Occupational Diseases in the Construction Industry Imriyas Kamardeen, Abid Hasan, 2024-10-23 Despite occupational diseases in construction contributing to a significant proportion of fatalities, and permanent and temporary incapacities, they have not gained as much attention as occupational injuries from practitioners and researchers. The research in this book aims to discover occupational diseases that cause fatalities and permanent and temporary incapacities in the construction industry, along with their epidemiological causal mechanisms. Through chapters examining cancers, circulatory system diseases, respiratory system diseases, nervous system and sense organ diseases, and musculoskeletal diseases, the authors provide new knowledge and insights to help proactively prevent and control these diseases. The research underpinning the development of the book applies empirical analyses of real-world occupational disease data for the construction industry alongside a detailed review and meta-analysis of literature pertinent to risk factors and methods and strategies to prevent and/or control occupational diseases in construction. Knowing the riskiest diseases and occupations for construction workers, along with organisational and personal risk factors, is critical to optimising risk management efforts. This book should be of interest to students, researchers, and practitioners in construction management, occupational health and safety, and risk management.

Routledge Handbook of Construction Project Procurement and Delivery Mohan Kumaraswamy, 2024-03-28 This Handbook provides the knowledge needed to design and deploy proactive construction project procurement and delivery systems based on essentials while addressing emerging construction industry imperatives in order to boost overall performance. Section 1 of the Handbook provides an overview, while Section 2 provides the fundamentals with fresh insights into the building blocks and trends in performance-linked procurement and delivery, including procurement strategies and commercial priorities, project briefs and management plans, design management, stakeholder management, risk management, ethics and professionalism, team building, information and knowledge management, digital aids, conflict, claims and dispute management, collaborative contracting, relationship-based teamworking and linking to built asset management. Section 3 explores and expands on specific trends, including sub-contractor selection, Building Information Modelling (BIM) in project cost management; off-site and modern methods of construction; 4IR/5IR technologies; and constructing for the circular economy, supply chain resilience and social value imperatives in this domain. While other books

describe standard processes or focus on specific strategies such as design and build, target cost contracting or integrated project delivery, this Handbook presents the fundamentals of such processes and protocols together with invited specialist insights into growing trends and imperatives in holistic procurement and delivery. Those who could benefit from this Handbook include academics, researchers, postgraduate students, policy makers and administrators, managers in both public and private sectors involved with planning and overseeing construction project procurement and/or delivery and undergraduates looking for a balanced introduction and useful insights into what is critical to the success of construction projects, organisations and the industry itself.

Public Relations Management in Africa Volume 2 Albert A. Anani-Bossman, Takalani E. Mudzanani, Cornelius B. Pratt, Isaac A. Blankson, 2023-07-19 This two-part volume, the first of its kind, examines current pedagogical modules and research directions in public relations and communication management, identifying emerging issues driving the practice in Africa. In comparison to its Western and Asian counterparts, literature on public relations management in Africa is limited, and much of it is examined through the lenses of Western philosophies and pedagogies, failing to reflect Africa's socioeconomic, political, and cultural contexts. This project aims to change that. Albert Volume 2 brings together African scholars, moving beyond organizational impact to share the wider theoretical and practical perspectives on the practice of public relations on the continent, within its cultural, global, and technological milieu. Through conceptual discussions and empirical analyses, this volume shows how Africa is gradually coming out of the shadows of the Western world by building a body of knowledge that reflects the nature of public relations management on the continent. Chapters cover: how public relations contributes to strategic management in Africa; health communication and public relations management; strategic management of issues, as well as the implications of the fourth industrial revolution for public relations practice in Africa.

Sustainable Development in Africa Walter Leal Filho, Rudi Pretorius, Luiza Olim de Sousa, 2021-07-09 This book serves the purpose of documenting and promoting African experiences on sustainable development, which encompasses both, formal and non-formal education. Sustainable development is very important to Africa, but there is a paucity of publication which documents and promotes experiences from African countries. Due to their complexity, the interrelations between social, economic and political factors related to sustainable development, especially at universities, need to be better understood. There is also a real need to showcase successful examples of how African institutions are handling their sustainability challenges. It is against this background that this book has been produced. It is a truly interdisciplinary publication, useful to scholars, social movements, practitioners and members of governmental agencies and private companies, undertaking research and/or executing projects focusing on sustainability from across Africa. As African nations strive to pursue the UN Sustainable Development Goals, it is imperative to cater for the information needs seen across the continent and foster the dissemination of experiences and case studies, which may support both, on-going and future efforts.

The scope of the book is deliberately kept wide, and we are looking for contributions across the spectrum of sustainable development from business and economics, to arts and fashion, administration, environment, languages and media studies.

The Routledge Companion to Business in Africa Sonny Nwankwo, Kevin Ibeh, 2014-07-25 Although the world's poorest inhabited continent, Africa has recently shown signs of being a source of economic growth in the coming decades, with increased foreign investment - notably from China - and huge growth in GDP from a number of African states. In contrast to the heaving weight of books focusing on business opportunities in Asia, Eastern Europe and Latin America, Africa has been poorly served by academic publishing. This compendium of scholarship offers cutting-edge knowledge relating to business in Africa. The objectives of this collection include: To shed new light on the socio-cultural and historical underpinnings of business practice in Africa and their implications for promoting entrepreneurship and business behaviour in the region To consider the important constraints on business activities in Africa, and the emerging 'best practice' for redressing their real and potential impacts To facilitate a better understanding of contemporary business practice in Africa through the application of relevant theories and models, including emergent ones. The Routledge Companion to Business in Africa is a comprehensive reference resource that provides the perfect platform for embarking on research and study into Africa from the business perspective.
