

Architecture And The City Aldo Rossi

Diane Ghirardo

The Architecture of the City Aldo Rossi, 1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century. *The Architecture of the City* is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students.

Aldo Rossi and the Spirit of Architecture Diane Ghirardo, 2019-01-01 This beautifully illustrated book provides a crucial new look at Aldo Rossi's built work in relationship to his writings, drawings, and product design, and explores his contributions to the architecture in postwar Italy.

The Architecture of the City Aldo Rossi, 1982-01-01 Aldo Rossi, a practicing architect and leader of the Italian architectural movement La Tendenza, is also one of the most influential theorists writing today. *The Architecture of the City* is his major work of architectural and urban theory. In part a protest against functionalism and the Modern Movement, in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study, and in part an analysis of the rules and forms of the city's construction, the book has become immensely popular among architects and design students. A Scientific Autobiography, reissue Aldo Rossi, 2010-01-29 A lyrical memoir by one of the major figures of postmodernist architecture; with drawings of architectural projects prepared especially for the book. This revealing memoir by Aldo Rossi (1937–1997), one of the most visible and controversial figures ever on the international architecture scene, intermingles discussions of Rossi's architectural projects—including the major literary and artistic influences on his work—with his personal history. Drawn from notebooks Rossi kept beginning in 1971, these ruminations and reflections range from his obsession with theater to his concept of architecture as ritual.

Aldo Rossi, Buildings and Projects Aldo Rossi, Mason Andrews, 1985 Un autre dans l'excellente série de monographies

fortement illustrées de Rizzoli sur les maîtres de l'architecture contemporaine. Rossi (né en 1931), qui a enseigné dans ce pays et écrit largement, pratique à Milan. Il fut l'un des premiers à fournir des liens historiques avec le passé, abandonnant les tendances anhistoriques du modernisme. Les textes sont brefs, mais les photographies et les plans sont complets et excellents. Scully a contribué une brève introduction appréciant. Recommandé comme un document minutieux, soigné et très visuel d'architecture postmoderne. -- [Jack Perry Brown, Art Inst. de Chicago Libs].

Aldo Rossi Architect Aldo Rossi, Berlinische Galerie, 1994-12-28 This architectural monograph provides a critical study of Aldo Rossi, a leading Italian architect and one of the most successful architects of the post-modernist period. An historical analysis of Rossi's work is presented as the author explores the source material, and projects and buildings of the period 1965-1992 are examined. The book is illustrated throughout and includes a reappraisal of nine recent projects.

The Urban Fact Kersten Geers, Jelena Pančević, 2021 The Urban Fact examines Aldo Rossi's formulation of a theory of the city, developed over the period of roughly ten years, from *Architecture of the City* published in 1966, to *Analogous City* exhibited in 1976. Rossi's theory is not taken as an abstract argument, but is seen through his work from that period. A careful selection of twenty-three projects is presented here at face value. These projects, bound by the reality of their setting, but also charged with cultural and civic ambition, illustrate the intricacy of an architectural project as a complex 'whole'. They also demonstrate how architecture could contribute to the changing urban context of the field, hinting at an oeuvre painfully aware of its limitations and stubborn in its intentions.

Analogical City Cameron McEwan, 2024-01-18 In *Analogical City*, Cameron McEwan argues for architecture's status as a critical project. McEwan revisits architect Aldo Rossi as a paradigmatic figure of the critical rational tradition, studying a neglected aspect of his thought — the analogical city — to excavate its potential. McEwan develops a grammar of the analogical city under the headings of Imagination, Transformation, City, Multitude, and Project. McEwan argues that the analogical city is critical, collective, and emancipatory. Analogical thought and understanding cities as analogical might open the conditions of possibility for rethinking the critical project in architecture. At a time when the humanities and the sciences are threatened by irrational thought, from climate denial to post-truth narratives, and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city, McEwan offers critical strategies, conceptual tools, figures of thought, and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice. Today, knowledge is a common terrain of struggle and thought requires constant reinvention. The task of architecture, and critique more broadly, must be to interpret the

world in order to change it. Consequently Analogical City proposes modes for imagining the city, the subject, and the world otherwise — towards a more egalitarian and critical architecture of the city. Ultimately, the analogical city is not a fully developed theory, nor is it only an intuitive, poetic, or purely formal practice, as some critics propose. McEwan argues that the analogical city is poetic and political: it always refers beyond itself towards a collective and critical project of the city, and yet it invites a series of formal, spatial, and graphic operations comprising erasure and negativity followed by substitution and remontage.

Fundamental Trends in City Development Giovanni Maciocco, 2007-12-03 The Reinvented City reflects on externity, the principal feature of a reinvented city. Three basic trends of the city are investigated; discomposed, generic and segregated phenomena with the loss of the city as a space of social interaction and communication. Important questions are posed: What is the true public sphere in contemporary societies? What is the contemporary public space corresponding to it? In what way can the city project construct contemporary public space?

Architecture, City, Environment Koen Steemers, Simos Yannas, 2000 PLEA is a network of individuals sharing expertise in the arts, sciences, planning and design of the built environment. It serves as an international, interdisciplinary forum to promote discourse on environmental quality in architecture and planning. Architecture Oriented Otherwise David Leatherbarrow, 2012-04-17 So much writing about architecture tends to evaluate it on the basis of its intentions: how closely it corresponds to the artistic will of the designer, the technical skills of the builder, or whether it reflects the spirit of the place and time in which it was built, making it not much more than the willful (or even subconscious) assemblage of objects that result from design and construction techniques. Renowned writer and thinker David Leatherbarrow, in this groundbreaking new book, argues for a richer and more profound, but also simpler, way of thinking about architecture, namely on the basis of how it performs. Not simply how it functions, but how it acts, its manner of existing in the world, including its effects on the observers and inhabitants of a building as well as on the landscape that situates it. In the process, Leatherbarrow transforms our way of discussing buildings from a passive technical

or programmatic assessment to a highly active and engaged examination of the lives and performances, intended and otherwise, of buildings.

Architecture for the city Max Dudler, J. Christoph Bürkle, 2003 Max Dudler, born in 1949 in Switzerland, commutes in his work between Berlin and Zurich. With the construction of the new Bewag office building on the Gendarmenmarkt in Berlin (1997), the renovation of the Sale e Tabacchi Restaurant (1996), the first pri

Valences of Historiography Gevork Hartoonian, 2024-12-30 The compiled essays offer various themes and ways of approaching historiography. Each chapter probes the state of contemporary theorization of architecture histories, working toward the theme of critically re-writing history. Essential to each author's contribution are specific traditions created by the mole of history burrowing through the past. This book concerns the historian's conjectures towards capturing the past and present zeitgeist. Temporality is the theme running through the narrative of this volume. It raises the question of whether the ever-growing body of work on architectural history should be considered as history. More specifically, what is the intersection between history and architectural history? Furthermore, can every text focused on architecture's past be considered categorically historiographic? In what capacity does architectural history index history beyond contingencies and without reducing the text to empirical realities and the historian's interest in a specific subject, including those collected through archival research, itself an emblem of textuality? This book upholds the conviction that the past should be recalled accurately and that there is no history but historical criticism, the scope of which exceeds the historicity of Humanism. Dialectically, the timeline experienced across contemporary techno-economic and cultural domains (aesthetics) offers an opportunity to explore architecture produced outside the Euro-American continents. *Valences of Historiography* offers a fresh take on architectural history that is useful for academics, researchers and architecture students.
