

Les Regimes De Neutre

A. Aubert (of Marseilles, France?)

Les régimes de neutre et les schémas des liaisons à la terre Michel Lambert, 2011 Les cahiers des charges des réseaux d'énergie électrique comportent des normes contraignantes au sujet de la protection des personnes et des matériels. En électricité les "régimes de neutre" et les "schémas de liaison à la terre" définissent les modes de raccordement à la terre et aux masses. Ils ont pour but de maîtriser les défauts d'isolement par éloignement ou par utilisation de matériaux isolants. Cet ouvrage est d'abord un outil d'analyse et de compréhension des déséquilibres électriques. Il fournit ensuite un inventaire des dispositions qui doivent être prises en cohérence avec le choix du régime de neutre.

Les régimes de neutre et les schémas des liaisons à la terre - 2e éd. Michel Lambert, 2023-08-21 L'essentiel des anomalies rencontrées sur un réseau a pour origine un déséquilibre homopolaire. Le comportement du système électrique et la maîtrise des contraintes sont alors déterminés par le mode de fixation du neutre avec la terre. Le choix d'un régime de neutre est le résultat d'un compromis entre des impératifs dont les critères d'appréciation relèvent de la qualité de service, de la préservation des biens, de la sécurité des personnes et de la maîtrise des coûts. Cette 2e édition est issue de l'expérience professionnelle de l'auteur. C'est un outil d'analyse permettant de réaliser l'inventaire des dispositions qui doivent être prises en cohérence avec le choix du régime de neutre. Elle s'adresse aux exploitants et aux concepteurs des réseaux d'énergie électrique, qu'ils soient ingénieurs ou techniciens. Elle sera également utile aux formateurs et à tous ceux qui veulent maintenir leurs connaissances à jour. La première partie définit : Les déséquilibres homopolaires. Les régimes de neutre et les schémas des liaisons à la terre. Les critères de choix d'un régime de neutre. La deuxième partie présente les dispositions associées : Les dispositifs de mise à la terre d'un neutre. Les plans de protection. L'exploitation.
