Crescendo Karamveer,2021-01-11 In the backdrop of glittering diamonds, the story begins in a city famous for its relaxed lifestyle and spicy cuisine, wherein the roots of the protagonist are cut off suddenly in one go, rendering him kinless. A mystery unearths in Sanjay's life, disproving his relation with his parents. Tangled in the darkness of anonymity, he leaves no stone unturned to discover his exact identity. But the more he searches, the more he sinks. Despite his best efforts, Sanjay is back to square one. Do his parents know about his identity? Or was he exchanged at the time of birth? Meanwhile, in the middle of his quest, he comes across another mind-boggling challenge from a smart diamond thief. Is his sweetheart in cahoots with the plunderer? Will he solve the riddle to find out his real parents? Pull up your socks for a brain-teasing exercise that vacillates between the Diamond City and the Orange City of India. Feel the ear-deafening crescendo of identity crisis. Sometimes, to know the truth of thyself becomes as difficult as getting blood from a stone.

Equality and the British Left Ben Jackson, 2013-07-19 The demand for equality has been at the heart of the politics of the Left in the twentieth century, but what did theorists and politicians on the British Left mean when they said they were committed to 'equality'? How did they argue for a more egalitarian society? Which policies did they think could best advance their egalitarian ideals? Equality and the British Left provides the first comprehensive answers to these questions. It charts debates about equality from the progressive liberalism and socialism of the early twentieth century to the arrival of the New Left and revisionist social democracy in the 1950s. Along the way, it examines and reassesses the egalitarian political thought of many significant figures in the history of the British Left, including L. T. Hobhouse, R. H. Tawney and Anthony

Crosland. Newly available in paperback for the first time, this book demonstrates that the British Left has historically been distinguished from its ideological competitors on the Centre and the Right by a commitment to a demanding form of economic egalitarianism. It shows that this egalitarianism has come to be neglected or caricatured by politicians and scholars alike, and is more surprising and sophisticated than is often imagined. Equality and the British Left offers a compelling new perspective on British political thought that will appeal to scholars and students of British history and political theory, and to anyone interested in contemporary debates about progressive politics.

Prayer, Pop and Politics Katharina Limacher, Astrid Mattes, Christoph Novak, 2019-04-15 What is it like to be young and religious in migration society? This volume presents research at the intersection of religion, age and race. The chapters' foci range from methodological challenges to conceptual work and empirical case studies. The authors present research on various religious traditions including contributions on young Alevis, Hindus, Buddhists and Muslims, and apply an array of theoretical angles among them feminist, post- and de-colonial perspectives. Furthermore, the volume engages in the debate over novel conceptual frameworks attuned to investigate contemporary manifestations of youth religiosity, for example in digital spaces. The methodological chapters advocate for reflexivity in the context of empirical research on religion in migration society and promote a self-evaluative assessment of researchers' positionalities.

Patterns of Care Eva-Lotta Grantén, 2003

From Day to Day Odd Nansen, 2016-04-25 In 1942 Norwegian Odd Nansen was arrested by the Nazis, and he spent the remainder of World War II in concentration camps—Grini in Oslo, Veidal above the Arctic Circle, and Sachsenhausen in Germany. For three and a half years, Nansen kept a secret diary on tissue-paper-thin pages later smuggled out by various means, including inside the prisoners' hollowed-out breadboards. Unlike writers of retrospective Holocaust memoirs, Nansen recorded the mundane and horrific details of camp life as they happened, from day to day. With an unsparing eye, Nansen described the casual brutality and random terror that was the fate of a camp prisoner. His entries reveal his constantly frustrated hopes for an early end to the war, his longing for his wife and children, his horror at the especially barbaric treatment reserved for Jews, and his disgust at the anti-Semitism of some of his fellow Norwegians. Nansen often confronted his German jailors with unusual outspokenness and sometimes with a sense of humor and absurdity that was not appreciated by his captors. After the Putnam's edition received rave reviews in 1949, the book fell into obscurity. In 1956, in response to a poll about the most undeservedly neglected book of the preceding quarter-century, Carl Sandburg singled out *From Day to Day*, calling it an epic narrative, which took its place among the great affirmations of the power of the human spirit to rise above terror, torture, and death. Indeed, Nansen witnessed all the horrors of the camps, yet still saw hope for the future. He sought reconciliation with the German people, even donating the proceeds of the German edition of his book to German refugee relief work. Nansen was following in the footsteps of his father, Fridtjof, an Arctic explorer and humanitarian who

was awarded the Nobel Peace Prize in 1922 for his work on behalf of World War I refugees. (Fridtjof also created the Nansen passport for stateless persons.) This new edition, the first in over sixty-five years, contains extensive annotations and new diary selections never before translated into English. Forty sketches of camp life and death by Nansen, an architect and talented draftsman, provide a sense of immediacy and acute observation matched by the diary entries. The preface is written by Thomas Buergenthal, who was Tommy, the ten-year-old survivor of the Auschwitz Death March, whom Nansen met at Sachsenhausen and saved using his extra food rations. Buergenthal, who later served as a judge on the International Court of Justice at The Hague, is a recipient of the 2015 Elie Wiesel Award from the US Holocaust Memorial Museum.

Reframing Disability and Quality of Life Narelle Warren, Lenore Manderson, 2013-03-12 This volume brings together two parallel fields of interest. One is the understanding among psychologists and other social scientists of the limits to psychometric measurement, and the challenges in generating information about quality of life and wellbeing that enable comparison across time and place, at both individual and population levels. The second is the interest among anthropologists and others in the lived experience of chronic illness and disability, including the unpredictable fluctuations in perceived health and capability. Chronic conditions and physical impairments are assumed to impact negatively on people's quality of life, affecting them psychologically, socially and economically. While some of these conditions have declined in prevalence, as a result of prenatal diagnosis, early successful interventions, and changes in medical technology and surgery, many of these conditions are on the increase as a consequence of improved life-saving medication and technology, and greater longevity. 'Quality of life' is often used as an indicator for successful and high quality health services, and good access to medical attention and surgery – for hip replacements or laser surgery to improve vision, for instance. But it is also used as an argument against interventions, when such interventions are seen to prolong life for its own sake. Yet we also know that people vary their idea of quality as a result of the context of fluctuations in their own health status, the presence or absence of pain or discomfort, and as a result of variations in social and economic contextual factors. In exploring these questions, this volume contributes to emerging debates related to individual health outcomes, but also to the social and other individual determinants that influence everyday life. Understanding these broader contextual factors will contribute to our knowledge of the kinds of services, support systems, and infrastructure that provide people with good 'quality of life' and a sense of wellbeing, regardless of their physical health, capability and functioning. The volume includes scholars from all continents who have been encouraged to think critically, and to engage with the descriptive, methodological, social, policy and clinical implications of their work.
