**Thomas C. Renzi**

**The Green Ray** Andrew Hunt,2016 'The Green Ray' takes its starting point from French new wave director Eric Rohmer's 1986 film *Le Rayon Vert* (The Green Ray) ... [and] deals with contemporary subjects of literature, cinema, painting, writing and the post-digital sublime.--Online press release, accessed 15 March 2016.

**Jules Verne on Film** Thomas C. Renzi,2004-03-24 Jules Verne—Voila!—a name that resonates with visions of fantastic adventures and images of exotic exploits. In his voyages extraordinaires, the noted French author fuses his encyclopedic knowledge of science and geography with his ability to tell fascinating tales, taking his readers on unprecedented journeys across the globe, into the earth, and out into space. This revered writer, who with his boundless imagination had hoped to contribute substantially to the world of letters, has surpassed that expectation to become coincidentally a significant influence on film. *Jules Verne on Film* is both a penetrating analytical overview of Verne's epic novels and a comprehensive filmography of the numerous films inspired by his stories and characters. There are the obvious adaptations that come directly from the pages of Verne's writings, films such as *In Search of the Castaways* and *Mysterious Island*. However, looking closely at the plots, characters, and themes of many other films—science fiction and otherwise—one discovers that the incomparable Verne has had a far wider influence on filmmakers than one might have thought. For instance, most of us are familiar with Disney's *20,000 Leagues Under the Sea* (1954) and some of us may have even seen the two 1997 television productions. But Verne's classic undersea adventure also provides the underpinnings for such entertaining movies as *Fantastic Voyage* (1966) and *Innerspace* (1987). Structurally, *Jules Verne on Film* begins with a biographical sketch and contains 23 chapters arranged alphabetically according to book title, starting with *The Adventures of Captain Hatteras* and ending with *Voyage Across the Impossible*. Each chapter includes a summary and analysis of Verne's story, followed by a chronological treatment of the cinematic adaptations compared to their respective written work. Production credits appear in the film entries, along with plot synopses and thorough critical commentaries.

**The Cinema of Eric Rohmer** Jacob Leigh,2012-05-03 Since the death of the French film director Eric Rohmer in 2010, interest in his work has reignited. Known as the last of the established directors in the French New Wave, Rohmer took complete control over all his films, acting as his own producer throughout his career, and writing the scripts. He also made his mark by taking the lead in casting and location scouting - as French seaside resorts with beautiful young people are some

of the elements present in most of his films. Combining history and criticism, Jacob Leigh pens the first chronological survey of this understudied filmmaker in order to give readers clear insights into how Rohmer's films came about and what he intended them to be. The book provides in-depth analysis of the themes and ideas of Rohmer's twenty-three feature films, and illustrates the complexity of their cinematic style. Leigh's study is the perfect introduction to the work of this great filmmaker, for both students and the general reader.

The Green Ray Tacita Dean, 2003 Text by Tacita Dean.

Exhibiting Cinema in Contemporary Art Erika Balsom, 2025-10-01 Whether it involves remaking an old Hollywood movie, projecting a quiet 16mm film, or constructing a bombastic multi-screen environment, cinema now takes place not just in the movie theatre and the home, but also in the art gallery and the museum. The author of this engaging study takes stock of this development, offering an in-depth inquiry into its genesis, its defining features, and the ramifications it has for art and cinema alike. Through the lens of contemporary art history, she examines cinema studies' great disciplinary obsession – namely, what cinema was, is, and will become in a digital future.

**The Long Take** Lutz Koepnick, 2017-12-15 In *The Long Take*, Lutz Koepnick posits extended shot durations as a powerful medium for exploring different modes of perception and attention in our fast-paced world of mediated stimulations. Grounding his inquiry in the long takes of international filmmakers such as Béla Tarr, Tsai Ming-liang, Abbas Kiarostami, Apichatpong Weerasethakul, and Michael Haneke, Koepnick reveals how their films evoke wondrous experiences of surprise, disruption, enchantment, and reorientation. He proceeds to show how the long take has come to thrive in diverse artistic practices across different media platforms: from the work of photographer Hiroshi Sugimoto to the screen-based installations of Sophie Calle and Tacita Dean, from experimental work by Francis Alÿs and Janet Cardiff to durational images in contemporary video games. Deeply informed by film and media theory, yet written in a fluid and often poetic style, *The Long Take* goes far beyond recent writing about slow cinema. In Koepnick's account, the long take serves as a critical hallmark of international art cinema in the twenty-first century. It invites viewers to probe the aesthetics of moving images and to recalibrate their sense of time. Long takes unlock windows toward the new and unexpected amid the ever-mounting pressures of 24/7 self-management.

**The "green Ray" Or "green Flash" (rayon Vert) at Rising and Setting of the Sun** Marten Edsge Mulder, 1922

Theatre, Exhibition, and Curation Georgina Guy, 2016-04-20 Examining the artistic, intellectual, and social life of performance, this book interrogates Theatre and Performance Studies through the lens of display and modern visual art. Moving beyond the exhibition of immaterial art and its documents, as well as re-enactment in gallery contexts, Guy's book articulates an emerging field of arts practice distinct from but related to increasing curatorial provision for 'live' performance. Drawing on a recent proliferation of object-centric events of display that interconnect with theatre, the book

approaches artworks in terms of their curation together and re-theorizes the exhibition as a dynamic context in which established traditions of display and performance interact. By examining the current traffic of ideas and aesthetics moving between theatricality and curatorial practice, the study reveals how the reception of a specific form is often mediated via the ontological expectations of another. It asks how contemporary visual arts and exhibition practices display performance and what it means to generalize the 'theatrical' as the optic or directive of a curatorial concept. Proposing a symbiotic relation between theatricality and display, Guy presents cases from international arts institutions which are both displayed and performed, including the Tate Modern and the Guggenheim, and assesses their significance to the enduring relation between theatre and the visual arts. The book progresses from the conventional alignment of theatricality and ephemerality within performance research and teases out a new temporality for performance with which contemporary exhibitions implicitly experiment, thereby identifying supplementary modes of performance which other discourses exclude. This important study joins the fields of Theatre and Performance Studies with exciting new directions in curation, aesthetics, sociology of the arts, visual arts, the creative industries, the digital humanities, cultural heritage, and reception and audience theories.

*The Microscope* Jabez Hogg, 1883

*The Green Ray (le Rayon Vert)* Jules Verne, 1873-1874 The heroes are trying to observe the green ray in Scotland. After numerous unsuccessful tries caused by clouds, flocks of birds or distant boat sails hiding the sun, the phenomenon is eventually visible, but the heroes, finding love in each other's eyes, don't pay attention to the horizon. Scientific basis Green flashes and green rays are rare optical phenomena that occur shortly after sunset or before sunrise, when a green spot is visible for a short period of time above the sun, or a green ray shoots up from the sunset point. It is usually observed from a low altitude where there is an unobstructed view of the horizon, such as on the ocean. The idea in the novel that one can predict where and when to observe the green ray has no scientific basis. However, they are regularly sighted by airplane pilots because they often can see the true horizon in mid flight, more often when flying west because the sun's relative motion is slightly slower.
