Matteo Valleriani

The First Three Hymns of the Ahunauuaitī Gāθā Benedikt Peschl, 2022-11-21 At the center of this book stands a text-critical edition of three chapters of the Gāthās, exemplifying the editorial methodology developed by the “Multimedia Yasna” (MUYA) project and its application to the Old Avestan parts of the Yasna liturgy. Proceeding from this edition, the book explores aspects of the transmission and ritual embedding of the text, and of its late antique exegetical reception in the Middle Persian (Pahlavi) tradition. Drawing also on a contemporary performance of the Yasna that was filmed by MUYA in Mumbai in 2017, the book aims to convey a sense of the Avestan language in its role as a central element of continuity around which the Zoroastrian tradition has evolved from its prehistoric roots up to the modern era.

De sphaera of Johannes de Sacrobosco in the Early Modern Period Matteo Valleriani, 2020-01-23 This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his *Tractatus de sphaera* during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

Al-Andalus, Sepharad and Medieval Iberia Ivy Corfis, 2010-01-11 The 12 articles of this volume show the many facets of contact in al-Andalus and Medieval Iberia, reminding us of how contact influenced art and learning in a wide range of

fields: politics, science, philosophy, music and religion; offering views of how contact between societies affects both language, stereotype and assimilation; examining how war and conflict (re)define the representation of ideas, places and people; and demonstrating how representations changed over time through contact and conflict. Lessons of the past apply today as al-Andalus captures the modern imagination and cultures continue to come into contact across borders which either allow fluid diffusion of ideas or block passage.
