The Big Questions Ethan Solace,2025-07-05 What is an apex predator - and why do they hold the world together? Step into the shadows, skies, and seas with *The Big Questions: What Is an Apex Predator?* - a breathtaking children's book that brings nature's most powerful creatures to life through stunning illustrations, poetic storytelling, and unforgettable facts. Perfect for ages 5-12, this beautifully crafted nonfiction picture book explores the lives of tigers, sharks, eagles, crocodiles, orcas, polar bears, and more. But it's not just about danger - it's about balance, intelligence, survival, and awe. Written in the signature lyrical style of award-winning author Ethan Solace, this book doesn't just teach - it transforms. Readers will discover how apex predators shape ecosystems, command respect, and move with purpose - all while asking deeper questions about our place in the natural world.

Apex Predators Steve Jenkins,2017-06-06 What does it take to be top dog? In this illustrated exploration of the animal kingdom, Caldecott Honor winner Steve Jenkins introduces readers to some of the most powerful predators in history, from the Tyrannosaurus rex to the African Siberian tiger. Using his signature cut paper art style, Jenkins illustrates how these animals dominate their different ecosystems using speed, strength, and even cooperation and cunning. Take a trip through history and discover apex predators both past and present, from the earliest sea creatures to the modern African lion and giant freshwater ray, which can grow to over fifteen feet.

Apex Predator Gail Daley,2022-11-20 The first world discovered by the Laughing Mountain Scientists was a doozy. A fitting match for Homo Sapiens—the deadliest predator of all time—maybe. If the native animals here don't get you, the plants just might. Life is hard on the outlawed colony of Lemuria. Some days it's a struggle just to stay alive. The plants and animals are huge--and deadly. Homo Sapiens are apex predators, but they may have just met their match . Zach Tylor is young, tough, and broke. He needs the money, so despite his better judgement, he agrees to guide a group of researchers to a mysterious structure of unknown origin. During the trek, he uncovers a dangerous conspiracy that threatens not only his home planet, but all the Outlawed Colonies.

Apex Predator D A Roberts,2020-05-18 They exist in myth and legend dating back to the earliest history of man. Different cultures have different names for the same creature, which has haunted the dark places of our collective psyche. Loup Garou, Werewolf, Lycanthropes, Rougaru, Michigan Dogman, The Beast of Land Between the Lakes, Oolonga-Doglalla,

Shunka Warak'in, Skinwalker. The beast is known by many names, but they all lead to the ultimate Apex Predator. A predator that has no equal. A predator that preys on man. Horrific murders plague a rural county, leaving bodies torn and partially eaten in their wake. Detective William Greyeagle of the Lacland County Sheriff's Office is assigned to the case. What he believes to be animal attacks awakens a dreaded fear from deep in his subconscious. It draws him deeper into his own heritage and the lore of beasts that prey on men. To find the killer, he must delve deeper into the teachings of his grandfather, a Lakota Medicine Man. Things he believed to children's stories are proven to be hauntingly true. There are things in the darkness that haunt the world of men. Humans are not the Apex Predator that they believed themselves to be. There is something far worse waiting just outside the light. The deep valleys and forests of the Ozarks prove to be the perfect hunting grounds. Predator versus prey in the ultimate game of life and death. Who will be the victor? Who will be the Apex Predator?

Cattle, Their Predators and Geomatics Research Michael O'Neal Campbell, 2025-08-06 Cattle are currently the most important domesticated mammals, with populations numbering in the hundreds of millions and occupying large tracts of land, while the conservation of large mammalian carnivores is becoming a dominant discourse in modern geopolitics, also claiming large portions of the Earth's land surface. Computer-based surveying and communication systems, including geomatics, Big Data and Big Tech, are becoming an essential part of human communication and environmental assessments and are critical to large-scale assessments of land conflicts. A current, critical, potent but neglected issue concerns the measurement of the interfaces of large carnivore and cattle ecologies, in a cross continental format. This book offers a novel approach to the interfaces of the sciences of conservation biology, animal ecology, agricultural development and geomatics, which are increasingly interconnected in modern, global development scenarios. For animal ecology and conservation biology, it is about the management systems that have developed from ecological and human parameters. For agricultural development, topics concern ancestral development, physiological characteristics, ecological requirements, and predation opportunities and conflicts of cattle breeds. For geomatics, the topics concern the image-based and survey-based technologies that enable more critical environmental assessments. The book takes a novel approach by examining the ancestry of cattle, including the aurochs and current wild buffalos, gaur, banteng, yaks, bison, the process of domestication into taurine and indicine cattle, the semi-domestication of yaks and water buffalo, the ecologies of ancestral and modern large carnivores, including bears, big cats and canids, and how the requirements of these large charismatic mammals conflict

