

Holism Meaning In Philosophy

Fabian Amtenbrink, Gareth Davies, Dimitry Kochenov, Justin Lindeboom

Holism Jerry Fodor, 1992 The main question addressed in this book is whether individuation of the contents of thoughts and linguistic expressions is inherently holistic. The authors consider arguments that are alleged to show that the meaning of a scientific hypothesis depends on the entire theory that entails it, or that the content of a concept depends on the entire belief system of which it is part. If these arguments are sound then it would follow that the meanings of words, sentences, hypotheses, predictions, discourses, dialogs, texts, thoughts and the like are merely derivative. The implications of holism about meaning for other philosophical issues (intentional explanation, translation, Realism, skepticism, etc.) will also be explored. Authors discussed include Quine, Davidson, Lewis, Bennett, Block, Field, Churchland, and others. The book is intended for all those interested in language, mind, metaphysics or epistemology.

Holism in Philosophy of Mind and Philosophy of Physics M. Esfeld, 2013-03-09 The Scope of the Project The concept of holism is at the centre of far-reaching changes in various areas of philosophy in the second half of the twentieth century. Holism in epistemology and the philosophy of mind is widespread among analytic philosophers subsequent to the work of the later Wittgenstein and to Quine's Two Dogmas of Empiricism. Roughly speaking, the claim is that (a) for a person to have beliefs, a social, linguistic community is required and that (b) single beliefs have a meaning only within a whole system of beliefs. Furthermore, holism is discussed in science, in particular in the interpretation of quantum physics. In fact, the term holism goes back to Smuts (1926), who introduces this term in a biological context. Holism in any of these areas has considerable consequences for our philosophical view of the world and ourselves. Holism in quantum physics is said to refute atomism, which has been predominant in modern philosophy of nature. Holism in epistemology and the philosophy of mind is seen as an alternative to what is known as the Cartesian tradition, which dominated modern thought down to logical empiricism.

Donald Davidson and the Mirror of Meaning Jeff Malpas, 1992-10-29 This book discusses the ideas of Donald Davidson, on the nature of understanding and meaning, and the nature of truth and knowledge, providing an account of Davidson's holistic and hermeneutical conception of linguistic interpretation, and, more generally, of the mind.

Mind, Meaning and World Ramesh Chandra Pradhan, 2019-04-25 The present book intends to approach the problem of mind, meaning and consciousness from a non-naturalist or transcendental point of view. The naturalization of consciousness has reached a dead-end. There can be no proper solution to the problem of mind within the naturalist framework. This work intends to reverse this trend and bring back the long neglected transcendental theory laid down by Kant and Husserl in the West and Vedanta and Buddhism in India. The novelty of this approach lies in how we can make an autonomous space for mind and meaning without denying its connection with the world. The transcendental theory does not disown the embodied nature of consciousness, but goes beyond the body in search of higher meanings and values. The scope of this work extends from mind and consciousness to the world and brings the world into the space of mind and meaning with a hope to enchant the world. The world needs to be retrieved from the stranglehold of scientism and naturalism. This book will dispel the illusion about naturalism which has gripped the minds of our generation. The researchers interested in the philosophy of mind and consciousness can benefit from this work.

Context Dependence in Language, Action, and Cognition Tadeusz Ciecierski, Paweł Grabarczyk, 2021-01-18 The phenomenon of context dependence is so multifaceted that it is tempting to classify it as heterogeneous. It is especially evident in the case of the difference between context dependence as understood in the philosophy of language and context dependence as understood in the philosophy of mind. One of the aims of the present volume is to show that as varied as the phenomenon of context dependence is, the similarities between its different manifestations are profound and undeniable. More importantly, as evidenced in a number of papers presented on the subsequent pages of this volume, a broad perspective on the phenomenon of context dependence helps us to re-apply theories devised for one of the subfields of philosophy to the other subfields. Since the connections and analogies between many uses of contextualism may not be initially obvious, keeping an open perspective and the willingness to learn from the work of others may sometimes be crucial for finding new, satisfactory solutions.

Meaning Holism Kelly M. Becker, 1999

Holism--a Philosophy for Today Harry Settanni,1990 This book deals with the necessity for a revival of an ancient philosophical world-view, the world-view of holism, in order to solve current global problems. Today, worldwide problems such as the threat of nuclear war and environmental destruction, poverty, and drug-related crime demand a global approach. Such a global approach is found in holism, the philosophy which claims that reality is an interconnected, interdependent whole, which radically changes the nature of each element within it. The author applies the holistic approach to the natural and social sciences, to art and religion, and then traces holism back to its roots in philosophy.

Acquaintance, Ontology, and Knowledge Fred Wilson,2013-05-02 These essays bring together forty years of work in ontology. Intentionality, negation, universals, bare particulars, tropes, general facts, relations, the myth of the 'myth of the given', are among the topics covered. Bergmann, Quine, Sellars, Russell, Wittgenstein, Hume, Bradley, Hochberg, Dummett, Frege, Plato, are among the philosophers discussed. The essays criticize non-Humean notions of cause; they criticize the notion that besides simple atomic facts there are also negative facts and general facts. They defend a realism of properties as universals, against nominalism; bare particulars; a (qualified) realism with regard to logical form; a Russellian account of relations; and an account of minds and intentionality, which is opposed to materialism, but is also a form of (methodological) behaviourism. In general, the ontology is one of logical atomism and empiricist throughout, rooted in a Principle of Acquaintance.

Information Seeking and Subject Representation Birger Hjørland,1997-07-16 Information science has for a long

time been drawing on the knowledge produced in psychology and related fields. This is reasonable, for the central issue in information science concerns individual users navigating information spaces such as libraries, databases, and the Internet. Thus, information seeking is the fundamental problem in information science, while other problems, such as document representation, are subordinate. This book proposes a general theory of information seeking as a theoretical basis for information science. The volume begins with an examination of subject representation and retrieval. It then considers subject analysis and the organization of knowledge, the interpretational processes by which documents are analyzed, and their explicit subject retrieval data are created. Existing theories are then criticized from four epistemological perspectives, and the author argues that information science should be based on methodological collectivism, in which society, rather than the individual, determines the meaning of knowledge. The work then analyzes information seeking as a methodologically collectivistic activity. The volume begins with an examination of subject representation and retrieval.
