Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education Haas, Leslie, Tussey, Jill, 2021-01-15 The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant considered exploration. Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students.

News Literacy Michelle Luhtala, Jacquelyn Whiting, 2018-05-09 At a time when misinformation in the media is abundant, this book explains the difficulty in nurturing students to become critical researchers and offers practical lessons that empower students to excavate information that will help them learn. This guide to teaching news literacy explores a wealth of resources and classroom-tested lessons that educators in grades 7-12 can use in their own libraries and classrooms. To introduce the concept of news literacy, the authors explain the steps of the inquiry and research process in detail and examine the Stanford History Education Group (SHEG) 2016 report Evaluating Information: The Cornerstone of Civic Online Reasoning and related research studies. Lesson plans corresponding to each stage of the process are coordinated to relevant standards from the CCSS and ISTE and are accompanied by rubrics for providing students feedback on their progress as well as samples of student work as it evolved through the stages. Furthermore, the authors' anecdotal insights from their experiences in collaboratively implementing the lessons with colleagues are an invaluable addition for any librarian seeking to work with teachers to help students become critical researchers.