with the requirements of cattle and agricultural development, in Asia, Europe, Africa, North America, and South America. This integrative approach contributes to the interests of academic researchers, students, practitioners and policy makers, and general readers.

Apex Predator Kelvin Kwa,2014-10-13 A future winter November 2018. The Eye of Heavens prototype Chinese satellite with next generation technology falls and is lost in the polar icecap. The race begins when two superpowers face off, one to learn secrets, the other to keep them. And they will send their greatest weapons wielded by their fiercest warriors to reach the prize. Special Agent Greg Cole, a man of lethal skill, pathological appetites, and a Machiavellian intellect, who engineered the theft of the satellite. For him, retrieving its secrets would be a career-making coup and nothing; no one was going to stand in his way friend, foe, or innocent bystander. SEAL Command Master Chief Carter Boheman aging warrior given one final chance to prove he can still run with the wolves, never questioned his orders or his purpose . . . until this mission. Until his orders called for murder. Colonel Xiang Lai Peng of the Peoples Republic of China Tasked by his government to retrieve the satellite at all costs, this elite unit commander will lead his men into an unimaginable nightmare where the price of success will be all too high. Captain Marcus Cartaneo USN Commander of the USS Seawolf, a submarine bristling with a frightening array of weaponry and the combined technological might of a superpower. Yet, its weakness lies in the tragedy haunted crew on the verge of mutiny against a commanding officer who has lost their trust. But natural enemies are the least of their worries for as the Arctic winter storms close in; something else has awakened deep within the ice. An elder force that once roamed ancient seas with impunity, now consigned to the realm of myth and legend has

returned. The stories speak of its savagery; pure, insatiable and untainted by conscience or reason yet possessing immense power and fearsome intelligence. In this cold, unforgiving wasteland, man and machine will come face to face with a malevolent, unrelenting entity who will hunt them across ice, across oceans to the very doorstep of their homes. Only the survivor, only the triumphant will be the Apex Predator.

The Dingo Debate Bradley Smith, 2015-08-03 The Dingo Debate explores the intriguing and relatively unknown story of Australia's most controversial animal – the dingo. Throughout its existence, the dingo has been shaped by its interactions with human societies. With this as a central theme, the book traces the story of the dingo from its beginnings as a semi-domesticated wild dog in South-east Asia, to its current status as a wild Australian native animal under threat of extinction. It describes how dingoes made their way to Australia, their subsequent relationship with Indigenous Australians, their successful adaption to the Australian landscape and their constant battle against the agricultural industry. During these events, the dingo has demonstrated an unparalleled intelligence and adaptable nature seen in few species. The book concludes with a discussion of what the future of the dingo in Australia might look like, what we can learn from our past relationship with dingoes and how this can help to allow a peaceful co-existence. The Dingo Debate reveals the real dingo beneath the popular stereotypes, providing an account of the dingo's behaviour, ecology, impacts and management according to scientific and scholarly evidence rather than hearsay. This book will appeal to anyone with an interest in Australian natural history, wild canids, and the relationship between humans and carnivores.

