Jesse Lynch Williams, Edwin Mark Norris

Death in Yellowstone Lee H. Whittlesey, 1995 Intriguing stories of how people have died in Yellowstone warn about the many dangers that exist there and in wild areas in general.

Summary of Lee H. Whittlesey's Death in Yellowstone Everest Media, 2022-07-16T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 In July 1981, David Allen Kirwan, 24, of La Canada, California, and his friend Ronald Ratliff, 25, of Thousand Oaks, parked their truck at Yellowstone's Fountain Paint Pot parking lot. While they looked at the hot springs, Ratliff's dog Moosie escaped and jumped into nearby Celestine Pool. Kirwan went into the pool to save the dog. #2 The idea of being boiled to death in a hot spring is a truly terrifying one for any rational person. However, this has happened more frequently in Yellowstone National Park than it has with grizzly bears. #3 The number of tourists in Yellowstone Park increased as it became more accessible, and so did the chances of visitor injury. In 1882, a traveler named Walter Watson fell into a long and deep geyser tube, while accompanied by three other men, who gave him up for dead and left. #4 In the 1880s, hot-spring injuries began to occur in greater numbers as visitors to Yellowstone increased. A Mr. Crossman was scalded in the Fountain Paintpot in 1884, a young boy in the same summer who convalesced at Marshall's Hotel, and another man in the Artists' Paintpots in 1888.

Wonderlandscape John Clayton, 2017-08-08 Yellowstone is America's premier national park. Today is often a byword for conservation, natural beauty, and a way for everyone to enjoy the great outdoors. But it was not always this way. Wonderlandscape presents a new perspective on Yellowstone, the emotions various natural wonders and attractions evoke, and how this explains the park's relationship to America as a whole. Whether it is artists or naturalists, entrepreneurs or pop-culture icons, each character in the story of Yellowstone ends up reflecting and redefining the park for the values of its era. For example, when Ernest Thompson Seton wanted to observe bears in 1897, his adventures highlighted the way the park transformed from a set of geological oddities to a wildlife sanctuary, reflecting a nation was concerned about disappearing

populations of bison and other species. Subsequent eras added Rooseveltian masculinity, ecosystem science, and artistic inspiration as core Yellowstone hallmarks. As the National Park system enters its second century, Wonderlandscape allows us to reflect on the values and heritage that Yellowstone alone has come to represent—how it will shape the America's relationship with her land for generations to come.

Sacred Landscapes Sam Gennawey, 2025-05-20 Sacred Landscapes chronicles Sam Gennawey's remarkable six-year, 175,000-mile, van-life journey exploring over 380 sacred locations preserved by the United States National Park Service. These remarkable parks showcase the best of America—the stunning beauty of nature, historic sites of great significance, and the stories of inspirational people who have left lasting impressions. The National Park Service sites also serve as reminders of the country's darker moments, including slavery, the Civil War, the attempted Indigenous genocide, Japanese concentration camps, and other tragedies. Sam Gennawey, a former urban planner and noted theme park historian, delves into crucial questions about “we the people” of the United States, reflecting on his experiences as he undertakes this journey through America's national memory. He even volunteers in many parks along the way to gain a deeper understanding of their significance and fuller appreciation for how park rangers have carefully and creatively managed the environment to highlight their stories. Combining travel experiences, insightful commentary, historical accounts, self-reflection, and practical tips for van life, Sacred Landscapes will inspire exploration, encouraging readers to visit and appreciate America's national parks' diverse and rich heritage. Take the journey of a lifetime with Sam Gennawey to learn the secrets of a park you thought you knew, or find a new one to explore.

Storytelling in Yellowstone Lee H. Whittlesey, 2007 Whittlesey shares tales of the great Geyserland as told by the earliest tour guides of America's first and most unique national park.

Engineering Eden Jordan Fisher Smith, 2016-06-07 The fascinating story of a trial that opened a window onto the century-long battle to control nature in the national parks. When twenty-five-year-old Harry Walker was killed by a bear in Yellowstone Park in 1972, the civil trial prompted by his death became a proxy for bigger questions about American wilderness management that had been boiling for a century. At immediate issue was whether the Park Service should have done more to keep bears away from humans, but what was revealed as the trial unfolded was just how fruitless our efforts to regulate nature in the parks had always been. The proceedings drew to the witness stand some of the most important figures

in twentieth century wilderness management, including the eminent zoologist A. Starker Leopold, who had produced a landmark conservationist document in the 1950s, and all-American twin researchers John and Frank Craighead, who ran groundbreaking bear studies at Yellowstone. Their testimony would help decide whether the government owed the Walker family restitution for Harry's death, but it would also illuminate decades of patchwork efforts to preserve an idea of nature that had never existed in the first place. In this remarkable excavation of American environmental history, nature writer and former park ranger Jordan Fisher Smith uses Harry Walker's story to tell the larger narrative of the futile, sometimes fatal, attempts to remake wilderness in the name of preserving it. Tracing a course from the founding of the national parks through the tangled twentieth-century growth of the conservationist movement, Smith gives the lie to the portrayal of national parks as Edenic wonderlands unspoiled until the arrival of Europeans, and shows how virtually every attempt to manage nature in the parks has only created cascading effects that require even more management. Moving across time and between Yellowstone, Yosemite, and Glacier national parks, *Engineering Eden* shows how efforts at wilderness management have always been undone by one fundamental problem--that the idea of what is wild dissolves as soon as we begin to examine it, leaving us with little framework to say what wilderness should look like and which human interventions are acceptable in trying to preserve it. In the tradition of John McPhee's *The Control of Nature* and Alan Burdick's *Out of Eden*, Jordan Fisher Smith has produced a powerful work of popular science and environmental history, grappling with critical issues that we have even now yet to resolve.
