ENTRANDO AL MUNDO YouTube Rubén Montero Torres, Hay muchas formas de ganar dinero en línea, pero ninguna como convertirse en una celebridad en YouTube. Ganar dinero a través de YouTube significa no solo que tiene una fuente de grandes ingresos sin hacer una gran inversión, sino que también significa lograr en cierta medida fama real. De hecho,

muchos youtubers han visto como su fama los ha llevado a trabajar en otros campos como la moda o el cine. Si se hace grande en YouTube, entonces la gente lo reconocerá en la calle e incluso puede llevarle a lograr otras oportunidades para su negocio. Así es como se hacen las celebridades en la era digital, ¿por qué no involucrarse?

Educación a Distancia Y Tic Daniel Desiderio Borrego Gómez,Noel Ruíz Olivares,Daniel Cantú Cervantes,2017-11-28

Los doce capítulos reunidos en la presente obra titulada “Educación a Distancia y TIC” son producto de una serie de aportes desarrolladas por profesores investigadores de instituciones educativas del noreste de la república mexicana que buscan respuestas en los temas de la educación a distancia y el uso de las Tecnologías de la Información y la Comunicación (TIC) en la educación. Los aportes abordados por los veintisiete autores son: Los retos de la universidad latinoamericana ante las TIC, competencias en TIC, alternativas para combatir la brecha digital, la transformación necesaria en la educación, el perfil del estudiante a distancia, el uso de redes sociales, casos de implementación de la educación a distancia en su modalidad b-learning, el cloud computing, el aprendizaje móvil y los objetos de aprendizaje con apoyo de las tecnologías. Son temas que, a consideración de los autores en la actualidad despiertan interés a la comunidad académica en los diferentes niveles educativos, al buscar dar respuesta a los aspectos relacionados con la educación a distancia, modalidad que se ha convertido en una alternativa viable y real para las personas con características particulares que no pueden asistir a una institución de educación presencial. Sin embargo, estos temas no se limitan al contexto anterior, sino que también a experiencias desarrolladas en programas educativos presenciales del nivel educativo básico, abordando aspectos sobre el uso de tecnologías de la información y la comunicación.
