The Australian People James Jupp, 2001-10 Australia is one of the most ethnically diverse societies in the world today. From its ancient indigenous origins to British colonisation followed by waves of European then international migration in the twentieth century, the island continent is home to people from all over the globe. Each new wave of settlers has had a profound impact on Australian society and culture. The Australian People documents the dramatic history of Australian settlement and describes the rich ethnic and cultural inheritance of the nation through the contributions of its people. It is one of the largest reference works of its kind, with approximately 250 expert contributors and almost one million words. Illustrated in colour and black and white, the book is both a comprehensive encyclopedia and a survey of the controversial debates about citizenship and multiculturalism now that Australia has attained the centenary of its federation.

Becoming an African Diaspora in Australia F. Ndhlovu, 2014-07-08 Becoming an African Diaspora in Australia extends debates on identities, cultures and notions of race and racism into new directions as it analyses the forms of interactional identities of African migrants in Australia. It de-naturalises the commonplace assumptions and imaginations about the cultures and identities of African diaspora communities, and probes the relevance and usefulness of identity markers such as country of origin, nationality, ethnicity, ethnic/heritage language and mother tongue. Current cultural frames of identity representation have so far failed to capture the complexities of everyday lived experiences of transnational individuals and groups. Therefore by drawing on fresh concepts and recent empirical evidence, this book invites the reader to revisit and rethink the vocabularies that we use to look at identity categories such as race, culture, language, ethnicity, nationality, and citizenship, and introduces a new language nesting model of diaspora identity. This book will be of great interest to all students of migration, diaspora, African and Australian studies.

Evaluating Language Assessments Antony John Kunnan, 2017-07-06 Evaluating Language Assessments offers a comprehensive overview of the theoretical bases and research methodologies for the evaluation of language assessments and demonstrates the importance of a fuller understanding of this widely used evaluative tool. The volume explores language assessment evaluation in its wider political, economic, social, legal, and ethical contexts while also illustrating quantitative and qualitative methods through discussions of key research studies. Suitable for students in applied linguistics, second

language acquisition and language assessment and education, this book makes the case for a clear and rigorous understanding of the theoretical and methodological underpinnings of language assessment evaluation in order to achieve fair assessments and just institutions.

The Oxford Handbook of Language and Prejudice Jane Setter, Sender Dovchin, Vijay A. Ramjattan, 2025-09-25 This volume explores and rearticulates the relationship between language and prejudice. Language plays an important role in the conceptualization, enactment, and defence of prejudice at both the individual and institutional level. Language (and language users) can also be the object of prejudice, and language itself can - with some conditions - be thought of as a solution to prejudice. The chapters in the volume examine how prejudice manifests itself, how it is perceived, and how it might be combatted. Parts I - III cover linguistic prejudices relating to gender and sexuality, ableism, and race and ethnicity, while Parts IV - VI explore social issues, politics and religion, and educational perspectives. The final part looks at projects and initiatives to tackle linguistic prejudice in a range of contexts. While recent work in the field has tended to inadvertently construct knowledge according to normative and Northern epistemologies, this volume features contributions that also provide an understanding of linguistic prejudice from Global South perspectives.

Selling Sex Raelene Frances, 2007 Provides a history of prostitution in Australia from before European colonisation, and situates this history within an international context of labour migration and policy formation. This work draws on archival research and interviews to chart the ways in which prostitution contributed to women's economic survival and to colonisation.

A Legal History for Australia Sarah McKibbin, Libby Connors, Marcus Harnes, 2021-07-29 This is a contemporary legal history book for Australian law students, written in an engaging style and rich with learning features and illustrations. The writers are a unique combination of talents, bringing together their fields of research and teaching in Australian history, British constitutional history and modern Australian law. The first part provides the social and political contexts for legal history in medieval and early modern England and America, explaining the English law which came to Australia in 1788. This includes: The origins of the common law The growth of the legal profession The making of the Magna Carta The English Civil Wars The Bill of Rights The American War of Independence. The second part examines the development of the law in Australia to the present day, including: The English criminal justice system and convict transportation The role of the Privy Council in 19th century Indigenous Australia in the colonial period The federation movement Constitutional Independence The 1967 Australian referendum and the land rights movement. The comprehensive coverage of several centuries is balanced by a dynamic writing style and tools to guide the student through each chapter including learning outcomes, chapter outlines and discussion points. The historical analysis is brought to life by the use of primary documentary evidence such as charters,

statutes, medieval source books and Coke's reports, and a series of historical cameos - focused studies of notable people and issues from King Edward I and Edward Coke to Henry Parkes and Eddie Mabo - and constitutional detours addressing topics such as the separation of powers, judicial review and federalism. A Legal History for Australia is an engaging textbook, cogently written and imaginatively resourced and is supported by a companion website:

Australian Race Relations Andrew Markus, 1994-09-01 Australian Race Relations has been a subject of continuing controversy, whether focused on Aboriginal issues such as the High Court's Mabo decision, or the latest wave of immigrants. This book provides the historical context necessary for an understanding of contemporary issues in a society coming to terms with native title and multiculturalism. Based on over twenty years of research, Australian Race Relations is the first history of the subject that gives detailed consideration to both nineteenth and twentieth century developments. The book is particularly concerned with the broad patterns of race relations. It deals with the nature of racial consciousness, the dispossession of Aboriginal people, the role of racial minorities in the workforce, the eras of White Australia and assimilation, and contemporary society. Australian Race Relations will appeal to students of Australian history and society, and to everyone interested in the shape of modern Australia.
