The second edition of this successful and comprehensive overview of bakery science is revised and expanded, featuring chapters on various bread and non-bread products from around the world, as well as nutrition and packaging, processing, quality control, global bread varieties and other popular bakery products. Salute! -- Wanda Tornabene, from the Introduction Four years after winning the 1997 James Beard Award for Best Italian Cookbook, Wanda Tornabene and her daughter, Giovanna, return with a glorious second helping of homestyle recipes. *Sicilian Home Cooking* offers more charming stories and rustic, delicious dishes from the kitchen of Gangivecchio, the Tornabenes magnificent thirteenth-century abbey in Sicily's Madonie Mountains. As in the award-winning *La Cucina Siciliana di*

Gangivecchio, here you'll find a wonderful array of simple, mouthwatering recipes for antipasti, soups, pasta, rice, meat, fish, vegetables, salads, and desserts including easy and delicious variations on bruschetta, the hearty Fagioli e Festoncini di Nonna Elena (Granny Elena's Bean and Pasta Soup), enticing entrees like Cotolette di Vitello di Wanda (Wanda's Veal Cutlets) and Gamberi in Crosta alla Gangivecchio (Gangivecchio's Shrimp en Crouete), and sublime desserts like Cartocci (Fried Pastry Coils with Ricotta Cream) and Gelo di Caffè (Coffee Gelatine). Sicilian Home Cooking also offers some tempting new sections. Egg Dishes showcases this essential ingredient in beautiful frittatas. Pizza and Focaccia is a salute to these most Italian of breads, adorned with fresh toppings. The section on couscous teaches the traditional method for this Arab speciality, which Sicilians have adopted as their own. Wines and Liqueurs gives recipes for homemade, refreshing libations, including the Italian favorite, Limoncello. The homestyle recipes are nothing short of fantastic; but what makes this book even more special is that Wanda and Giovanna welcome you not only into their kitchen but also into their lives at Gangivecchio. In stories rich with the fragrant atmosphere of the gorgeous Sicilian countryside, they share memories of the annual grape harvest, a special Christmas snowstorm, and an illicit childhood trip on a commercial fishing boat. They describe favorite local restaurants and dishes from the past and the present. And they tell funny and touching stories of relatives, friends, and pets; both old and new. Sicilian Home Cooking is a cookbook and much more; a true slice of Sicilian life.

Local Mediterranean Food Plants and Nutraceuticals Michael Heinrich, Walter Erhard Müller, Claudio Galli, 2006-01-01 As a result of domestication - considered to be the most important cultural development of the past 13,000 years of human history - we depend today on a tiny number of domesticated plant and animal species for our food supply. Nevertheless, people continue to gather food which grows around their homes or they cultivate local varieties of food plants (as well as keep land races of domestic animals). Generally, wild varieties tend to be richer in micronutrients and bioactive secondary metabolites, which are produced in adaptation to local environmental conditions. These metabolites trigger further adaptive responses by producing 'protective', bioactive compounds which, when ingested, result in the transfer of protective effects to our organism. The preservation of local knowledge for future generations as well as the identification of new nutraceuticals by means of characterizing plant extracts with potential health beneficial effects are the main objectives of this book. The first part therefore focuses on the ethnobotanical study of local food plants in selected regions of the Mediterranean, i.e. their use as well as beliefs and cultural practices associated with it. The biological-pharmacological effects of these plants on selected (mostly in vitro) targets of the central nervous system and the cardiovascular system make up the second part, highlighting the potential of these plants for developing novel health foods, herbal medicines or local products with beneficial effects on health. Those interested in an integrated approach to the identification of new and health beneficial foods will undoubtedly find this book a valuable source of information and an inspiration for new scientific approaches to this age-old topic.
