Air Crash Investigations Allistair Fitzgerald, 2009-11 On January 31, 2000, Alaska Airlines, Flight 261, a McDonnell Douglas MD-83, was on its way from Puerto Vallarta, Mexico, to Seattle, Washington, when suddenly the horizontal stabilizer of the plane jammed. While passengers were praying for their life, Captain Thompson and First officer Tansky tried to make an emergency landing in Los Angeles. They did not make it, the plane suddenly crashed into the Pacific Ocean, killing all 93 people aboard. The NTSB concluded that the failure of the horizontal stabilizer was caused by insufficient maintenance. In other words the crash of Alaska Airlines Flight 261 could have been avoided.

Crisis Management Planning and Execution Edward S. Devlin, 2006-12-26 Crisis management planning refers to the methodology used by executives to respond to and manage a crisis and is an integral part of a business resumption plan. Crisis Management Planning and Execution explores in detail the concepts of crisis management planning, which involves a number of crises other than physical disaster. Defining th

Safer Skies David Soucie, 2015-02-17 The past and future of airline safety—a memoir of successes, crashes, and near misses—by a former FAA accident inspector. Boarding an airplane strikes at least a small sense of fear into most people. Even though we all have heard that the odds of being struck by lightning are greater than the odds of perishing in a plane crash, it still doesn't feel that way. Airplane crashes might be rare, but they do happen, and they're usually fatal. David Soucie insists that most of these deaths could be prevented. He's worked in the cockpit, on the hangar floor, within the aviation boardroom, and inside the Washington, DC, beltway. He's seen death up close and personal—deaths of colleagues and friends that might have been prevented if he had approved certain safety measures in the aircraft they were handling. Years of experience have led Dave to become an impassioned consultant on the topic of airline safety. This includes not only advising the Obama administration, but also the Department of Transportation, the Department of Defense, Homeland Security, NASA, and the Office of National Intelligence. Soucie was also a lead consultant and analyst for coverage of Malaysia Airlines Flight 370, which went missing in March 2014.
