Handbook of Arabic Literacy Elinor Saiegh-Haddad,R. Malatesha Joshi,2014-04-03 This book provides a synopsis of recently published empirical research into the acquisition of reading and writing in Arabic. Its particular focus is on the interplay between the linguistic and orthographic structure of Arabic and the development of reading and writing/spelling. In addition, the book addresses the socio-cultural, political and educational milieu in which Arabic literacy is embedded. It enables readers to appreciate both the implications of empirical research to literacy enhancement and the challenges and limitations to the applicability of such insights in the Arabic language and literacy context. The book will advance the understanding of the full context of literacy acquisition in Arabic with the very many factors (religious, historical, linguistic etc.) that interact and will hence contribute to weakening the anglocentricity that dominates discussions of this topic.

Crash Course in Children's Services Penny Peck,2014-09-26 Useful for newcomers to the children's library staff as well

as longtime children's librarians, the second edition of this popular handbook provides easy-to-follow instructions to make innovations in children's library materials work for you. Addressing everything from the basics of reference to the complex and highly specialized duties of program development, this handbook is perfect for both librarians and support staff who are assigned to the children's department of a library. This second addition of Crash Course in Children's Services covers many of the new issues facing children's library staff, including eBooks, using apps in programming, other online reading options, book trailers, nonfiction and the Common Core curriculum. It also describes expanded programming options such as makerspaces, gaming, dog reading programs, and play at storytime. Ideal for new children's librarians as well as experienced library staff who have not worked with children recently and long-time children's librarians looking to add new skills to their tool kits, the book familiarizes readers with all the new developments of the past few years, from online reading options to the wealth of new programming aimed at youth. You'll learn about subjects such as pop-up and passive programming, offering online homework help, and outreach and services to special needs children, and then quickly implement new practices into use at your library.
