Ensayos sobre economía cooperativa, solidaria y autogestionaria Raúl González, La idea de una economía cooperativa, solidaria, asociativa, autogestionaria ha formado parte de un ideario crítico de los procesos de modernización dominantes. Distintas vertientes del cristianismo social, comunitarismo, socialismo democrático y descentralizado, liberalismo social, anarquismo y más recientemente del ecologismo y de las referencias indígenas sobre el buen vivir, expresan a través de aquella economía, sus propósitos libertarios y de formas de convivencia social. Otros modos de producir, distribuir y consumir son componentes claves para construir relaciones sociales y con la naturaleza, que abran alternativas a un “capitalismo real” y a un credo liberal que nos leen como “homo economicus”, competitivos e insaciables y que crean las instituciones para convertirnos en ese constructo. Esas alternativas existen en y desde el presente y su fomento, práctico e ideológico, permite bosquejar una economía plural que abra espacios anchos a expresar y experimentar racionalidades y sentires, como los que destaca el título de este libro.

The Book of Job, on Unconscious Responsibility Jose Antonio Alvarez Caperochipi,2025-11-14 Through a multidisciplinary reading—yet grounded in civil and criminal law—this book analyzes the theories of guilt and responsibility in Job’s debate with his friends and in his responses to the theophanies. The biblical text thus becomes a debate on the foundations of legal organization and the relationship between law and religion. The essay is offered from a rational and secular perspective, with no prior religious dogma, while remaining respectful of religion as one of humanity’s deepest intellectual and artistic achievements. The work interprets the book of Job as a critique of the doctrines of sacrifice and submission as the foundations of religion. The book of Job poses an allegory of Jewish dilemma after the fall of the Persian Empire, when the morality of collective guilt entered into crisis and divine justice is rethought in terms of personal responsibility. This perspective is justified on a commentary of Jewish sources and their influence on the development of Christian and secular thought. Job, his friends, Satan, Job’s wife, and the theophanies embody legal and ethical tensions still relevant today: collective versus personal guilt, sacrifice versus justice, social organization versus individual freedom.

Seguridad Humana Karlos Pérez de Armiño, Irantzu Mendia Azkue, Jessica Almqvist, Ricardo Arredondo, Cristina Churruza Muguruza, Oriol Costa, Alfonso Dubois Migota, Carlos Espósito, Itziar Ruiz-Giménez Arrieta, Silvia Roque, Dominique Saillard, José Antonio Sanahuja Perales, Julia Schünemann, José María Tortosa Blasco, 2013-07-29 ¿Es la seguridad humana un concepto aún útil para el análisis teórico crítico y las políticas transformadoras? Surgida en 1994, ha contribuido a desafiar la visión tradicional de la seguridad, estatal y militar, para centrarse en la de las personas, en su desarrollo humano y sus derechos. Así, ha sido abrazada por diferentes círculos que aprecian su carácter normativo inspirador de políticas progresistas. Sin embargo, ha sido también cuestionada por su debilidad teórica, su escasa crítica al statu quo internacional, y su instrumentalización al servicio de la agenda de paz liberal hegemónica. Así, cabe preguntarse si no ha llegado la hora de desestimarla por resultar estéril para la academia y la política, o si, por el contrario, es oportuno revitalizar algunas de sus potencialidades latentes para promover las necesidades, los derechos y la seguridad de las personas. Para contribuir a tal debate, los diferentes capítulos de este libro profundizan en tres dimensiones de la seguridad humana: el contexto internacional, su conceptualización y su operacionalización política. Además, en particular, exploran la relación que existe entre la seguridad humana y ámbitos como son los estudios críticos de seguridad, la agenda política internacional, los derechos humanos, el desarrollo humano, las relaciones de género, la seguridad medioambiental o la construcción de la paz.

Orden contrainsurgente y dominación Vilma Liliana Franco Restrepo, 2009 Una reflexión sobre la estructura de la lucha contrainsurgente en Colombia y su función en la configuración, conservación y reproducción del orden. Desentraña la lógica argumentativa de los discursos que justifican la guerra contrainsurgente, demostrando su naturaleza preventiva y punitiva. A partir de ello analiza la restauración de la seguridad y la construcción social del odio como factores subjetivos de movilización social contra lo insurgente y el afán de conservación del poder, expresado en la custodia de la propiedad, como factor objetivo de la guerra.

Culture, Environment and Health in the Yucatan Peninsula Hugo Azcorra, Federico Dickinson, 2019-12-11 This book adopts a human ecology approach to present an overview of the biological responses to social, political, economic, cultural and environmental changes that affected human populations in the Yucatan Peninsula, Mexico, since the Classic Maya Period. Human bodies express social relations, and we can read these relations by analyzing biological tissues or systems, and by measuring certain phenotypical traits at the population level. Departing from this theoretical premise, the contributors to this volume analyze the interactions between ecosystems, sociocultural systems and human biology in a specific geographic region to show how changes in sociocultural and natural environment affect the health of a population over time. This edited volume brings together contributions from a range of different scientific disciplines – such as biological anthropology, bioarchaeology, human biology, nutrition, epidemiology, ecotoxicology, political economy, sociology and ecology – that analyze the interactions between culture, environment and health in different domains of human life, such as: The political ecology of food, nutrition and health Impacts of social and economic changes in children’s diet and women’s fertility Biological consequences of social vulnerability in urban areas Impacts of toxic contamination of natural resources on human health Ecological and sociocultural determinants of infectious diseases Culture, Environment and Health in the Yucatan Peninsula – A Human Ecology Perspective will be of interest to researchers from the social, health and life sciences dedicated to the study of the interactions between natural environments, human biology, health and social issues, especially in fields such as biological and sociocultural anthropology, health promotion and environmental health. It will also be a useful tool to health professionals and public agents responsible for designing and applying public health policies in contexts of social vulnerability.
