

Diseño Curricular Primaria Buenos Aires

Argentina. Congreso de la Nación. Cámara de Diputados de la Nación. Secretaría Parlamentaria. Mesa de Entradas

Enseñar matemática, 2006 Aquí se presentan propuestas variadas para la enseñanza de la matemática en la educación infantil, con sugerencias de juegos, recursos y secuencias de trabajo. Se desarrollan, desde la acción, aquellos contenidos de la disciplina que en los marcos teóricos vigentes son considerados como los más apropiados para abordar en este nivel educativo. La antigua discusión acerca de la pertinencia -o no- del uso del material concreto, la geometría desde edades tempranas y las secuencias didácticas para abordar contenidos, son algunos de los temas desarrollados. La obra profundiza sobre el día a día de la clase de matemática: conocimientos matemáticos previos, la conformación de los grupos de trabajo, las relaciones entre el abordaje de la matemática y las unidades didácticas. Se analiza la articulación entre el nivel y el primer ciclo de la educación primaria, proponiendo criterios para la continuidad. No están ausentes la fuerza de lo lúdico y la vivencia emocional que caracteriza a los primeros aprendizajes. Se reflexiona acerca de la evaluación de los aprendizajes significativos en el nivel inicial y se proponen ideas para llevarla adelante.

Digesto municipal de la ciudad de Buenos Aires Buenos Aires (Argentina), 1993

International Handbook of Curriculum Research William F. Pinar, 2013-10-15 Continuing its calling to define the field and where it is going, the Second Edition of this landmark handbook brings up to date its comprehensive reportage of scholarly developments and school curriculum initiatives worldwide, providing a panoramic view of the state of curriculum studies globally. Its international scope and currency and range of research and theory reflect and contribute significantly to the ongoing internationalization of curriculum studies and its growth as a field worldwide. Changes in the Second Edition: Five new or updated introductory chapters pose transnational challenges to key questions curriculum research addresses locally. Countries absent in the First Edition are represented: Chile, Colombia, Cyprus, Ethiopia, Germany, Iran, Luxembourg, Nigeria, Peru, Poland, Portugal, Singapore, South Africa, Spain, and Switzerland. 39 new or updated chapters on curriculum research in 34 countries highlight curriculum research that is not widely known in North America. This handbook is an indispensable resource for prospective and practicing teachers, for curriculum studies scholars, and for education students around the world.

The Common European Framework of Reference Michael Byram, Lynne Parmenter, 2012-06-06 The Common European Framework of Reference for Languages was published a decade ago and has been influential ever since, not only in its European 'home' but throughout the world. This book traces the processes of the influence by inviting authors from universities and ministries in 11 countries to describe and explain what happened in their case. There are everyday factors of curriculum development - which sometimes include coincidence and happenstance - and there are also traditions of resistance or acceptance of external influences in policy-making. Such factors have always existed in bilateral borrowing from one country to another but the CEFR is a supra-national document accessible through globalised communication. The book is thus not only focused on matters of language education but is also a Comparative Education case-study of policy borrowing under new conditions.