Trophic Cascades John Terborgh, James A Estes, 2013-06-25 Trophic cascades—the top-down regulation of ecosystems by predators—are an essential aspect of ecosystem function and well-being. Trophic cascades are often drastically disrupted by human interventions—for example, when wolves and cougars are removed, allowing deer and beaver to become destructive—yet have only recently begun to be considered in the development of conservation and management strategies. *Trophic Cascades* is the first comprehensive presentation of the science on this subject. It brings together some of the world's leading scientists and researchers to explain the importance of large animals in regulating ecosystems, and to relate that scientific knowledge to practical conservation. Chapters examine trophic cascades across the world's major biomes, including intertidal habitats, coastal oceans, lakes, nearshore ecosystems, open oceans, tropical forests, boreal and temperate ecosystems, low arctic scrubland, savannas, and islands. Additional chapters consider aboveground/belowground linkages, predation and ecosystem processes, consumer control by megafauna and fire, and alternative states in ecosystems. An introductory chapter offers a concise overview of trophic cascades, while concluding chapters consider theoretical perspectives and comparative issues. *Trophic Cascades* provides a scientific basis and justification for the idea that large predators and top-down forcing must be considered in conservation strategies, alongside factors such as habitat preservation and invasive species. It is a groundbreaking work for scientists and managers involved with biodiversity conservation and

protection.

Rewilding and Reintroductions in Britain Virginia Thomas, 2025-12-18 This book examines how rewilding and species reintroductions play a crucial role in conservation and ecological restoration in Britain. The book examines how humans think about and interact with our environment and nature, and how competing interests surrounding conservation, land-use (in particular agriculture), and social-cultural issues can be reconciled. Rather than taking a stance which is aligned to either conservation or farming, as many other books do, this book examines how these two land uses are being negotiated in the discourse and reconciled in practice. Drawing on research involving visits to rewilding and reintroduction projects and interviews with conservation experts, practitioners and stakeholders, the book examines two landscapes sites (the Avalon Marshes in Somerset and Wild Ennerdale in Cumbria) and three species: cows, the European Wildcat and the Red Kite. It also examines the role played by public figures, whether activists, environmentalists or celebrities, in promoting rewilding. The book argues that rewilding in Britain is domesticated, in that it is more compatible with people and other land use than is often the case with rewilding in other parts of the world. This extends from the smaller scale at which it occurs, to the different names by which it is known, to the way that humans are still intervening in rewilding landscapes, and the very careful consideration which is being given to which animals are involved and how they are managed. Overall, this book provides insights into how rewilding in Britain is evolving with the potential impacts on land use and land use decision making. This book will be of great interest to students and scholars of rewilding, conservation, ecological restoration, human-wildlife interactions and environmental management more broadly.

Ecology of Fishes on Coral Reefs Camilo Mora, 2015-04-23 The local diversity and global richness of coral reef fishes, along with the diversity manifested in their morphology, behaviour and ecology, provides fascinating and diverse opportunities for study. Reflecting the very latest research in a broad and ever-growing field, this comprehensive guide is a must-read for anyone interested in the ecology of fishes on coral reefs. Featuring contributions from leaders in the field, the 36 chapters cover the full spectrum of current research. They are presented in five parts, considering coral reef fishes in the context of ecology, patterns and processes, human intervention and impacts, conservation, and past and current debates.

Beautifully illustrated in full-colour, this book is designed to summarise and help build upon current knowledge and to facilitate further research. It is an ideal resource for those new to the field as well as for experienced researchers.

Apex Predator D A Roberts, 2021-01-30 Struggling with the loss of friends and loved ones, the Hotamétaneo'o find themselves drawn back to the deep, mysterious woods of the Ozarks. Dark visions warn them that evil is once more stalking the unwary. Two bodies are found floating in Lake Taneycomo near the small town of Rockaway Beach, both killed under mysterious circumstances. Following their visions, the Hotamétaneo'o fear that these deaths are somehow related to the death of one of their own. They soon discover that the creatures they are facing are like nothing they've ever seen before. An evil that is as old as recorded history. An evil that has no fear of them. Seeking help to stop this new enemy, they encounter the Vatican's Special Envoy. Will this shadowy group be their salvation or their undoing? Can they work together to defeat an ancient enemy as old as the sands of Egypt or fall prey to its insatiable hunger? The answers lie beneath the Horned Moon.

