Structural Studies, Repairs and Maintenance of Heritage Architecture XV C.A. Brebbia,V. Echarri,2017-08-15

Comprising papers presented at the 15th International Conference on Studies, Repairs and Maintenance of Heritage Architecture this volume brings together global contributions from scientists, architects, engineers and restoration experts dealing with different aspects of heritage buildings, including the preservation of architectural heritage. The importance of retaining the built cultural heritage cannot be overemphasised. Rapid development and the inappropriate conservation techniques are threatening many built cultural heritage unique sites in different parts of the world. This current volume covers a wide range of topics related to the historical aspects and the reuse of heritage buildings, as well as technical issues on the structural integrity of different types of buildings, such as those constructed with materials as varied as iron and steel, concrete, masonry, wood or earth. Material characterisation techniques are also addressed, including non-destructive tests via computer simulation. Modern computer simulation can provide accurate results demonstrating the stress state of the building and possible failure mechanisms affecting its stability. The included papers focus on such topics as: Heritage architecture and historical aspects; Learning from the past; Surveying and monitoring; Modern (19th/20th century) heritage; Ports and coastal heritage; Heritage masonry structures; Wooden structures; New technologies and materials; Corrosion and material decay; Seismic vulnerability and retrofit; Re-use of heritage buildings; Heritage and tourism; Conservation policies; Guidelines, codes and regulations for heritage; Heritage management; Defence, Industrial and Transportation heritage; Social, cultural and economic aspects; Adaptability and accessibility; Monitoring and damage detection; Vernacular architecture.

Building Back Better Michal Lyons,Theo Schilderman,Camillo Boano,2010 This book asks whether large-scale reconstruction can be participatory and developmental; can rebuilding be truly people-centred, contributing to breaking the cycle of poverty and dependence? Can reconstruction reduce people's vulnerability to disasters and other shocks?

Terra 2022 Leslie Rainer,Luis Fernando Guerrero Baca,Frank Matero,Lauren Meyer,2025-04-22 Featuring a global compendium of sites, buildings, urban settlements, and cultural landscapes, this volume combines recent research with practical approaches to conservation of earthen architectural heritage. Earthen architecture is one of the oldest forms of construction and is evidenced around the globe. This volume gathers the research and presentations from Terra 2022: 13th World Congress on Earthen Architectural Heritage, which brought together in Santa Fe, New Mexico, 350 conservation professionals and practitioners from fifty-two countries. Seventy richly illustrated papers, fifty-seven in English and thirteen in Spanish, address a range of conservation issues. Abstracts are provided in both English and Spanish for each paper. Themes covered include advances in research, strategies for archaeological sites, community-based care and decision-making, cultural landscapes, decorated surfaces, education, historic and modern buildings, conservation history, risks and vulnerabilities, and traditional materials and practices. Sections that draw on symposia held at the congress spotlight two recent architectural heritage initiatives: the rehabilitation of an urban settlement by the AlUla Old Town and Oasis Conservation Project in Saudi Arabia, and the conservation and management of eight monumental enclosure complexes at the Hopewell Ceremonial Earthworks in Ohio.