La reflexión sobre la práctica del docente de Ciencias Naturales. Fundamentos teóricos y actividades didácticas para profesores y alumnos. María Ruina, 2022-03-02 La teoría en sí misma no transforma el mundo. Puede contribuir para su transformación, pero para eso tiene que salirse de sí misma y tiene que ser asimilada y reelaborada por aquellos que van a causar con sus acciones reales y efectivas esa transformación¹. (Paulo Freire, 1970) Indudablemente, el ejercicio de una actitud crítica y fundamentada durante la formación del profesorado brinda mejores oportunidades a los futuros docentes para afrontar los retos que propone la sociedad actual. En este sentido, adherimos fuertemente a la postura de Giroux (citado por Da Silva, 2001) cuando concibe al docente como un intelectual transformador, esto es, alguien que no se conduce como un técnico o un burócrata, sino como una persona comprometida, crítica y cuestionadora frente a los temas que tienen que ver con la enseñanza de su disciplina/área. Sin embargo, en la realidad existe una gran distancia entre esta postura y lo que llevan a cabo los docentes en sus clases. Antonio Gutiérrez (2009) asevera que, en la actualidad, los modelos didácticos predominantes en las clases de Ciencias Naturales, se corresponden con las perspectivas más tradicionales de la enseñanza, que ponen el acento en la adquisición del vocabulario científico. En forma paralela, durante la formación docente se prioriza el dominio del conocimiento propio de las disciplinas, que, en el caso de las Ciencias Naturales, son los que corresponden a la Biología, la Física y la Química y en menor grado, los vinculados con las Ciencias de la Tierra. Dentro de este encuadre los saberes didácticos, metodológicos, epistemológicos, históricos, etc. quedan relegados a un segundo plano. Consecuentemente, disminuyen también las posibilidades de reflexionar sobre sus propias prácticas y de pensar en maneras de superarlas. El autor plantea la necesidad de brindar espacios para que los futuros docentes puedan tomar decisiones frente a los problemas que plantean las situaciones particulares de su práctica a efectos de contribuir al desarrollo de su autonomía. A partir de este punto de vista, propone la siguiente definición para referirse a lo que significa enseñar: Enseñar constituye un complejo proceso de ponderación de situaciones concretas de trabajo y de toma de decisiones en torno a las mejores estrategias que posibiliten, en esas situaciones concretas, que los alumnos se apropien de los contenidos propuestos

en el curriculum escolar (Gutiérrez, 2009, p.141) Coincidimos plenamente con el autor cuando afirma que ser experto en una disciplina no equivale a ser experto en su enseñanza (p.141). Desde esta perspectiva cabe plantearse qué es lo que un docente de ciencias debería aprender durante su formación inicial y continua. Desde nuestra experiencia y atendiendo a las múltiples publicaciones referidas a esta cuestión, estimamos que en las planificaciones del profesor que se desempeña tanto en el Nivel Superior cuanto en las instancias de formación continua (capacitación/actualización docente) deberían estar presentes, entre otros, los siguientes tópicos: el conocimiento específico sobre el área curricular y sus vinculaciones con otros campos de conocimiento, la enseñanza de una imagen de la ciencia influida por la Tecnología, el contexto social, religioso, económico, político, etc., los fundamentos de la Didáctica general y específica para argumentar su práctica, la resolución de problemas vinculados con el mundo real, el abordaje de los contenidos desde una organización interdisciplinaria o interareal y el desarrollo de habilidades para comunicarse en ambientes laborales crecientemente tecnificados.

Educación Física Escolar Temario de Oposiciones ,1990

Ciencias Sociales ,

Articulación entre niveles (60) Delia R. Azzerboni,2005 ¡Están en la sala de cinco! Son los más grandes del jardín. Hace dos o tres años, llegaban con chupetes y pañales. Ahora llevan en su mochila lápices y un cuaderno en el que escriben su nombre. Y comienzan a pensar en el pasaje a primer grado. Ellos y sus familias transitan ese camino en el que se entremezclan expectativas, temores, ilusiones. El temor a lo nuevo, la nostalgia por aquello que termina y la alegría de crecer y aprender. A veces, el pasaje se produce en la misma escuela, otras implica un cambio de institución, y entonces cambian los lugares conocidos, los rituales, las personas. Habrá que diseñar entonces formas para articular el cierre de una etapa con un nuevo comienzo. Los maestros y los directores, y las instituciones, vienen pensando ideas para acompañar ese pasaje. En este volumen, un grupo de especialistas propone distintos puntos de vista para facilitar la transición. Desde la literatura, tienen lugar las propuestas para construir auténticos lectores de textos literarios en estos años cruciales. Se analizan continuidades en el camino de la alfabetización, y en el aprendizaje de la lengua escrita, área que adquiere indudable protagonismo en la escuela primaria / básica. Desde las ciencias sociales y las ciencias naturales, se sugieren proyectos de trabajo en los que se pueden articular contenidos. También se sugieren algunas ideas desde los contenidos de la matemática y en las disciplinas relacionadas con el arte, como música, plástica y expresión corporal. A través de propuestas didácticas, proyectos de trabajo, reflexiones sobre los contenidos y sobre las prácticas, queda planteado un panorama variado, donde se pueden encontrar ideas y sugerencias para atravesar este camino. --Descripción del editor.
