Understanding Digital Black and White Photography Tim Savage,2016-08-31 Black and white photography can deliver images with levels of beauty and impact that are sometimes lost or diluted by the presence of colour. This practical book is written for readers with a passion for monochrome photography, who wish to use digital photography to match and exceed the level of control and finish that was possible with film. With visual examples throughout, it systematically teaches skills that underpin photographic creativity, from capture to digital development, before considering a range of outputs and finishes. Contents include: photographic equipment, camera settings, exposure parameters and file composition (bit depth, colour space resolution); editing software, notably the key features of Lightroom and Photoshop dedicated to black and white photography; using HDR techniques to maximise tonal information while recreating Ansel Adam's analogue Zone System approach using digital technologies; simulating traditional darkroom techniques by emulating the appearance and characteristics of popular films, toning techniques, adding edges, borders and dodging and burning; outputting monochrome photographs for publication online, social media, screen, projection and high quality archival prints suited to exhibitions. This book will help the reader understand the principles of digital black and white photography to create powerful images with the quality of traditional darkroom practices, and is aimed at all photographers - particularly artistic. Fully illustrated with 291 images - many are black & white with a few colour to demonstrate the loss of impact that colour can have.

Exploring Black and White Photography Arnold Gassan,A. J. Meek,1993 Text deals only with black-and-white photography--the technical controls, the camera controls, the exposing & developing of film and much more.

Ground Sea Hilde Van Gelder,2021-09-15 Imagine a world in which each individual has a fundamental right to be reborn. This idle dream haunts Hilde Van Gelder's associative travelogue that takes Allan Sekula's sequence *Deep Six / Passer au bleu* (1996/1998) as a touchstone for a dialogue with more recent artworks zooming in on the borderscape near the Channel Tunnel, such as those by Sylvain George and Bruno Serralongue. Combining ethnography, visual materials, political philosophy, cultural geography, and critical analysis, *Ground Sea* proceeds through an innovative methodological approach.

Inspired by the meandering writings of W.G. Sebald, Javier Marías, and Roland Barthes, Van Gelder develops a style both interdisciplinary and personal. Resolutely opting for an aquatic perspective, *Ground Sea* offers a powerful meditation on the indifference of an increasingly divided European Union with regard to considerable numbers of persons on the move, who find themselves stranded close to Calais. The contested Strait of Dover becomes a microcosm where our present global challenges of migration, climate change, human rights, and neoliberal surveillance technology converge. Basics Photography 06: Working in Black & White David Präkel, 2008-12 Provides a comprehensive guide to the basic theory and practice of black and white photography, from the relationship between colour and greyscale tones to the art of seeing in black and white. Black and white, the book argues, has been the soul and conscience of photography since its conception. Black and white is not a lesser colour image - it is, in many ways, more powerful. It gets to the core of what is important in an image, leaving behind the distractions of colour.

Minor Photography Mieke Bleyen, 2012 The first book to apply the concept of the 'minor' to the theory of photography. The notion of the minor, developed by Gilles Deleuze and Félix Guattari in *Kafka, Towards a minor literature* (1975), is introduced and connected applied here for the very first time to the field of photography theory. Deleuze and Guattari defined minor literature in terms of deterritorialization, politicization and collectivization. By transferring 'the minor' to the medium of photography, this book enlarges the idea of 'the minor' and opens it up to all kinds of mutations in the process. The essays gathered in this book discuss the ways in which photography can make the dominant codes of representation stammer and how it can produce new effects and address people yet to come. The authors consider 'the minor' as a valuable tool to help photography research move beyond, or in between, binary and hierarchized ways of thinking (of high and low art, for example, or centre and periphery). As such, it aims to contribute to a rethinking of photography as multiplicity and variation. Consequently, the term is connected with both marginal and canonical photographic practices, covering photographers as different as Miroslav Tichy, Paul McCarthy, Tacita Dean, Dan Graham, and Paul Nougé. After developing a theory of the minor, this book explores how the operations of the minor can be found in major art practices. It closes by tackling the question of photography as variation in case studies of belated forms of surrealist photography. This publication is GPRC-labeled (Guaranteed Peer-Reviewed Content).

Project Zero Frameworks for Early Childhood Education: Project Spectrum : early learning activities Howard Gardner, David Henry Feldman, Mara Krechevsky, Jie-Qi Chen, 1998-11-13 The groundbreaking work of Harvard University psychologist Howard Gardner on multiple intelligences and Tufts University psychologist David Henry Feldman on nonuniversal development is fast becoming the standard by which children's intelligence and cognitive development is understood. In this landmark three-volume set, Mara Krechevsky and her colleagues at Project Zero make these insights

available for both teachers and scholars alike. This curriculum resource provides enriching activities in a wide variety of disciplines, including mechanics and construction, movement, and music.

Perceptions of Female Offenders, Vol. 2 Brenda Russell, Celia Torres, 2023-11-27 This new edition is a nuanced exploration of female involvement in various crimes—from delinquency, domestic violence, sexual assault and homicide—that resonates with the pulse of contemporary society. In an age where many events are tweeted and debated online, this book delves into the intricate ways social media portrays female offenders and how this can distort public perceptions and effect legal outcomes. Volume two includes recent research and theory examining how female perpetration is intricately related to gender roles that persist within the criminal justice system and often lead to gender disparities in treatment, criminal justice response, and sentencing and calls into question long-held beliefs and systems that might not be as impartial as they appear. The compelling nature of this volume addresses the complex relationship between trauma and offending and examines crucial subjects like partner violence homicide and the unique challenges faced by trans-women within the criminal justice system, and examines the myths associated with female offending and how that bleeds into criminal justice response. It addresses theories that provide insight into female offending and sentencing and offers ways to generate gender inclusiveness. This volume invites researchers, practitioners, and advocates for justice to join a vital conversation and develop a more informed and equitable criminal justice response.
