Multidimensional development of student-athletes: new perspectives on dual-career Ricardo Quinaud,Mojca Doupona,Laura Capranica,Flavia Guidotti,2025-10-27 Over the past decades, the investigation of the dual-career phenomenon among student-athletes has witnessed noteworthy advancements. It is well known the demands and challenges to achieve a mastery elite performance in sport combined with academic commitments. However, studies have reported segmented information on it, mostly due to the difficulty of investigating those several aspects that influence the development of a dual-career and the perspective of adopting a unidimensional view. Consequently, there is a pressing need to embrace a comprehensive, multidimensional view to prepare them for any future that they can be expecting. Such an encompassing perspective is paramount in discerning their requisites and proactively equipping them for the diverse range of future possibilities they may encounter. A singular viewpoint, bereft of a holistic purview, may engender misapprehensions about their dual-career trajectories. In light of this, we want to encourage researchers to combine their knowledge with the practical context lived by millions of student-athletes all over the world. Thus, our goal with this special issue is to bring the most recent advances in student-athlete dual-career and look forward to how all this knowledge can improve student-athlete development worldwide from a multidimensional perspective. In order to achieve these goals, we encourage manuscripts on any of the following topics: - Student-athletes dual-career transitions; - sports policies and legislation on student-athletes dual-career; - sports management on student-athletes dual-career; - psychological measures on student-athletes dual-career; - paralympic student-athlete dual-career; - student-athletes dual-career programs and environments; - student-athletes dual-career supporters; - measures of sport and educational demands and loadings on student-athletes dual-career; - worker-athletes dual-career; - methodological approaches, designs and gaps in research into student-athletes dual-career.

New Advances on Zika Virus Research Luis Martinez-Sobrido,Fernando Almazan Toral,2019-04-02 Zika virus (ZIKV) is a mosquito-borne member of the Flaviviridae family that historically has been associated with mild febrile illness. However, the recent outbreaks in Brazil in 2015 and its rapid spread throughout South and Central America and the Caribbean,

together with its association with severe neurological disorders—including fetal microcephaly and Guillain-Barré syndrome in adults—have changed the historic perspective of ZIKV. Currently, ZIKV is considered an important public health concern that has the potential to affect millions of people worldwide. The significance of ZIKV in human health and the lack of approved vaccines and/or antiviral drugs to combat ZIKV infection have triggered a global effort to develop effective countermeasures to prevent and/or treat ZIKV infection. In this Special Issue of Viruses, we have assembled a collection of 32 research and review articles that cover the more recent advances on ZIKV molecular biology, replication and transmission, virus-host interactions, pathogenesis, epidemiology, vaccine development, antivirals, and viral diagnosis.

Devotional Music in the Iberian World, 1450-1800 Tess Knighton,2017-07-05 From the fifteenth century to the beginning of the nineteenth century, devotional music played a fundamental role in the Iberian world. Songs in the vernacular, usually referred to by the generic name of 'villancico', but including forms as varied as madrigals, ensaladas, tonos, cantatas or even oratorios, were regularly performed at many religious feasts in major churches, royal and private chapels, convents and in monasteries. These compositions appear to have progressively fulfilled or supplemented the role occupied by the Latin motet in other countries and, as they were often composed anew for each celebration, the surviving sources vastly outnumber those of Latin compositions; they can be counted in tens of thousands. The close relationship with secular genres, both musical, literary and performative, turned these compositions into a major vehicle for dissemination of vernacular styles throughout the Iberian world. This model of musical production was also cultivated in Portugal and rapidly exported to the Spanish and Portuguese colonies in America and Asia. In many cases, the villancico repertory represents the oldest surviving source of music produced in these regions, thus affording it a primary role in the construction of national identities. The sixteen essays in this volume explore the development of devotional music in the Iberian world in this period, providing the first broad-based survey of this important genre.

Reverse Design Ana Cristina Broega,Joana Cunha,Helder Carvalho,Manuel Blanco,Guillermo García-Badell,Diana Lucía Gómez-Chacón,2018-09-25 The collaboration between the Textile Department of the University of Minho and the Brazilian Association of Studies and Research (ABEPEM) has led to an international platform for the exchange of research in the field of Fashion and Design: CIMODE. This platform is designed as a biennial congress that takes place in different European and Latin American countries with the co-organization of another university in each location. The current edition was jointly organized by the University of Minho and the Centro Superior de Diseño de Moda (CSDMM) - Universidad Politécnica de

Madrid. CIMODE's mission is to explore fashion and design from a social, cultural, psychological and communication perspective, and to bring together different approaches and perceptions of practice, education and the culture of design and fashion. Through an interdisciplinary dialogue and intercultural perspective, CIMODE wants to generate and present new scenarios about the present and future of fashion and design. 'DISEÑO AL REVÉS' ('BACKWARD DESIGN') was the central theme of the 4th CIMODE (Madrid, Spain, 21-23 May 2018), which produced a highly topical and relevant number of academic publications presented in this book.

Immunogenetics in times of COVID-19 pandemic Alberto López-Reyes, Aranzazu Mediero , Gabriela Angélica Martínez-Nava, 2025-11-11 Throughout the history of humanity, we have managed to observe the aggressiveness of certain viruses that have claimed the lives of millions of individuals. However, most of the viruses we coexist with go unnoticed by most of us. This phenomenon is explained mostly by the individual's immunogenetics, which is an essential part of evolution. Immunogenetics has provided a deep understanding of fundamental biological processes. Advances in this field have helped to understand the main histocompatibility complex functions and how this could help in medical procedures. To date, polygenic studies assessing the combined gene effects show the importance of implementing a systemic approach to evaluate the immune system response to infections caused by pathogens such as viruses. Given the importance of the current COVID-19 pandemic, it is important to generate a special topic that allows us to compile the most relevant original studies and review articles on this topic. The goal of this topic is to gather scientific evidence that allows us to understand why the immune genome of each individual responds differently to SARS-CoV-2 infection. Additionally, this topic will allow the identification of gene variants that can be considered as biomarkers for predicting the outcome of COVID-19. The scientific evidence published on this topic might contribute to the diagnostic approach and therapeutic intervention for patients at high risk of developing critical outcomes of COVID-19. Scientific evidence and research articles are required to elucidate how clinical and genetic scenarios contribute to differentiating the outcome of patients infected by SARS CoV-2. Therefore, it is important to investigate the involvement of gene variants in molecular mechanisms related to: 1. SARS-CoV-2 infection 2. Myddosome Assembly 3. Antigen Processing 4. Antigen Presentation 5. Inflammasome Assembly 6. Cytokines 7. Immune Synapse 8. Pyroptosis
