

Noble Houses Of Europe

Lucius Hudson Holt, Alexander Wheeler Chilton

The European Nobility, 1400-1800 Jonathan Dewald, 1996-05-16 An authoritative and accessible survey of the European nobility over four centuries.

The Lives of Prehistoric Monuments in Iron Age, Roman and Medieval Europe Marta Díaz-Guardamino, Leonardo García Sanjuán, David Wheatley, 2015 The essays in this collection examine the life-histories of carefully chosen megalithic monuments, stelae and statue-menhirs, and rock art sites of various European and Mediterranean regions during the Iron Age and Roman and Medieval times. By focusing on the concrete interaction between people, monuments, and places, the volume offers an innovative outlook on a variety of debated issues. Prominent among these is the role of ancient remains in the creation, institutionalization, contestation, and negotiation of social identities and memories, as well as their relationship with political economy in early historic European societies.

Secrets of the Seven Smallest States of Europe Thomas M. Eccardt, 2005 This unique book examines the history, culture, and inner workings of the seven smallest independent countries in Europe. These are among the oldest states on the continent and, despite their diversity, they have much in common. Most have relatively high per capita incomes and life expectancies, and relatively low unemployment. This narrative presents the unique issues that confront small countries, including maintaining their independence, economic viability, preserving their native languages, and sustaining their governments. The second part of the book describes each microstate in turn, showing how each one has met these challenges and adapted over time. These concise and engaging chapters contain cultural information on subjects including the arts, gastronomy, and popular tourist sites.--Provided by publisher.

European National Identities Roland Vogt, Wayne Cristaudo, Andreas Leutzsch, 2014-02-04 Making sense of the perplexing diversity of Europe is a challenging task. How compatible are national identities in Europe? What makes Europe European? What do Europeans have in common? *European National Identities* explores the diversity of European states, nations, and peoples. In doing so, the editors focus on the origins and elements of different national identities in Europe and different themes of national self-understanding. Each chapter contributes a unique view of national identities gravitating around myth, historical experiences and traumas, values, ethnic and linguistic differences, and religious fault lines. This work grounds European national identities within cultural, historical, and political dynamics, which makes the work approachable

for many readers, including historians, sociologists, and political scientists. In addition, the editors illustrate that national identities continue to be a source of contention and a challenge to political developments, the demands of immigrants and minorities, and the dynamics of European integration. This book draws particular attention to identity shifts and conflicts within individual European countries.

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott,2015 This Handbook re-examines the concept of early modern history in a European and global context. The term 'early modern' has been familiar, especially in Anglophone scholarship, for four decades and is securely established in teaching, research, and scholarly publishing. More recently, however, the unity implied in the notion has fragmented, while the usefulness and even the validity of the term, and the historical periodisation which it incorporates, have been questioned. The Oxford Handbook of Early Modern European History, 1350-1750 provides an account of the development of the subject during the past half-century, but primarily offers an integrated and comprehensive survey of present knowledge, together with some suggestions as to how the field is developing. It aims both to interrogate the notion of 'early modernity' itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that 'early modern' is not simply a chronological label but possesses a substantive integrity. Volume I examines 'Peoples and Place', assessing structural factors such as climate, printing and the revolution in information, social and economic developments, and religion, including chapters on Orthodoxy, Judaism and Islam.
