Mike Jess

**The Fermi Paradox is Our Business Model** Charlie Jane Anders, 2011-02-01 A humorous, sci-fi tale from the award-winning author of *All the Birds in the Sky*, Charlie Jane Anders's *The Fermi Paradox*, a Tor.com Original Jon and Toku travel the universe suspended in Interdream, only waking up to check up on certain business ventures. Simple. Until one of the business ventures, something called Earth, objects. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

William Hope Hodgson and the Rise of the Weird Timothy S. Murphy, 2023-06-01 The first comprehensive study of the works of William Hope Hodgson, one of the true innovators of Weird fiction, this book examines the Weird novels and stories upon which his posthumous reputation rests, his non-fantastic writing, identifiable literary influences, and the historical contexts in which he wrote. Focusing extensively upon major works such as *The House on the Borderland* (1908) and *The Night Land* (1912), Timothy S. Murphy surveys topics including Hodgson's experiments with code switching and linguistic experimentation; his depictions of racial and ethnic differences and gender and sexuality; the function of space and place in his writing; the adaptation of his shipboard experiences; and his use of abyssal time. With special attention paid to his paradoxical nihilist humanism, this book explores what made Hodgson a respected precursor to later innovators such as H. P. Lovecraft and C.L. Moore, and what makes him an important ancestor to 21st-century writers such as China Miéville, Greg Bear, and Charlie Jane Anders. Demonstrating how his work is both of his time and 'untimely', Murphy recovers Hodgson as the most significant figure to precede the fantastically popular but deeply controversial Lovecraft, as well as a figure whose work challenges what has thus far been accepted about the genre and the interpretive perspectives from which we view it.

**Six Months, Three Days, Five Others** Charlie Jane Anders, 2017-10-17 Anders provides six quirky, wry, engaging stories about aliens, humanity, time travel, and family reunions.

Fluid Futures Steven Shaviro, 2024-08-13 How does science fiction imagine forms of life that are plausible, and yet different from anything that we already know? *Fluid Futures* is about how science fiction imagines an open future. Science fiction does not claim to predict what will actually happen in times to come. But it offers pictures of potential developments; it narrates the unfolding of possibilities for change that are already implicit, or incipient, in the present moment. As Rod Serling said, science fiction is "the improbable made possible." The book starts by looking at three tools that are commonly

used in science fiction to address futurity: extrapolation, speculation, and fabulation. It goes on to consider concrete examples of how science fiction texts employ these tools to illustrate ways in which the future might be different from – but not entirely discontinuous with – the present-day conditions with which we are familiar. *Fluid Futures* insists upon the aboutness of science fiction, as it depicts situations and ideas that are at once possible and difficult to grasp. The book then explores how the genre embraces fictionality and narrative, reconceives time, and projects images of possible worlds. The point of the book is not to give a theory of science fiction. Instead, it emphasizes the ways that science fiction texts themselves propose theories, leading readers to reconceive concepts that we have taken for granted.

The Year's Best Science Fiction: Twenty-Eighth Annual Collection Gardner Dozois, 2011-07-05 In the new millennium, what secrets lay beyond the far reaches of the universe? What mysteries belie the truths we once held to be self evident? The world of science fiction has long been a porthole into the realities of tomorrow, blurring the line between life and art. Now, in *The Year's Best Science Fiction: Twenty-Eighth Annual Collection* the very best SF authors explore ideas of a new world. This venerable collection of short stories brings together award winning authors and masters of the field such as Robert Reed, Alastair Reynolds, Damien Broderick, Carrie Vaughn, Ian R. MacLeod and Cory Doctorow. And with an extensive recommended reading guide and a summation of the year in science fiction, this annual compilation has become the definitive must-read anthology for all science fiction fans and readers interested in breaking into the genre.
