A Handbook of Case Studies in Finance Tarika Singh,2017-06-20 This book links the theory of finance to the decisions related to various aspects of the financial management of an organisation. In order to provide the reader with a better understanding of the concept of finance, a theoretical guide to related terminology is included here. The case studies brought together require students to look deep into the concepts of finance in order to solve the problems and issues they present. The case studies here focus on important concepts of finance which help students to relate the concept with decision-making processes.

Stochastic Filtering With Applications In Finance Ramaprasad Bhar,2010-08-19 This book provides a comprehensive account of stochastic filtering as a modeling tool in finance and economics. It aims to present this very important tool with a view to making it more popular among researchers in the disciplines of finance and economics. It is not intended to give a complete mathematical treatment of different stochastic filtering approaches, but rather to describe them in simple terms and illustrate their application with real historical data for problems normally encountered in these disciplines. Beyond laying out the steps to be implemented, the steps are demonstrated in the context of different market segments. Although no prior knowledge in this area is required, the reader is expected to have knowledge of probability theory as well as a general mathematical aptitude. Its simple presentation of complex algorithms required to solve modeling problems in increasingly sophisticated financial markets makes this book particularly valuable as a reference for graduate students and researchers interested in the field. Furthermore, it analyses the model estimation results in the context of the market and contrasts these with contemporary research publications. It is also suitable for use as a text for graduate level courses on stochastic modeling.

New Perspectives on Emotions in Finance Jocelyn Pixley, 2012 The financial crisis that started in 2007 is a concern for the world. Some countries are in depression and governments are desperately trying to find solutions. In the absence of thorough debate on the emotions of money, bitter disputes, hatred and 'moralizing' can be misunderstood. *New Perspectives on Emotions in Finance* carefully considers emotions often left unacknowledged, in order to explain the socially useful versus de-civilising, destructive, nature of money. This book offers an understanding of money that includes the possible civilising sentiments. This interdisciplinary volume examines what is seemingly an uncontrollable, fragile world of finance and explains the 'panics' of traders and 'immoral panics' in banking, 'confidence' of government and commercial decision makers, 'shame' or 'cynicism' of investors and asymmetries of 'impersonal trust' between finance corporations and their many publics. Money is shown to rely on this abstract trust or 'faith', but such motivations are in crisis with 'angry' conflicts over the 'power of disposition'. Restraining influences - on 'uncivilised emotions' and rule breaking - need democratic consensus, due to enduring national differences in economic 'sentiments' even in ostensibly similar countries. Promising ideas for global reform are assessed from these cautionary interpretations. Instead of one 'correct' vision, sociologists in this book argue that corporations and global dependencies are driven by fears and normless sentiments which foster betrayal. This book is not about individuals, but habitus and market crudities. Human 'nature' or 'greed' cannot describe banks, which do not 'feel' because their motivations are not from personal psyches but organisational pressures, and are liable to switch under money's inevitable uncertainties. This more inclusive social science studies emotions as a crucial factor among others, to expand the informed public debate among policy makers, bankers, academics, students and the public.

On the Role of Paradigms in Finance Kavous Ardalan, 2008 Social theory can usefully be conceived in terms of four key paradigms: functionalist, interpretive, radical humanist and radical structuralist. Finance theory is based on the functionalist paradigm and for the most part finance theorists are unaware of the philosophical tradition to which they belong. By offering an overview of the four paradigms, Ardalan's work offers a concise understanding of the multifaceted nature of finance.
