The History of the British Petroleum Company: Volume 1, The Developing Years, 1901-1932 Ronald W. Ferrier, J. H. Bamberg, 1982-10-28 This comprehensive history of British Petroleum has been based firmly on the evidence from contemporary records.

The History of the British Petroleum Company Ronald W. Ferrier, J. H. Bamberg, 1982 This 1994 second volume of BP's history aims to be an honest and comprehensive examination of the company in the period 1928-1954.

British Petroleum and Global Oil 1950-1975 James Bamberg, 2000-08-31 Dramatic narrative, arresting analysis and original research are combined in this book, which addresses the history of one of the world's biggest oil businesses between 1950 and 1975. Assessing BP's comparative performance, the book focuses on how BP responded politically, economically and culturally to the rise of new competitors, the decline of Britain's imperial power, and the determination of nation states to assert national sovereignty over the vital commodity, oil. Climaxing with the OPEC crisis which shook the world in the 1970s, the book - authorised by BP with uniquely unrestricted access to its records - is of wide interest and relevance, especially for those interested in big business, globalisation and nationalism, international affairs, OPEC, the Middle East, and oil.

A Complete Strategic Business Analysis of British Petroleum (BP) Md Moniruzzaman Kiron, 2018-02-08 Submitted Assignment from the year 2017 in the subject Business economics - Business Management, Corporate Governance, grade: A, language: English, abstract: British Petroleum (BP) PLC is recognized as a biggest and leading petroleum company in the world whose headquarter is in London, United Kingdom. BP has operations in about 72 nations of the world, which generates approximately or equivalent to 3.3 million barrels of oil every day and operates almost 22,400 fuel service stations in the world. The revenues show that it is the third largest company in energy production and listed as the 5th world's largest company and is the 6th super dominant producer of oil and gas. This study analyses the external environment and the internal environment in which BP operates using significant strategic administration tools such as Porter's Five Forces. Based on this Analysis, the Core Competencies and Distinctive Capabilities of BP can be measured. The Business Level Strategies, Corporate and International Strategic prospects of BP are interpreted and appraised for their Suitability, Acceptability, and Probability.

Handbook of OPEC and the Global Energy Order Dag Harald Claes, Giuliano Garavini, 2020-01-20 The Organization of the Petroleum Exporting Countries (OPEC), celebrating its 60th anniversary in 2020, is one of the most recognizable acronyms in international politics. The organization has undergone decades of changing importance, from political irrelevance to the spotlight of world attention and back; and from economic boom for its members to deep political and financial crisis. This handbook, with chapters provided by scholars and analysts from different backgrounds and specializations, discusses and analyzes the history and development of OPEC, its global importance, and the role it has played, and still plays, in the global energy market. Part I focuses on the relationship between OPEC and its member states. Part II examines the relationship between OPEC and its customers, the consuming countries and their governments, while Part III addresses the relationship between OPEC and its competitors and potential partners, the non-OPEC producers, and the international oil companies. The final section, Part IV, looks at OPEC and the governance of international energy.
