Designing Information Spaces: The Social Navigation Approach Kristina Höök, David Benyon, Alan J. Munro, 2012-12-06
That's a look at an array of social proxies. The purpose was to make it clear that the concept of social proxy is quite general. Social proxies can be designed to support a wide range of on-line interactions, whether they involve conversation or not. They may be synchronous or asynchronous, and they may be associated with activities which are an end in themselves (e. g. auctions), or activities which are simply a means to an end (e. g. waiting in queues). We believe that by providing a shared representation of the activity in which participants are involved, social proxies can help create shared expectations, shared experiences, and can serve as a resource which participants can use to structure their individual and collective interactions. That is, at least, our claim. However, it is important to note that, except for the first, the proxies described so far are concept pieces, meaning that they haven't been implemented and deployed to real situations. Now, however, we will turn to an implemented system, and look at a real example. 1. 4 Experience: The Babble System In the previous section we introduced the concept of social proxies and discussed examples illustrating the wide range of situations to which social proxies can be applied. In this section, we focus on our experience in designing, implementing and studying a social proxy in the context of an on-line system called Babble.

Gardening - Philosophy for Everyone Dan O'Brien, 2011-01-13 Philosophy and gardens have been closely connected from the dawn of philosophy, with many drawing on their beauty and peace for philosophical inspiration. Gardens in turn give rise to a broad spectrum of philosophical questions. For the green-fingered thinker, this book reflects on a whole host of fascinating philosophical themes. Gardens and philosophy present a fascinating combination of subjects, historically important, and yet scarcely covered within the realms of philosophy Contributions come from a wide range of authors, ranging from garden writers and gardeners, to those working in architecture, archaeology, archival studies, art history, anthropology, classics and philosophy Essays cover a broad spectrum of topics, ranging from Epicurus and Confucius to the aesthetics and philosophy of Central Park Offers new perspectives on the experience and evaluation of gardens

The Art of Landscape Detail Niall Kirkwood, 1999-09-13 Introducing a revolutionary new approach to detail design in

landscape architecture In this groundbreaking book, Niall Kirkwood of the Harvard Graduate School of Design takes a fresh,holistic approach to the theories, approaches, and practices of landscape detail. With the support of a wealth of graphic and written material taken from historic and contemporary landscape designwork, he clearly demonstrates the role that landscape detail plays in the design process. Going beyond theoretical considerations, Professor Kirkwood outlines landscape detail as a primary design activity, both pragmatic and poetic, using a range of built landscape design examples. A valuable resource for professionals and students in landscape architecture, architecture, urban design, and environmental design, The Art of Landscape Detail: * Provides a practical introduction to the aesthetic concerns, form, language, and expression of landscape detail * Explores a wide range of detail issues-including materials, climate, durability, implementation, and failure-and their influence on the overall detail design process * Examines detail design processes and research approaches that designers can apply in the analysis and development of their own work * Contains in-depth case studies of eight award-winning landscape architecture design projects, including provocative discussions with the designers on the establishment and evolution of their detail design philosophy * Features more than 150 images illustrating forms and site detail from national and international built landscapes

Conceptualist Landscapes Paul Cooper,2014-07-07 Conceptual gardens depend on inspiration which is the result of an exhaustive intellectual process. The starting point is an IDEA or stimulus that pushes the design along, rather than observing more conventional styles - whether classical or modernist - into which idea or relationships are fitted. Horticultural considerations, architectural or aesthetic doctrines and practically-based problem-solving are either abandoned or regarded as a means to an end, rather than the end in itself. Idea-driven design, therefore, cannot be taught by a 'rule-of-thumb' methodology. So, the way to design a conceptualist garden is not the theme of this book; nor does it contain 'of-the-peg' solutions for garden and landscape designers. Rather it encourages student and professional designers to think further towards their designed solutions.

