Community Development and Public Administration Theory Ashley E. Nickels,Jason D. Rivera,2018-04-17 The concept of community development is often misunderstood, holding different meanings across different academic disciplines. Moreover, the concept of community development has been historically abstracted, not only in the way the concept has been conceptualized in academic studies, but also by the way in which practitioners use the term in the vernacular. Departing from traditional definitions of community development, this volume applies the New Public Service (NPS) perspective of Public Administration to community development to illustrate how public administrators and public managers can engage in community development planning and implementation that results in more equitable and sustainable long-term outcomes. This book will be of interest to practitioners and researchers in public administration/management, public administration theory, community development, economic development, urban sociology, urban politics, and urban planning.

Community Development in an Uncertain World Jim Ife,2013-08-05 Provides a comprehensive introduction to modern community development, exploring the interrelated frameworks of social justice, ecological responsibility and post-Enlightenment thinking.

Community Character Lane H. Kendig,Lane Kendig,Bret C. Keast,2010-07-15 The book Kendig has written is a comprehensive treatment of community character and how and why this should be a primary consideration when zoning and regulating urban and rural areas. Kendig states that “community character presents a tested theory of planning based on visual and physical character that offers practical tools to measure and plan communities”. The strength of this book is that it provides tools to measure or analyze design issues. It also differs from the existing books on the topic because it takes a more flexible approach to regulating design. Smart Code has been very popular because it provides specifics on rezoning (or doing overlay zoning) for livability, but it is very rigid. LEED Neighborhood Development is still in its infancy (pilot projects) and is

also prescriptive (and flawed).

Ecofeminism and Systems Thinking Anne Stephens, 2013-07-18 This book brings together two vitally important strands of 20th-century thinking to establish a set of simple and elegant principles for planning, project design and evaluation. It explains the backgrounds of cultural ecofeminism and critical systems thinking, and what we find when they are systematically compared. Both theories share a range of concepts, have a strong social justice ethic, and challenge the legacy of modernity. The book takes theory into practice. The value of the emergent principles of feminist-systems thinking are described and demonstrated through four chapters of case studies in community development settings. The principles can be used to influence project design and outcomes across a range of disciplines including project management, policy, health, education, and community development. This book has much to offer practitioners who seek to create more socially just and equitable project and research outcomes.

New Directions in Social Work Practice Kieron Hatton, 2015-11-23 'Hatton's book is a welcome antidote to stagnation and

Jonathan Parker, Series Editor Since the first edition of Kieron Hatton's important book outlining many of the New Directions facing social work a significant number of changes and challenges have continued to have a huge impact on contemporary social work practice in the UK. From the second Laming report and the subsequent work of the Social Work Task Force, Social Work Reform Board and The College of Social Work, to the Reclaiming Social Work agenda and Munro Review, the context within which social work is practice has continued to change and this new edition unpicks the challenges, opportunities and threats facing the social workers of today.
