Summary of Grit Fastreads Publishing, 2016-10-13 One characteristic emerged as a significant predictor of success. And it wasn't social intelligence. It wasn't good looks, physical health, and it wasn't IQ. It was grit. - Angela Duckworth Grit is passion and perseverance for very long-term goals. Grit is having stamina. Grit is sticking with your future, day-in, day-out. Not just for the week, not just for the month, but for years. And working really hard to make that future a reality. Grit is living life like it's a marathon, not a sprint. - Angela Duckworth As soon as possible, experts hungrily seek feedback on how they did. Necessarily, much of that feedback is negative. This means that experts are more interested in what they did wrong-so they can fix it-than what they did right. The active processing of this feedback is as essential as its immediacy. - Angela Duckworth Here's what you will learn: The ingredients of grit: passion and perseverance How grit is more important than talent Why effort counts twice as much How gritty people are more successful How to develop your own grit using the four psychological assets The importance of goal-setting, optimism, and a growth mindset How to develop grit in your children How to create a culture of grit And much more! ***Don't miss out on the unforgettable and profound wisdom of Angela Duckworth's New York Times Bestselling book, *Grit: The Power of Passion and Perseverance*. Grit has two components: passion and perseverance. Passion means having enduring interest in the job you are doing. Perseverance means being persistent and never giving up. In the book, Duckworth shows how grit is important in understanding the psychology of achievement. The Grit Scale, which measures an individual's grit score, correctly predicted which cadets at West Point would pass the Beast Barracks, which National Spelling Bee participants would advance to the next rounds, and which sales people would be able to retain their jobs. The book also discusses how talent gets overemphasized, whereas grit gets underemphasized. When we place more emphasis on talent, we ignore everything else, including effort. In a natural vs. striver situation, we are most likely to favor the naturally gifted person, thus leading to the naturalness bias. Duckworth argues that effort counts twice. A talent with no effort is just unmet potential. She shows that how with the addition of effort, talent becomes skill, and skill when put to a productive use becomes achievement. In order to help people cultivate a sense of passion and perseverance, the author introduces four psychological assets commonly found in the grittiest people: interest, practice, purpose, and hope. Interest and purpose are two sources of passion. Practice and hope help develop perseverance which nurtures the never give up attitude. This attitude, which helped cadets pass Beast at West Point, helps us follow what we have started through to the end. Grit can be cultivated with the help of the four psychological assets or the people around us, our parents, teachers, mentors, etc. Certain parenting methods as well as extracurricular activities can also help become our children grittier.
