Fire and Flammability of Furnishings and Contents of Buildings Andrew J. Fowell, 1994

Heritage Covenants & Preservation Michael McMordie, Frits Pannekoek, 2004 Urban planners, government officials, and preservation activists are increasingly at odds as every day more and more heritage buildings are threatened with destruction to make way for urban development and revitalization. Stakeholders in these often emotionally and politically charged debates have arrived at what is potentially a solution that can satisfy all parties in the equation. Heritage covenants are a complex legal instrument involving the sale or donation of a heritage interest to a not-for-profit organization or government agency. In an unprecedented initiative, the Calgary Civic Trust, in the year 2000, brought together experts and leaders in heritage covenants from Canada, Great Britain, and the United States to discuss the future of this unique preservation instrument. This book is a result of the proceedings and focuses specifically on this sophisticated aspect of heritage preservation.

Investing in Condominiums Brian Persaud, Randy Ramadhin, 2011-11-21 A lot of information has been published for those who wish to buy a condo as a principal residence, but not for investors who want to expand into the condominium market. Investing in condominiums is not about being caught up in the mass hysteria of lining up to buy a pre-construction unit in a hot neighbourhood and hopefully flipping it at a profit when it's built. On the contrary, investing in condos can be a very good way to generate solid returns when done according to the proven strategies outlined in the book. Investing in Condominiums will show readers the ins and outs of profitable condo investing by sticking to investing fundamentals, carrying out proper due diligence, and having an exit plan. Pre-construction condominiums, especially in Toronto and Vancouver are sought-after by both Canadian and international investors. The stable economy, low-interest rate environment,

and appreciating values are a recipe for investor success. Investing in Condominiums gives Canadian investors the nuts and bolts of undertaking such an investment based on real-life examples and expert knowledge. By reading this book, the investor can proceed with full confidence knowing that they are asking the right questions, doing the math, and assembling the right team of experts that will help them realize their investment goals.

A Maintenance Management Framework for Municipal Buildings in Developing Economies Babatunde Fatai

Ogunbayo,Clinton Aigbavboa,Wellington Thwala,2023-02-03 The central aim of this book is to investigate and develop frameworks to aid effective maintenance management of municipal buildings in the education sector of developing economies. Using the South African education sector as a case study, this book provides readers with two major practical insights. Firstly, it focuses on the theoretical underpinnings of maintenance management research and introduces a maintenance management model through the development of a conceptual framework. This framework aids in explaining the factors underpinning the maintenance of municipal buildings but can also be used in the assessment and management of other public buildings. Secondly, the book highlights and addresses theoretical gaps in existing studies essential for the maintenance management of buildings in developing economies, providing a stimulus for future research. The book will be of interest to researchers in construction management, building technology, estate management, civil engineering, architecture, and urban and regional planning. It is an essential manual for policymakers in the education sector, built environment, construction industry, facility maintenance, facility management and consultants at government ministries, departments, and agencies (MDAs) charged with maintenance management of public infrastructures and assets.

Work in a Warming World Carla Lipsig-Mummé, Stephen McBride, 2015-04-15 Global warming is perhaps the greatest challenge facing the twenty-first century. Environmental policies on the one hand, and economic and labour market policies on the other, often exist in separate silos creating a dilemma that Work in a Warming World confronts. The world of work - goods, services, and resources - produces most of the greenhouse gases created by human activity. In engaging essays, contributors demonstrate how the world of work and the labour movement need to become involved in the struggle to slow global warming, and the ways in which environmental and economic policies need to be linked dynamically in order to effect positive change. Addressing the dichotomy of competing public policies in a Canadian context, Work in a Warming World presents ways of creating an effective response to global warming and key building blocks toward a national climate strategy.
