**Philosophy Before Socrates** Richard D. McKirahan, 2011-03-15 Since its publication in 1994, Richard McKirahan's *Philosophy Before Socrates* has become the standard sourcebook in Presocratic philosophy. It provides a wide survey of Greek science, metaphysics, and moral and political philosophy, from their roots in myth to the philosophers and Sophists of the fifth century. A comprehensive selection of fragments and testimonia, translated by the author, is presented in the context of a thorough and accessible discussion. An introductory chapter deals with the sources of Presocratic and Sophistic texts and the special problems of interpretation they present. In its second edition, this work has been updated and expanded to reflect important new discoveries and the most recent scholarship. Changes and additions have been made throughout, the most significant of which are found in the chapters on the Pythagoreans, Parmenides, Zeno, Anaxagoras, and Empedocles, and the new chapter on Philolaus. The translations of some passages have been revised, as have some interpretations and discussions. A new Appendix provides translations of three Hippocratic writings and the Derveni papyrus.

*An Aristotelian Account of Induction* Louis F. Groarke, 2009-11-01 In *An Aristotelian Account of Induction* Groarke discusses the intellectual process through which we access the first principles of human thought - the most basic concepts, the laws of logic, the universal claims of science and metaphysics, and the deepest moral truths. Following Aristotle and

others, Groarke situates the first stirrings of human understanding in a creative capacity for discernment that precedes knowledge, even logic. Relying on a new historical study of philosophical theories of inductive reasoning from Aristotle to the twenty-first century, Groarke explains how Aristotle offers a viable solution to the so-called problem of induction, while offering new contributions to contemporary accounts of reasoning and argument and challenging the conventional wisdom about induction.

*Spirit and Reason* Dale Launderville, 2007 Ezekiel's symbolic thinking is an integrative rationality in which reason is regarded as operating within the heart through the empowerment and guidance of the Spirit.

**Leadership and Rhetoric** M. Todd Bates, 2025-12-03 Rhetoric is not about communication tips or slick methods for grabbing attention. It is, rather, a skill of understanding the point at issue in complex moments, seeing a solution, and moving people to the most desirable future. Connecting classic works of rhetoric to contemporary studies of leadership, this book draws from the long history and wisdom of rhetoric that has proven effective in the dynamic ambiguities of the leadership context. It clarifies how these works help leaders shape their environments through words — interpreting complex circumstances, framing experiences that provide group understanding, and creating a basis for structured action. From its inception, rhetoric has been about attunement to particular circumstances and recognizing the constraints and obstacles that present opportunities for the perceptive leader who can see and articulate ways of moving people forward to a more desirable future. This book makes an explicit connection between classic works and current ideas of rhetorical leadership, a growing area of higher education and research in leadership studies.

*Shaman and Sage* Michael Horton, 2024-05-28 The first volume of Michael Horton's magisterial intellectual history of "spiritual but not religious" as a phenomenon in Western culture Discussions of the rapidly increasing number of people identifying as "spiritual but not religious" tend to focus on the past century. But the SBNR phenomenon and the values that underlie it may be older than Christianity itself. Michael Horton reveals that the hallmarks of modern spirituality—autonomy, individualism, utopianism, and more—have their foundations in Greek philosophical religion. Horton makes the case that the development of the shaman figure in the Axial Age—particularly its iteration among Orphists—represented a "divine self." One must realize the divinity within the self to break free from physicality and become one with a panentheistic unity. Time and time again, this tradition of divinity hiding in nature has arisen as an alternative to monotheistic submission to a god who intervenes in creation. This first volume traces the development of a utopian view of the human individual: a divine soul longing to break free from all limits of body, history, and the social and natural world. When the second and third volumes are complete, students and scholars will consult *The Divine Self* as the authoritative guide to the "spiritual but not religious" tendency as a recurring theme in Western culture from antiquity to the present.

**Beyond Elemental Loss** Marjolein Oele, 2025-04-01 Offers an important and innovative contribution to environmental

philosophy by investigating loss in times of anthropogenic climate change through the elements of water, fire, air, and earth. Beyond Elemental Loss offers an important and innovative contribution to environmental philosophy by investigating loss in times of anthropogenic climate change through the elements of water, fire, air, and earth. Marjolein Oele argues that the current experience of loss prompts a reassessment of the conventional meaning and conceptualization of loss. She proposes that such loss is best understood through infinitesimal, diachronic shifts occurring in the elemental constellations that structure the world-water, fire, air, and earth-and humanity's incremental inability to cognitively and affectively make sense of this world increasingly transformed by anthropogenic forces. Through a generous yet critical reading of a broad range of interdisciplinary sources tracing changes in our relationship to the elemental over time, Oele's scholarship plumbs the history of philosophy as much as it pulls from Indigenous philosophies, continental thought, mythologies, anthropological and historical sources, science, and ecology. The book's argumentative arc ultimately directs our attention toward constructive transformations in our cognitive and affective habits, and it argues that trust can bring us beyond elemental loss.

