The Control Agenda Matthew J. Ambrose,2018-04-15 The Control Agenda is a sweeping account of the history of the Strategic Arms Limitation Talks (SALT), their rise in the Nixon and Ford administrations, their downfall under President Carter, and their powerful legacies in the Reagan years and beyond. Matthew Ambrose pays close attention to the interplay of diplomacy, domestic politics, and technology, and finds that the SALT process was a key point of reference for arguments regarding all forms of Cold War decision making. Ambrose argues elite U.S. decision makers used SALT to better manage their restive domestic populations and to exert greater control over the shape, structure, and direction of their nuclear arsenals. Ambrose also asserts that prolonged engagement with arms control issues introduced dynamic effects into nuclear policy. Arms control considerations came to influence most areas of defense decision making, while the measure of stability SALT provided allowed the examination of new and potentially dangerous nuclear doctrines. The Control Agenda makes clear that verification and compliance concerns by the United States prompted continuous reassessments of Soviet capabilities and intentions; assessments that later undergirded key U.S. policy changes toward the Soviet Union. Through SALT's many twists and turns, accusations and countercharges, secret backchannels and propaganda campaigns the specter of nuclear conflict loomed large.

Strategic Arms Limitation Talks William Pierce Rogers,1969

Johnson, McNamara, and the Birth of SALT and the ABM Treaty 1963-1969 John M. Clearwater, 1996-12 The purpose of this book is to examine the birth of bilateral strategic arms control between the United States and the Soviet Union during the Johnson Administration, from 1964 to 1969. It is about the time and the place of the birth of bilateral strategic arms control as it came about in the United States through the efforts of President Lyndon Johnson and Secretary of Defense Robert McNamara in the 1960s. This is the time of the birth of what quickly came to be known as SALT, or the Strategic Arms Limitation Talks. This inquiry firstly considers whether the move towards bilateral strategic arms control was institutional or personal. It then looks for the motivating factors: both theoretical and substantive. As few things have only a single cause, it is likely that we shall find that the birth of strategic arms control was influenced by both nuclear weapons employment theory, and by a substantive incident or reality such as the ever increasing number and sophistication of nuclear weaponry. Lastly, we must look for an immediate precipitating factor, such as the move towards deployment of a potentially destabilizing ABM system by both the USA and USSR. Therefore, it must be borne in mind when examining the people and their theories, the institutions, the prevailing realities, and major precipitating factors, that they all come together to form the basis for the birth of bilateral strategic arms control. This book shall therefore strive to reveal the extent of personal input; the objective basis for that personal commitment; and examine the major precipitating factors, namely Anti-Ballistic Missiles (ABM), and to a lesser extent, Multiple Independently Targeted Re-Entry Vehicles (MIRV). Although barely discussed at the time, the MIRV would turn out to be a major arms control problem: far greater than the hotly contested ABM system which spurred so many debates. The unique aspect of this research is that other writers have concentrated almost totally on the people and events surrounding the Nixon Administration when studying SALT. While it is true that the talks did not get underway during the Johnson years, this study will show that all of the theoretical and preparatory work was done in the Johnson years, and conclude by showing that many of the same people appear in the Nixon years. Without the input of McNamara and his team, there would have been no movement on strategic arms control until possibly the 1970s. To add to the historical value of the work, I have included in the annexes complete texts of the initial arms control proposal which the US team was to present to the Soviet Union in the autumn of 1968. In addition, presented here for the very first time are the full instructions to the negotiating team and the initial presentation paper to be read by the team leader on the opening day of the talks. When this final material is tied in with the history of the push for the talks, the story is indeed exciting and meaningful. For the first time we are presented with the almost complete picture of the formulation of an arms control proposal. There is of course a fluke of history which brought this all to light. As the Johnson material was never directly used in the formal SALT talks, it was not subject to the same stringent security classifications as those of Nixon, Ford, Carter, Reagan, Bush and Clinton materials. Therefore the documents started to be declassified in the late 1980s, with the bulk coming to light in 1991 through 1994. Here then is the story of the origins of strategic arms control.

Doubletalk Gerard C. Smith, 1980 Forfatteren var den amerikanske SALT- delegations chefforhandler fra indledningen af disse forhandlinger i 1969 til undertegnelsen af traktaten om antiballistiske missiler (Antiballistic Missile (ABM) Treaty), herunder den midlertidige fastfrysning af de intercontinentale ballistiske missiler, i 1972.

A Strategic Symposium Richard Burt, 1979-01

The Strategic Arms Limitation Talks, 1976 The Bureau of Verification and Compliance of the U.S. State Department presents information on the Strategic Arms Limitation Talks (SALT I), which extended from November 1969 to May 1972. During this period, the United States and the Soviet Union negotiated on placing limits and restraints on the central and most important armaments.

The Double Game James Cameron, 2017-10-16 How did the United States move from a position of nuclear superiority over the Soviet Union at the beginning of the 1960s to one of nuclear parity under the doctrine of mutual assured destruction in 1972? Drawing on declassified records of conversations three presidents had with their most trusted advisors, James Cameron offers an original answer to this question. John F. Kennedy, Lyndon Johnson, and Richard Nixon struggled to reconcile their personal convictions about the nuclear arms race with the views of the public and Congress. In doing so they engaged in a double game, hiding their true beliefs behind a façade of strategic language while grappling in private with the complex realities of the nuclear age. Cameron shows how, despite reservations about the nuclear buildup, Kennedy and Johnson pushed ahead with an anti-ballistic missile (ABM) system for the United States, fearing the domestic political consequences of scrapping both the system and the popular doctrine of strategic superiority that underpinned it. By contrast, the abrupt decline in US public and congressional support in 1969 forced Nixon to give up America's first ABM and the US lead in offensive ballistic missiles through agreements with the Soviet Union, despite his conviction that the US needed a nuclear edge to maintain the security of the West. By placing this dynamic at the center of the story, *The Double Game* provides a new overarching interpretation of this pivotal period in the development of US nuclear policy and a window onto current debates over nuclear superiority, deterrence, and the future of American grand strategy.
