The Layered Landscape of Higher Education Margaret Kumar, Supriya Pattanayak, Nish Belford, 2024-08-02 This edited collection interrogates notions of curriculum, inclusivity, diversity, and cultures of learning in higher education from a variety of cultural backgrounds and educational perspectives. Bringing together an international selection of contributors from a range of disciplines, this book presents different avenues for rethinking the foundational base of cultures of learning while emphasising the importance of interculturality. The crux of the book lies in the fact that the contributors, living through complex cultures, speak/write from their own experiences of seeing, knowing, and doing. Through insights presented by the authors, the book promotes a broadened and deeper understanding of teaching and learning across diverse fields, including alternative knowledge, creative arts, education, technology, STEM, study skills, and environmental sustainability. Arguing for the need to review curriculum issues and policies at both an institutional and national level, it highlights the importance of creating collaborative spaces for constructing new and alternative scholarship and methods within higher education. Supported by case studies and examples of teaching practice, the text reveals the current state of educational and cultural changes and challenges for students and educators in higher education while looking towards the future. This book is a requisite text for academics, researchers, policymakers, support staff, and postgraduate students in higher education.

**A Principled Approach to Language Assessment** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Foreign Language Assessment for the U.S. Foreign Service Institute, 2020-08-19 The United States is formally represented around the world by approximately 14,000 Foreign Service officers and other personnel in the U.S. Department of State. Roughly one-third of them are required to be proficient in the local languages of the countries to which they are posted. To achieve this language proficiency for its staff, the State Department's Foreign Service Institute (FSI) provides intensive language instruction and assesses the proficiency of personnel before they are posted to a foreign country. The requirement for language proficiency is established in law and is incorporated in personnel decisions related to job placement, promotion, retention, and pay. *A Principled Approach to Language Assessment: Considerations for the U.S. Foreign Service Institute* evaluates the different approaches that exist to assess foreign language proficiency that FSI could potentially use. This report considers the key assessment approaches in the research literature that are appropriate for language testing, including, but not limited to, assessments that use task-based or performance-based approaches, adaptive online test administration, and portfolios.

**Local Language Testing** Slobodanka Dimova, Xun Yan, April Ginther, 2020-02-20 *Local Language Testing: Design, Implementation, and Development* describes the language testing practice that exists in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in the language testing and assessment literature. Covering both theory and practice, the book focuses on the advantages of local tests, fosters and encourages their use, and provides suggested ideas for their development and maintenance. The authors include examples of operational tests with well-proven track records and discuss: the ability of local tests to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and research; local testing practices grounded in the theoretical principles of language testing, drawing from experiences with local testing and providing practical examples of local language tests, illustrating how they can be designed to effectively function within and across different institutional contexts; examples of how local language tests and assessments are developed for use within a specific context and how they serve a variety of purposes (e.g., entry-level proficiency testing, placement testing, international teaching assistant testing, writing assessment, and program evaluation). Aimed at language program directors, graduate students, and researchers involved in language program development and evaluation, this is a timely book in that it focuses on the advantages of local tests, fosters and encourages their use, and outlines their development and maintenance. It constitutes essential reading for language program directors, graduate students, and

researchers involved in language program development and evaluation.

**Testing Academic Language Proficiency** Marco Mezzadri, 2017 This book focuses on the development of the process of teaching and assessing foreign language competence for study purposes in a pluricultural and plurilingual context. It addresses not only the individual who is learning the language for academic purposes (LAP), but also other stakeholders, like teachers, schools and universities, and external boards, such as examination boards for language testing. The book highlights an ongoing research project at the University of Parma, Italy, aimed at developing teaching programs and evaluative tools for language for academic purposes. Starting from a reflection upon the nature of language for study purposes stemming from the tradition of English for Academic Purposes, it describes the model of an LAP test implemented in Italian secondary schools and universities, and shows the findings concerning the performance in the test of both students whose mother tongue is Indo-European and those who speak non-Indo-European languages.

*Challenges in Language Testing Around the World* Betty Lantagne, Christine Coombe, James Dean Brown, 2021-04-01 This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

**Testing in Language Programs** James Dean Brown, 2014-03-15 Testing in Language Programs is a textbook for graduate and undergraduate teacher training courses in language testing and assessment. Ideal for both classroom and personal reference, this book targets the needs of those making both program-level decisions (admissions, proficiency, and placement) as well as classroom-level decisions (e.g., assessing what students have learned through diagnostic and achievement testing).

*Practical Language Testing* Glenn Fulcher, 2013-11-26 Practical Language Testing equips you with the skills, knowledge and principles necessary to understand and construct language tests. This intensely practical book gives guidelines on the design of assessments within the classroom, and provides the necessary tools to analyse and improve assessments, as well as

deal with alignment to externally imposed standards. Testing is situated both within the classroom and within the larger social context, and readers are provided the knowledge necessary to make realistic and fair decisions about the use and implementation of tests. The book explains the normative role of large scale testing and provides alternatives that the reader can adapt to their own context. This fulfils the dual purpose of providing the reader with the knowledge they need to prepare learners for tests, and the practical skills for using assessment for learning. Practical Language Testing is the ideal introduction for students of applied linguistics, TESOL and modern foreign language teaching as well as practicing teachers required to design or implement language testing programmes. The book is supported by frequently updated online resources at <http://language-testing.info/> including sets of scenarios providing resources to study aviation English assessment, call centre assessment, military language assessment, and medical language assessment. The materials can be used to structure debates and seminars, with pre-reading and video activities. Practical Language Testing was commended as a 2012 runner-up of the prestigious SAGE/ILTA Award for Best Book on Language Testing.

**Bilingual Two-language Assessment Battery of Tests** Adolph Caso, 2005 This Battery of Tests has been created to be administered to public and private school Limited English Proficiency (LEP) students, to adults, and to potential employees. The series can also be used to determine language proficiency in languages other than English making the battery of tests useful for companies seeking to employ multi-lingual talent. The Battery of Tests appears to be quite useful to institutions who need accurate assessments of multi-language speakers. It certainly can provide a bench-mark for evaluating students as well as employees in-house in quite a number of languages. Being an assessment test, it is rather dry and unappealing necessitating users to make clear to test-takers the importance of results. The Battery of Tests is a useful tool for those who require an off-the-shelf standardised language competency tool.

**Local Language Testing** Xun Yan, Slobodanka Dimova, April Ginther, 2023-07-18 This book describes language testing practices that exist in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in language testing literature. Drawing empirical research on a variety of languages, the volume

discusses local language tests' ability to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and research. Although local testing practices have been grounded in the theoretical principles of language testing, the authors in this volume supplement the theoretical content with practical examples of how local tests can be designed to effectively function within and across different institutional contexts.
