**Albert Van Helden, Sven Dupré, Rob van Gent**

*The Origins of the Telescope* Albert Van Helden, Sven Dupré, Rob van Gent, 2010 The origins of the telescope have been discussed and debated since shortly after the instrument's appearance in The Hague in 1608. Civic and national pride have led local dignitaries, popular writers, and numerous scholars to search the archives and to construct sharply divergent histories. Did the honor of the invention belong to the Dutch, to the Italians, to the English, or to the Spanish? And if the city of Middelburg in the Netherlands was, in fact, the cradle of the instrument, was the true inventor Hans Lipperhey or his rival Zacharias Jansen? Or was the instrument there before anyone knew it? Over the past several decades, a group of historians and scientists have sought out new documents, re-examined familiar ones, and tested early lenses and telescopes. This volume contains the proceedings of a symposium held in Middelburg in September 2008 to mark 400 years of the telescope. The essays in it, taken as a whole, present a new and convincing account of the origins of the instrument that changed mankind's vision of the universe.

**The Invention of the Telescope** Albert Van Helden, 1977 Ours is an age of science and technology, based on precision instruments. The first such device to strengthen our feeble human senses in our striving to comprehend the strange and elusive universe around us was the telescope. Cornelis de Waard, in his *De uitvinding der verrekijkers* (The Hague, 1906), had uncovered many new documents bearing on the genesis of the telescope. Van Helden began this project as a translation of de Waard's study. However, Van Helden decided that the profession and de Waard's memory would be better served by a collection and translation of all the relevant primary sources named in his study. Contents of this volume: Intro.; The Background; Between Porta and Lipperhey, 1589-1608; and Documents. Illus. Reprint.

Einstein, the Searcher Alexander Moszkowski, 1921 The name of Albert Einstein, firmly attached to the important physical theory of Relativity, has become of interest to the whole world. Accounts of Dr. Einstein's work are already many and various, but his personality has not yet become well-known. Mr. Moszkowski, a profound admirer and close companion of the now famous professor, lifts the veil in this entertaining and informing volume, and in describing many long and profoundly interesting discussions he has had with Dr. Einstein on all kinds of subjects, scientific and other, he illuminates for us the thought-world and personality of the great scientist.
