Aspects of Culture in Second Language Acquisition and Foreign Language Learning Janusz Arabski,Adam Wojtaszek,2011-08-27 In recent years language learning has been increasingly viewed by some SLA researchers as an essentially social-psychological process in which the role of a wider sociocultural context should not be marginalized. This volume offers a valuable contribution to this growing body of research by providing theoretical considerations and empirical research data on themes such as the development of intercultural communicative competence, the role of English as a lingua franca in intercultural communication, and the place of cultural factors in SLA theorizing, research, second/foreign language teaching and teacher training. The volume also contains contributions which share the linguistic interest in the culture-related concepts and constructs such as time, modesty, politeness, and respect, discussing the culture-dependent differences in conceptualization and their reflection in particular language forms and linguistic devices.

Community-Based Language Learning Joan Clifford,Deborah S. Reisinger,2018-12-03 Community-based Language

Learning offers a new framework for world language educators interested in integrating community-based language learning (CBLL) into their teaching and curricula. CBLL connects academic learning objectives with experiential learning, ranging from reciprocal partnerships with the community (e.g., community engagement, service learning) to one-directional learning situations such as community service and site visits. This resource prepares teachers to implement CBLL by offering solid theoretical frameworks alongside real-world case studies and engaging exercises, all designed to help students build both language skills and authentic relationships as they engage with world language communities in the US. Making the case that language learning can be a tool for social change as well, Community-based Language Learning serves as a valuable resource for language educators at all levels, as well as students of language teaching methodology and community organizations working with immigrant populations.

Literacy Essentials Regie Routman,2023-10-10 In her practical and inspirational book, Literacy Essentials: Engagement, Excellence, and Equity for All Learners, author Regie Routman guides K-12 teachers to create a trusting, intellectual, and equitable classroom culture that allows all learners to thrive as self-directed readers, writers, thinkers, and responsible citizens. Over the course of three sections, Routman provides numerous Take Action ideas for implementing authentic and responsive teaching, assessing, and learning. This book poses a key question: How do we rise to the challenge of providing an engaging, excellent, equitable education for all learners, including those from high poverty and underserved schools? Teaching for Engagement: Many high performing schools are characterized by a a thriving school culture built on a network of authentic communication. Teachers can strengthen classroom engagement by building a trusting and welcoming environment where all students can have a safe and collaborative space to grow and develop. Pursuing Excellence: Routman identifies 10 key factors that describe an excellent teacher, ranging from intellectual curiosity to creativity, and explains how carrying yourself as a role model contributes to an inclusive, caring, empathic, and fair classroom. She also stresses the importance for school leaders to make job-embedded professional development a top priority. Dismantling Unequal Education: The huge gap in the quality of education in high vs low income communities is the civil rights issue of the 21st century, according to Routman. She spells out specific actions educators can take to create more equitable schools and

classrooms, such as diversifying texts used in curriculums and ensuring all students have access to opportunities to discuss, reflect, and engage with important ideas. From the author, I wrote Literacy Essentials, because I saw a need to simplify teaching, raise expectations, and make expert teaching possible for all of us. I saw a need to emphasize how a school culture of kindness, trust, respect, and curiosity is essential to any lasting achievement. I saw a need to demonstrate and discuss how and why the beliefs, actions, knowledge we hold determine the potential for many of our students. Equal opportunity to learn depends on a culture of engagement and equity, which under lies a relentless pursuit of excellence.

Simulation for Participatory Education M. Laura Angelini,Rut Muñiz,2023-09-30 This textbook explores the use of simulation within the context of education and internationalization. Simulation is broken down into its phases and these elements are discussed by experts, most of whom have long tradition in the application of simulation. Simulation is treated with references to the specific needs of practitioners, educators and researchers in initiating and developing simulation in different fields of study, with specific reference to teacher education. This volume focuses on presenting simulation as a means to facilitating students' openness to complexity and development of intercultural skills through virtual exchange. Thus, it provides educators and researchers with a conceptual and practical resource that tackles the critical role of cognitive and metacognitive complexity in the education of future global professionals through intercultural pedagogy. By tracing the roots of simulation and outlining a framework to support professional learning through experiential-based research, this textbook will prove invaluable for teacher trainers, practitioners and researchers interested in simulation.

English for Specific Purposes in Higher Education through Content and Language Integrated Learning Elena Kováčiková,2020-03-04 English language teaching (ELT) in higher education serves mainly to enhance the professional language competences of students. It can take several forms, including English for Specific Purposes (ESP) and Academic English (AE). The objectives of ESP courses in higher education are to prepare students for their professional lives by developing communicative language skills. Content and Language Integrated Learning (CLIL) methodology offers the potential to combine the learning of a foreign language with the content of professional subjects. Moreover, it also offers a new dimension in thinking and deepening foreign language competences within non-linguistic subjects. These aspects contribute towards ELT modernization with the aim of developing a learner's autonomy and building bridges between educational institutions and the professional world. This book focuses on applying CLIL methodology within the context of ESP classes, highlighting the possible benefits that might be applicable in any higher educational institution.