Meaning in Landscape Architecture and Gardens Marc Treib,2011-03-01 While we all live our lives in designed landscapes of various types, only on occasion do we consider what these landscapes mean to us and how they have acquired that significance. Can a landscape architect or garden designer really imbue new settings with meaning, or does meaning evolve over time, created by those who perceive and use these landscapes? What role does the selection and arrangement of plants and hard materials play in this process and just where does the passage of time enter into the equation? These questions collectively provide the core material for Meaning in Landscape Architecture and Gardens, a compendium of four landmark essays written over a period of twenty years by leading scholars in the field of landscape architecture. New commentaries by the authors accompany each of the essays and reflect on the thinking behind them as well as the evolution of the author's thoughts since their original publication. Although the central theme of these writings is landscape

architecture broadly taken, the principal subject of several essays and commentaries is the garden, a subject historically plentiful in allusions and metaphors. As a whole *Meaning in Landscape Architecture and Gardens* offers the general reader as well as the professional a rich source of ideas about the designed landscape and the ways by which we perceive, consider, react, and dwell within them – and what they mean to us. The essays have been perennial favorites in landscape courses since their original publication in *Landscape Journal*. Bringing them together – bolstered by the new commentaries – creates a book valuable to all those creating gardens and landscapes, as well as those teaching and studying these subjects.

Landscape at Berkeley Waverly B. Lowell, Carrie Leah McDade, Elizabeth Douthitt Byrne, 2013 *Landscape at Berkeley* was published in conjunction with the centennial anniversary celebration of the Department of Landscape Architecture and Environmental Planning. Through scholarly essays, reminiscences, and illustrations, the monograph represents both commemoration of the Department and a greater understanding of the Berkeley campus. It also endeavors to trace Berkeley's role in the history of the profession and design education in the United States. *Landscape at Berkeley* focuses on the first hundred years of teaching landscape architecture and environmental planning on the UC Berkeley campus and captures an important localized perspective as well as primary source evidence that will enhance broader examinations of the major issues that have shaped the profession and the environments we inhabit and visit. Furthermore, it will contribute to the increasing scholarly interest in and literature on the history of design education, particularly that of landscape architecture and environmental planners. As such, it will appeal to a diverse audience of scholars, students, design professionals, policy makers, and the general public. The monograph includes a comprehensive narrative history and schematic timeline of key events; scholarly essays exploring the activities of UC Berkeley students and faculty within the broader context of design history, education, research, practice, policy, and leadership; reminiscences of current and former faculty and students; and a color portfolio of student work illustrating curricular goals, program competitions, and the formative work of many individuals who have contributed to the profession locally, regionally, nationally, and internationally--

Toward a Critical Pedagogy for the Environment, 1998

Dictionary of Today's Landscape Designers Pierluigi Nicolini, Francesco Repishti, 2003 The aim of the book is to illustrate the different ways of understanding landscape, creating a dictionary that can convey not just the scope of the designing processes and their related actors, but to provide a first key for interpreting the various approaches to this discipline that has given rise to an entirely new dimension in designing the cityscape, turning the open space of the city into

a space for art and sculpture, for garden and architecture, and into a new field for cultural activity. It documents the surprising extent of the planning experience and profiles world-renowned architects, engineers, landscape architects, artists and photographers. It also provides the reader with a key interpretation of the different approaches to an experience that has introduced a new dimension in the physical transformation of our environment. The dictionary features leading figures from the international scene, including Tadao Ando, Emilio Ambasz, Daniel Buren, Tony Cragg, Walter de Maria, Michael Heizer, Nancy Holt, Toyo Ito, Anish Kapoor, Rem Koolhaas, Maya Lin, Richard Long and James Turrell, to name a few. Over the last decade the concept of "landscape" has dramatically changed. References to the discipline of landscape architecture can be found in urban planning, in projects that reconstruct large disused areas, in the design of public spaces, parks and private gardens, in Land Art and in photography. This field has come to greater prominence with the increase in public projects and by keeping pace with new theoretical approaches and design practices. This volume will be an invaluable reference for anyone involved in urban planning, public art, landscape architecture and landscape design.