Apex Predators in the Greater Blue Mountains World Heritage Area Jack H. Pascoe, 2011 The Greater Blue Mountains World Heritage Area (GBMWH) was inscribed on the World Heritage list in 2000 for its natural values. The GBMWH reserve system encompasses more than one million hectares and contains the largest declared wilderness area in New South Wales. Preservation of ongoing biological processes and the maintenance of the biodiversity of this area are key factors in the GBMWH's World Heritage listing. To preserve these processes, and biodiversity, it is important to understand the critical elements of ecosystem function within the GBMWH. Apex predators are now acknowledged internationally as being vital in the maintenance of ecosystem function, often acting as keystone species through topdown pressure. The role of apex predators is also acknowledged in Australia, with the dingo considered the country's top terrestrial predator. Exotic predators are also having an impact on the Australian fauna. Both the fox and cat have been associated with processes which have caused the extinction of many of Australia's ground mammals and still threaten native species. This study investigated the influence that both native and exotic apex predators have on sympatric predators and prey in the GBMWH. By describing the distribution, diet and activity of apex predators, the impacts of these species in the World Heritage Area are examined. The study includes species from numerous taxonomic classes in order to describe apex predator interactions holistically. Studies involving this range of predators have not been published previously in Australia. To investigate apex predator interactions, three field sites were selected, with each site exhibiting unique habitat features. In addition, habitat suitability models were constructed for each of the species studied to compare with species presence data collected at each site, and to predict more broadly the distribution of each species across the GBMWH. The predicted distribution of wild dogs and foxes was shown to encompass the vast majority of the GBMWH as reflected in their presence at the three field sites investigated. The predicted climate suitability of the more cryptic native predators was more restricted than their exotic counterparts, and this was reflected in their distribution across the three study sites.

Apex Predator D A Roberts, 2020-06-02 Werewolves. Primal. Predatory. Mythical. Or so we would like to believe. Investigating a series of grisly murders last winter in Lacland County, Detective Will Greyeagle came up against a supernatural enemy in the form of legendary creatures called the Dogmen. To stop them, Will joined forces with a group of Native American warriors known as the Hotamétaneo'o, or Dog Soldiers. With the help of his grandfather, the mysterious White Bear, and powerful Native American magic, they managed to defeat the Dogmen, but at great cost. Now months have passed and Greyeagle has found the love of his life, retiring from Lacland County to become a full-time Dog Soldier. On a trip to Eureka Springs, Arkansas, they learn of other animal attacks and fear the Dogmen have returned. As the Blood Moon nears, it becomes obvious this new enemy is not what it appears to be. It's something much worse. Teaming up with local law enforcement, Will and the remaining Dog Soldiers set out to vanquish this new enemy. Unexpected help arrives from a stranger known only as Gideon and a shadowy black ops team called the Wild Hunt, but will it be enough? To make matters worse, there is a mysterious priest who seems to be hunting them all, friend and foe alike. To defeat this new enemy, Will Greyeagle must become more than cop. More than a Dog Soldier. He must become the Apex Predator.

Apex Predator S. M. Douglas, 2016-10-24 The deaths of several high profile bankers leave national security experts scrambling for answers. FBI Agent William Brody stumbles onto a lead in Detroit at the same time a team of historians make a startling discovery in a Ukrainian village. Brought together, they struggle to survive against a mythic evil murderously intent on changing history.

Apex Predator J. A. Faura, 2014-11 What is the legal definition of human? Is there something beyond a psychopath? Are humans still at the top of the food chain? These questions and their answers play a central role in *Apex Predator*. The novel is inspired by true events and utilizes real evolutionary, forensic psychiatry and cognitive science, making it truly frightening and thought-provoking. The story, however, begins with Steven Loomis, a man, a father looking for answers after his daughter's kidnapping and brutal murder. He wants to understand what drives monsters like the one that kidnapped and killed his daughter. What he discovers is that his daughter's killer was just the tip of the iceberg; that there are far more sinister and powerful forces at play, forces that Steven was not expecting nor prepared for. He realizes that what he has found is the most significant and real threat that humanity has ever faced. And while he wants to simply grieve like a father that lost his little girl, he realizes that he must play a role he is neither sure he is ready for nor willing to play. He ultimately understands that only he can warn the world about the threat, only he can do something about it. Steven Loomis finds himself in the fight of his life as he tries to warn the world of the threat, to protect his family and to keep himself out of

prison.
