell Korgen organizes the text around the Social World

Model,” a conceptual framework that demonstrates the relationships among individuals (the micro level); organizations, institutions, and subcultures (the meso level); and societies and global structures (the macro level). The application of this model across chapters helps students practice using the three levels of analysis and view sociology as an integrated whole rather than a set of discrete subjects. The Fifth Edition of the Condensed version is adapted from *Our Social World: Introduction to Sociology* and is one-third shorter by streamlining boxes and the main narrative, and combining four chapters into two (Family/Education, and Politics/Economics). New and Key Features A new full-length chapter on health, illness, and healthcare has been added. Several chapters have been reorganized with updated data, added studies, and newly emerging emphases in sociology. Six new “Sociologists in Action” features added. Four new “Engaging Sociology” features added with new opportunities for data analysis by students. 100 new or updated Tables and Figures, nearly 500 new references, and dozens of older references removed. Many sentences and definitions in the book have been revised for brevity and clarity, and the glossary has been updated for better correspondence with the text. Links to exceptional teaching resources from A.S.A.’s TRAILS (Teaching Resources and Innovation Library for Sociology) available in SAGE coursepacks. MCAT Guide maps chapter content to Foundational Concepts and Content Categories in Section 3 of the MCAT test available in SAGE coursepacks.

Intercultural Communication Mai Nguyen-Phuong-Mai, 2025-10-01 This book is an introduction to Intercultural Communication (IC) that takes into account the much neglected dynamic paradigm of culture in the literature. It posits that

culture is not static, context is the driving force for change, and individuals can develop a multicultural mind. It is also the first IC textbook in the field that incorporates insight from evolutionary biology and the newly emerging discipline of cultural neurosciences. Such an interdisciplinary approach provides readers with new angles, encourages critical thinking, and sometimes challenges conventional knowledge in the field. The combination of the author's multicultural academic and journalistic background contributes to a balance of diverse perspectives and world views on cultural theories and discourses. The book is ideal for courses in Intercultural Communication with study cases, discussion topics and class activities.

EBOOK Lifestyle Medicine Garry Egger, 2015-03-06 Highly Commended in the British Medical Association book awards 2011!! Lifestyle Medicine 2nd Edition is the essential book for contemporary times. It concentrates largely on the contribution that can be made directly by the clinician at the personal level. The rise in obesity worldwide has focused attention on lifestyle as a prominent cause of disease. However, obesity is just one manifestation, albeit an obvious one, of lifestyle-related problems. Others include a range of health problems that have resulted from the environment and behaviours associated with our modern way of living. Inactivity, poor and over-nutrition, smoking, drug and alcohol abuse, inappropriate medication, stress, unsafe sexual behaviour, inadequate sleep, risk-taking and environmental exposure (for example, sun, chemicals and the built environment) are significant modern causes of disease. New and adaptive approaches to health management are needed to deal with these complex factors. Lifestyle Medicine 2e provides these tools to enable clinicians to successfully manage patients in our current environment.
