**Teaching and Learning in the Age of Generative AI** Joseph Rene Corbeil,Maria Elena Corbeil,2025-04-30 Teaching and Learning in the Age of Generative AI explores how educators can effectively harness the potential of artificial intelligence technologies while skillfully navigating its pedagogical, technical, ethical, institutional, and societal implications. The increasing accessibility of AI technologies among K-12 and higher education students has raised extensive concerns around academic integrity, though a deeper lineage of research and development suggests that these tools may be used to supplement instruction, prioritize critical thinking, and promote digital literacy. Bookended by in-depth analyses of the historical and future trajectories of artificial intelligence in education, this comprehensive resource provides evidence-based strategies for classroom implementation and helpful summaries of common benefits and risks. Teaching assistance, personalized learning, redefined assessments, anti-bias measures, and safeguards against misconduct and privacy infringement are among the wealth of topics addressed in these chapters. This book is an ideal text for undergraduate and graduate students of teacher education and curriculum and instruction as well as for higher education teaching faculty, school technology coordinators, and talent development personnel in training and in service.

Becoming a Certified Six Sigma Master Black Belt Hemant Urdhwareshe, Husain A. Al-Omani, Thomas J. West, 2025-03-27 Six Sigma is a systematic approach to making significant or breakthrough process improvements. Currently, Six Sigma exists as a team-based problem-solving approach applied by trained project facilitators, which are typically called belts. Depending on the level of expertise in the methodology and improvement tools, belts can be White, Yellow, Green, Black, and Master

Black Belts (MBBs). The Master Black Belt is the highest level of expertise in Six Sigma approaches, tools, and techniques. In companies implementing Six Sigma, the role of Master Black Belt is to train, guide, and coach Black and Green belts to execute their improvement projects efficiently. In addition to this, Master Black Belts are often responsible for overseeing the organization's entire improvement program with the ultimate responsibility for creating a robust culture of continuous improvement. Thus, the competence of MBBs is critically important for the success and long-term sustainability of Six Sigma in organizations. This book is ideal for all those who wish to get trained and certified as Master Black Belts and train others to achieve breakthrough results using Six Sigma to shape and execute improvement projects. The book has the right balance between topics such as strategic planning, project selection, stakeholder management, and training design, to advanced statistical techniques such as propagation of errors, destructive measurement systems, general linear models and components of variation, and complex blocking structures in Design of Experiments. This book was written by three expert Master Black Belts certified by the American Society for Quality (ASQ). Moreover, they are from different parts of the world and industry, which brings great diversity to the contents of the book.

Liquid Legal Kai Jacob, Dierk Schindler, Roger Strathausen, 2016-12-01 This book compels the legal profession to question its current identity and to aspire to become a strategic partner for corporate executives, clients and stakeholders, transforming legal into a function that creates incremental value. It provides a uniquely broad range of forward-looking perspectives from several different key-players in the legal industry: in-house legal, law firms, LPO's, legal tech, HR, associations and academia. This publication is a platform for leading legal professionals that offers a new perspective on the accelerating transformation in legal. Combining expert contributions with editorial insights, it argues that the new legal function will shift from a paradigm of security to one of opportunity; that future corporate lawyers will no longer primarily be negotiators, litigators and administrators, but that instead they will be coaches, arbiters and intrapreneurs; that legal knowledge and data-based services will become a commodity; and that analytics and measurement will be key drivers of the future of the profession. A must-read for all legal professionals, this book sets the course for revitalizing the profession.
