Linguistic Archaeology of South Asia Franklin Southworth,2004-08-02 This book brings together linguistic and archaeological evidence of South Asian prehistory. The author depicts and analyses the region, in particular the Indus Valley civilization, its links with neighbouring regions and its implications for social history. Each type of linguistic data is put into its socio-historical context. Consequently, the book is both a description of the unique methodology 'linguistic archaeology' and a treatment of South Asian linguistic data.

Many examples are drawn directly from the author's remarkable clinical

experiences with the renowned Framingham Heart Study, making this text practical, interesting, and accessible for those with little mathematical background. The examples are real, relevant, and manageable in size so that students can easily focus on applications rather than become overwhelmed by computations. The Fourth Edition has been thoroughly updated, and now offers a new chapter on career opportunities in biostatistics and new case studies focused on COVID-19 within each chapter. This edition also includes free access to JMP® Student Subscription (a \$29.95 value). New cases based on COVID-19 highlight the importance and practical applications of biostatistics for addressing the pandemic.
