Mass Communication and Journalism in the Digital Age Chandak Somayaji,2025-01-03 Mass Communication and Journalism in the Digital Age explores the process of sending messages to large audiences simultaneously. We delve into various forms of mass communication, communication models, their evolution, marketing strategies, OTT platforms, and media industries. Our book covers media and communication both at individual and collective levels. We also examine journalism, the fourth pillar of democracy, discussing its forms, origins, evolution, and the impact of technology on it. Surrounded by information, this book helps you understand how it is dispersed and channeled. Whether you're a media enthusiast or a professional in the field, this book provides valuable insights into the dynamics of mass communication and journalism in today's digital landscape.

Future Internet Services and Service Architectures Anand R. Prasad,John F. Buford,K. Vijay Gurbani,2022-09-01 Future Internet Services and Service Architectures presents state-of-the-art results in services and service architectures based on designs for the future Internet and related emerging networks. The discussions include technology issues, key services, business models, and security. The work describes important trends and directions. Future Internet Services and Service Architectures is intended to provide readers with a comprehensive reference for the most current developments in the field. It offers broad coverage of important topics with twenty chapters covering both technology and applications written by international experts. The 20 chapters of Future Internet Services and Service Architectures are organized into the following five sections:-• Future Internet Services -- This section contains four chapters which present recent proposals for a new

architecture for the Internet, with service delivery in the Future Internet as the key focus. • Peer-to-Peer Services -- Using the P2P network overlay as a service platform, five chapters explore the P2P architecture and its use for streaming services, communication services, and service discovery. • Virtualization -- Virtualization and its benefits for resource management, supporting heterogeneity, and isolation are the basis for five chapters which describe virtualization at the endpoint, in the cloud, and in the network. • Event-Distribution -- Publish/Subscribe mechanisms are important for applications which require time-sensitive delivery of notifications. The two chapters in this section present recent developments in publish/subscribe load balancing and in sensor networks. • VANETs - Vehicular Ad Hoc Networks (VANETs) are a network technology which are designed for vehicle-to-vehicle and vehicle-to-infrastructure connectivity for moving vehicles. The four chapters in this section provide an introduction to VANETs, routing, services and system architecture. Future Internet Services and Service Architectures is complemented by a separate volume, Advances in Next Generation Services and Service Architectures, which covers emerging services and service architectures, IPTV, context awareness, and security.

Intelligent Multimedia Technologies for Networking Applications: Techniques and Tools Kanellopoulos, Dimitris, 2013-01-31 As ubiquitous multimedia applications benefit from the rapid development of intelligent multimedia technologies, there is an inherent need to present frameworks, techniques and tools that adopt these technologies to a range of networking applications. Intelligent Multimedia Technologies for Networking Applications: Techniques and Tools promotes the discussion of specific solutions for improving the quality of multimedia experience while investigating issues arising from the deployment of techniques for adaptive video streaming. This reference source provides relevant theoretical frameworks and leading empirical research findings and is suitable for practitioners and researchers in the area of multimedia technology.
