The Study of Orchestration Samuel Adler, 2016 Written by a renowned composer whose works have been performed by major orchestras around the world, *The Study of Orchestration* is the only text that explores the characteristics of orchestral instruments and shows students how a master composer approaches orchestration. The Fourth Edition invites students to experience the instruments through online audio and video recordings and now offers more coverage of writing for band. Access to the recordings is included with every new copy and is good for 360 days.

A Performer's Guide to Transcribing, Editing, and Arranging Early Music Alon Schab, 2022 A Performer's Guide to Transcribing, Editing, and Arranging Early Music provides instruction on three important tasks that early music performers often undertake in order to make their work more noticeable and appealing to their audiences. First, the book provides instruction on using early sources-manuscripts, prints, and treatises-in score, parts, or tablature. It then illuminates priorities behind basic editorial decisions-determining what constitutes a version of a musical piece, how to choose a version, and how to choose the source for that version. Lastly, the book offers advice about arranging both early and new music for early instruments, including how to consider instruments' ranges and various registers, how to exploit the unique characteristics of period instruments, and how to produce convincing textures of accompaniment. Drawing on methods based on early models (for example, how baroque composers arranged the music of their contemporaries), Alon Schab pays tribute to the ideas and ideals promoted by the pioneers of the early music revival and examines how these could be implemented in an early music field revolutionized by technology and unprecedented artistic independence.

Student Engagement in Neoliberal Times Nick Zepke, 2016-12-14 This book investigates origins, meanings, uses and effects of student engagement in higher education, and addresses three core questions: (1) Why is student engagement so visible in higher education today? (2) What are its dominant characteristics? (3) What is missing in the popular view of student engagement? These questions pave the way for a fresh approach to student engagement. The book argues that an elective affinity between student engagement and policies embedded in neoliberalism, the dominant ideology of the early 21st century, enables student engagement to transcend diverse intellectual and practice contexts. This affinity encourages quality learning and teaching that enables student to succeed in their studies and future careers. The book shows that focusing on neoliberal objectives for learning and teaching limits the potential of student engagement in higher education.

This conclusion leads to a critical and practical social-ecological perspective that approaches engagement more as a pathway to social justice than as a list of techniques. This book is a work of critical scholarship backed by empirical research. It questions accepted theories and practices and offers fresh insights into student engagement in higher education, including how engagement could promote social justice.

Advances in Geospatial Technologies for Natural Resource Management Ravi Shankar Dwivedi, 2024-11-19 Timely and reliable information on natural resources, regarding their potential and limitations, is a prerequisite for sustainable development. Geospatial technologies offer immense potential in providing such information in a timely and cost-effective manner. Using orbital sensors data in conjunction with airborne and proximal sensors data to generate information on soils

and agricultural resources, forests, mineral resources, fossil fuel, wetlands, water resources, and marine resources, this book focuses on the advancements in technologies applicable to managing these resources. It addresses global issues like climate change and land degradation neutrality and introduces spatial data infrastructure (SDI) as a mechanism for sharing geospatial data. This book also provides an in-depth discussion on drones, crowdsourcing, cloud computing, Internet of Things, machine learning, and their applications. FEATURES Contains a comprehensive resource on the latest developments in geospatial technologies and their use in monitoring natural resources, productivity mapping, and modeling Explains the geo-computation methods and online algorithm developments Includes clear guidance on how best to use geospatial data for various applications Discusses case studies from a variety of fields and current trends in the management of natural resources Provides future scenarios concerning platforms, sensors, data analysis, and interpretation techniques This book is written for remote sensing and GIS professionals in environmental institutions and government who are involved in natural resource management projects. Senior undergraduate and graduate-level students in Earth sciences, geography, or environmental management can also use this text for supplementary reading.

Artificial Intelligence in Education Myint Swe Khine, 2024-10-30 This comprehensive volume explores the possibilities, challenges and ethical considerations of Artificial Intelligence (AI) in education through a machine-generated literature review that examines emerging research trends and findings. Each chapter presents summaries of pre-defined topics and includes a human-written introduction by the book editor. It covers critical areas such as educational data mining, learning analytics, personalised learning, adaptive assessment, intelligent tutoring systems, as well as the ethical challenges of AI in education. This volume provides valuable insights for educators, researchers, policymakers and students seeking to understand the transformative potential of AI in education. It serves as a reference point for navigating the evolving landscape of AI-assisted learning and offers a glimpse into the future of education in an AI-driven world. The auto-summaries were generated by a recursive clustering algorithm using the Dimensions Auto-summariser from Digital Science. The editor of this book selected the SN content to be auto-summarised and decided the order of appearance. Please note that these are extractive auto-summaries, consisting of original sentences, but are not representative of the original paper, as we do not show the full length of the publication. Please note that only published SN content is represented here and that machine-generated books are still at an experimental stage.
