## James Blish

**Cities in Flight** James Blish, 1991 *Cities in Flight* brings together the famed Okie novels of science fiction master James Blish. Named after the migrant workers of America's Dust Bowl, these novels convey Blish's history of the future, a brilliant story where cities roam the Galaxy looking for work and a sustainable way of life. In the first novel, *They Shall Have Stars*, man has thoroughly explored the Solar System, yet the dream of going even further seems to have died in all but one man. His battle to realize his dream results in two momentous discoveries--antigravity and the secret of immortality. In *A Life for the Stars*, it is centuries later and antigravity generations have enabled whole cities to lift off the surface of the earth to become galactic wanderers. In *Earthman, Come Home*, the nomadic cities revert to barbarism and marauding rogue cities begin to pose a threat to all civilized worlds. An armada of renegade cities attempts to destroy Earth, their ancient birthplace. In the final novel, *The Triumph of Time*, history repeats itself as the cities once again journey back in to space making a terrifying discovery which could destroy the entire Universe. A serious and haunting vision of our world and its limits, *Cities in Flight* marks the return to print on one of science fiction's masterpieces.

[Cities in Flight](#) James Blish, 2022-08-16 From the Hugo Award-winning author, the classic millennia-spanning epic in one volume: A wholly new concept of the far future. — The New York Times Originally published in four volumes, *Cities in Flight* brings together the famed Okie novels of science fiction master James Blish. Named after the migrant workers of America's Dust Bowl, these novels convey Blish's history of the future, a brilliant and bleak look at a world where cities roam the Galaxy looking for work and a sustainable way of life. In the first novel, *They Shall Have Stars*, humankind has thoroughly explored the solar system, yet the dream of going even farther seems to have died in all but one man. His battle to realize his dream results in two momentous discoveries: anti-gravity and the secret of immortality. In *A Life for the Stars*, it is centuries later and antigravity generations have enabled whole cities to lift off the surface of the earth to become galactic wanderers. In *Earthman, Come Home*, the nomadic cities revert to barbarism and marauding rogue cities begin to pose a threat to all civilized worlds. In the final novel, *The Triumph of Time*, history repeats itself as the cities once again journey back into space, making a terrifying discovery which could destroy the entire universe. A serious and haunting vision of our world and its limits, *Cities in Flight* marks a milestone in science fiction. Compelling . . . If you haven't read this yet, I envy you. Blish's cities will fly through your dreams. —Stephen Baxter In a century that brimmed with human short-sightedness, James Blish

was one of the very first genuine visionaries of a new millennium. —David Brin

**They Shall Have Stars** James Blish, 1968 What was the secret that lurked behind the stars? In the year 2018, man undertook the most stupendous project in human history--to build a bridge on Jupiter. In that frozen, raging, gaseous hell, the space men built a fantastic, colossal bridge--thirty miles high, eight miles wide, and always growing in its astounding length. What was the purpose of this incredible object? Only one man knew--and he possessed the most tormenting knowledge in the Universe.

*The Bridge* James Blish, 2013-04 Hugo and Nebula award winning author James Blish spins a fast paced, adventure story. The Bridge is building itself some thirty miles above the surface of Jupiter. Robert Helmuth and his crew are there to make sure that everything goes as planned with the bridge's construction. But when disaster strikes nothing could have prepared them for what was to come.

Cities in Flight James Blish, 2010

**James Blish SF Gateway Omnibus** James Blish, 2013 Best known for his Hugo Award-winning classic *A Case of Conscience*, Blish was one of the first serious SF writers to involve themselves with tie-in novels, writing eleven *Star Trek* adaptations as well as the first original adult *Star Trek* novel, *Spock Must Die*. This omnibus contains three of his long out-of-print works: *Black Easter*, *The Day After Judgement* and *The Seedling Stars*. **BLACK EASTER**: A gripping story about primal evil: a sinister intermingling of power, politics, modern theology, the dark forces of necromancy, and what proves, all too

terribly, not to be superstition. **THE DAY AFTER JUDGEMENT:** Develops and extends the characters from **BLACK EASTER**. It suggests that God may not be dead, or that demons may not be inherently self-destructive, as something appears to be restraining the actions of the demons upon Earth. **THE SEEDLING STARS:** You didn't make an Adapted Man with just a wave of the wand. It involved an elaborate constellation of techniques, known collectively as pantropy, that changed the human pattern in a man's shape and chemistry before he was born. And the pantropists didn't stop there. Education, thoughts, ancestors and the world itself were changed, because the Adapted Men were produced to live and thrive in the alien environments found only in space. They were crucial to a daring plan to colonize the universe.

*The Thing in the Attic* James Blish, 2015-08-24 A small group of intellectuals from a primitive culture of modified monkey-like humans are banished from the treetops for heresy. In their exile on the ground they have to adapt to vastly different circumstances, fight monsters resembling dinosaurs, and finally happen upon the godly giants, whose existence they had questioned.