**Light Against Darkness** Armin Lange, Eric M. Meyers, Randall Styers, 2010-11-17 Light Against Darkness is comprised of articles that put on display the power and pervasiveness of dualistic thought. Dualism has proved a potent cultural tool for clarifying and ordering reality. Particularly in times of social stress and psychological insecurity, it can offer a valuable conceptual grid that provides orientation to the world and a clear sense of identity. At the same time, though, there are important questions to be asked about the social effects of binary thinking. As history amply illustrates, dualistic notions can readily be deployed to legitimate cultural demonization and to rationalize violence. At a deeper level, a dualist worldview can also obscure the possibilities to be found in multiplicity. The articles in this volume treat Dualism across a wide historical spectrum and from multiple methodological perspectives. The studies are organized around the religious and cultural contexts of Ancient Judaism and they include contributions from leading voices on ancient Persia, Israel, Greece, and Egypt. Experts on modern religious and philosophical thought not only lend context to concepts applied to the ancient world, but engage recent European and American experiments in binary thought. All of the studies contribute to a richer and more complete portrait of dualism in ancient Judaism.

**An Ontological Study of Death** Sean Moore Ireton, 2007 Examines conceptions of death as manifested in German literature and philosophy expanding on thanatological theories that distinguish between a metaphysical and an ontological view of human finitude. This book addresses the French philosophical treatment of death by Blanchot, Kojève, and others in the wake of their German predecessors.

**Astray** Eluned Summers-Bremner, 2023-06-07 A meandering celebration of the indirect and unforeseen path, revealing that to err is not just human—it is everything. This book explores how, far from being an act limited to deviation from known pathways or desirable plans of action, wandering is an abundant source of meaning—a force as intimately involved in the

history of our universe as it will be in the future of our planet. In ancient Australian Aboriginal cosmology, in works about the origins of democracy and surviving disasters in ancient Greece, in Eurasian steppe nomadic culture, in the lifeways of the Roma, in the movements of today's refugees, and in our attempts to preserve spaces of untracked online freedom, wandering is how creativity and skills of adaptation are preserved in the interests of ongoing life. *Astray* is an enthralling look at belonging and at notions of alienation and hope.

**The Four Elements in Plato's Timaeus** John A. Black, 2000 This work explores a puzzling aspect of Plato's treatment, in *Timaeus*, of the geometry of the four elements. The four elements conceived in the Timaeian manner consist of atoms of the same shape as four of the five regular solids.

**Language, Ethics, and Ontology** Douglas W. Shrader, 1998

Early Greek Philosophy Joe McCoy, 2013 The philosophy of the Presocratics still governs scholarly discussion today. This important volume grapples with a host of philosophical issues and philological and historical problems inherent in interpreting Presocratic philosophers.

*Openness, Secrecy, Authorship* Pamela O. Long, 2004-08-18 A history of the book and intellectual property that includes military technology and military secrets. Winner of The Morris D. Forkosch Prize from the Journal of the History of Ideas In today's world of intellectual property disputes, industrial espionage, and book signings by famous authors, one easily loses sight of the historical nature of the attribution and ownership of texts. In *Openness, Secrecy, Authorship: Technical Arts and the Culture of Knowledge from Antiquity to the Renaissance*, Pamela Long combines intellectual history with the history of science and technology to explore the culture of authorship. Using classical Greek as well as medieval and Renaissance European examples, Long traces the definitions, limitations, and traditions of intellectual and scientific creation and attribution. She examines these attitudes as they pertain to the technical and the practical. Although Long's study follows a chronological development, this is not merely a general work. Long is able to examine events and sources within their historical context and locale. By looking at Aristotelian ideas of Praxis, Techne, and Episteme. She explains the tension between craft and ideas, authors and producers. She discusses, with solid research and clear prose, the rise, wane, and resurgence of priority in the crediting and lionizing of authors. Long illuminates the creation and re-creation of ideas like trade secrets, plagiarism, mechanical arts, and scribal culture. Her historical study complicates prevailing assumptions while inviting a closer look at issues that define so much of our society and thought to this day. She argues that a useful working definition of authorship permits a gradation of meaning between the poles of authority and originality, and guides us through the term's nuances with clarity rarely matched in a historical study.

**The Edinburgh Companion to Ancient Greece and Rome** Edward Bispham, Thomas J. Harrison, Brian A. Sparkes, 2006 The *Edinburgh Companion*, newly available in paperback, is a gateway to the fascinating worlds of ancient

Greece and Rome. Wide-ranging in its approach, it demonstrates the multifaceted nature of classical civilisation and enables readers to gain guidance.

**In the Age of Al-Fārābī** Peter Adamson, 2008 Contains papers that cover a conference held at the Warburg Institute in 2006 to consider the philosophy of al-Farabi alongside other intellectual developments of his time, together with a wide range of other figures and traditions from the period.