*The Best of James Blish* James Blish, 1979

Imaginary Cities Darran Anderson, 2017-04-06 For as long as humans have gathered in cities, those cities have had their shining—or shadowy—counterparts. Imaginary cities, potential cities, future cities, perfect cities. It is as if the city itself, its inescapable gritty reality and elbow-to-elbow nature, demands we call into being some alternative, yearned-for better place. This book is about those cities. It's neither a history of grand plans nor a literary exploration of the utopian impulse, but rather something different, hybrid, idiosyncratic. It's a magpie's book, full of characters and incidents and ideas drawn from cities real and imagined around the globe and throughout history. Thomas More's allegorical island shares space with Soviet mega-planning; Marco Polo links up with James Joyce's meticulously imagined Dublin; the medieval land of Cockaigne meets the hopeful future of Star Trek. With Darran Anderson as our guide, we find common themes and recurring dreams, tied to the seemingly ineluctable problems of our actual cities, of poverty and exclusion and waste and destruction. And that's where *Imaginary Cities* becomes more than a mere—if ecstatically entertaining—intellectual exercise: for, as Anderson says, "If a city can be imagined into being, it can be re-imagined." Every architect, philosopher, artist, writer, planner, or citizen who dreams up an imaginary city offers lessons for our real ones; harnessing those flights of hopeful fancy can help us improve the streets where we live. Though it shares DNA with books as disparate as Calvino's *Invisible Cities* and Jane Jacobs's *Death and Life of Great American Cities*, there's no other book quite like *Imaginary Cities*. After reading it, you'll walk the streets of your city—real or imagined—with fresh eyes.

*Best Science Fiction Stories* James Blish, 1973

*Earthman, Come Home* James Blish, 1956 When the cities left Earth, they exchanged a simple environment for one of constant, sometimes shattering change. The Universe was littered with cultures in every conceivable stage of development.

Only the iron hand of the germanium-backed economy and occasional interventions by the Earth police imposed some kind of order on the spaceways. Even John Amalfi never got used to the life - and he had been mayor of New York for nearly five hundred years now.--Goodreads.com

**Future Cities** Paul Dobraszcyk,2025-03-15 Brings together architecture, fiction, film, and visual art to reconnect the imaginary city with the real, proposing a future for humanity that is firmly grounded in the present and the diverse creative practices already at our fingertips. Though reaching ever further toward the skies, today's cities are overshadowed by multiple threats: climate change, overpopulation, social division, and urban warfare all endanger our metropolitan way of life. The fundamental tool we use to make sense of these uncertain city futures is the imagination. Architects, artists, filmmakers, and fiction writers have long been inspired to imagine cities of the future, but their speculative visions tend to be seen very differently from scientific predictions: flights of fancy on the one hand versus practical reasoning on the other. In a digital age when the real and the fantastic coexist as near equals, it is especially important to know how these two forces are entangled, and how together they may help us best conceive of cities yet to come. Exploring a breathtaking range of imagined cities—submerged, floating, flying, vertical, underground, ruined, and salvaged—Future Cities teases out the links between speculation and reality, arguing that there is no clear separation between the two. In the Netherlands, prototype floating cities are already being built; Dubai's recent skyscrapers resemble those of science-fiction cities of the past; while makeshift settlements built by the urban poor in the developing world are already like the dystopian cities of cyberpunk.

**Fallen Star** James Blish,1983

**Galactic Cluster** James Blish,1960

**One Shot** James Blish,2019-03-04 (Excerpt): You can do a great deal if you have enough data, and enough time to compute on it, by logical methods. But given the situation that neither data nor time is adequate, and an answer must be produced ... what do you do?.

**A Case of Conscience** James Blish,2017-01-24 A space-traveling Jesuit priest confronts a moral but godless alien race in this Hugo Award-winning novel by the author of the Cities in Flight saga. Father Ruiz-Sanchez is a dedicated man, a Jesuit priest who is also a scientist, and a scientist who is also a human being. He doesn't feel any genuine conflicts in his belief system—until he is sent to Lithia. The reptilian inhabitants of this distant world appear to be admirable in every way. Untroubled by greed or lust, they live in peace. But they have no concept of God, no literature, and no art. They rely purely on cold reason. But something darker lies beneath the surface: Do the Lithians pose a hidden threat? The answers that unfold could affect the fate of two worlds. Will Ruiz-Sanchez, a priest driven by his deeply human understanding of good and evil, do the right thing when confronted by a race that is alien to its core? The Science Fiction Encyclopedia lauds A Case of Conscience as “one of the first serious attempts to deal with religion [in science fiction], and [it] remains one of the most

sophisticated. It is generally regarded as an SF classic.” Readers of Isaac Asimov’s Foundation Trilogy, Mary Doria Russell’s The Sparrow, or Walter M. Miller Jr.’s A Canticle for Leibowitz will find this award-winning novel a gripping, compelling exploration of some of the most intractable and important questions faced by the human species. Includes an introduction by Hugo and Nebula Award-winning author Greg Bear.
